MEDVICE INSIGHT

MEDVICE Insight is our proprietary software designed for strong clinical engineering practices. It centralises medical equipment inventories, and it features a closed-loop work order process to track equipment service and expense data from acquisition to retirement. The software can be customised to report data that is important to you, so that you can better identify areas for cost savings and quality improvement.

This user-friendly system incorporates four major modules that help manage all clinical engineering activities in one place. It includes robust interfaces for asset and service management, as well as a centralized location to communicate and source parts requests. The reporting and analytics features allow multiple users within an organization to customize their own dashboards that highlight key performance indicators that are most relevant to them, and the advanced reporting feature can generate more detailed reports for regulatory compliance or hospital leadership. Even more, the software can be integrated with multiple existing hospital systems, such as ERP and HRIS, and it is also designed to be used in all-sized organizations, from single departments to multi-facility hospital systems. A software demonstration is available upon request.

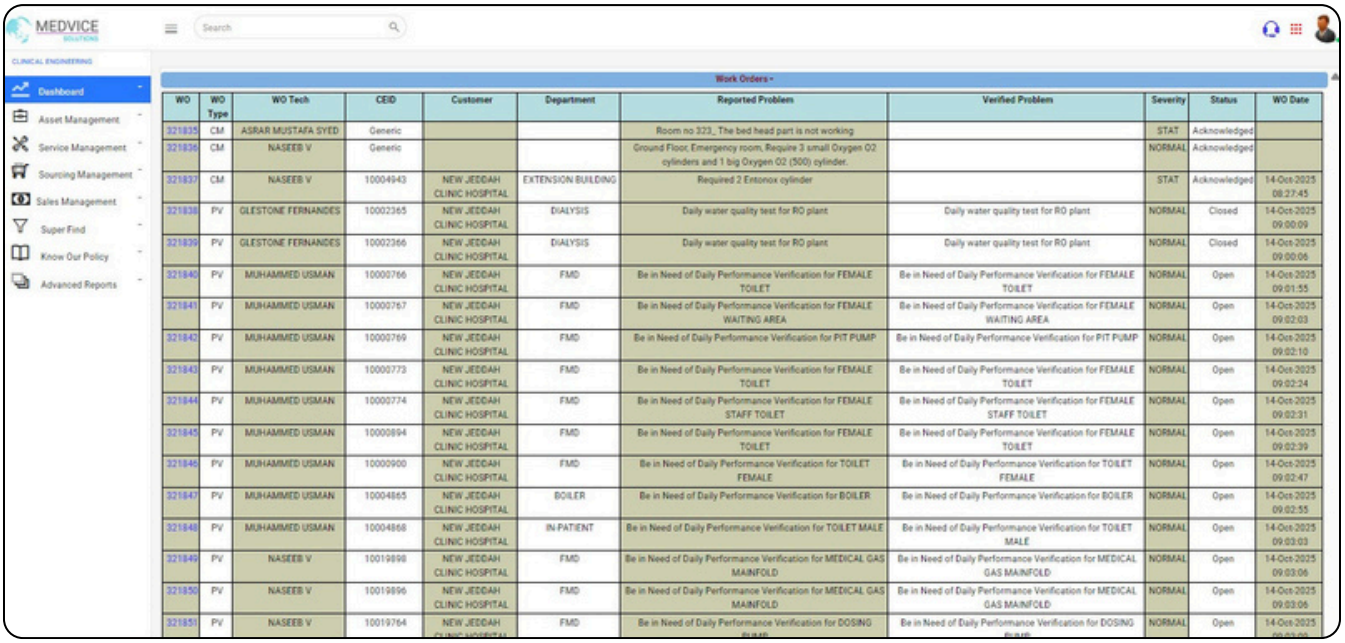

Medvice Insight Login

Login Page & Dashboard

Click the link below to open the Login Page: https://medvice.solutions/

After entering your User ID and Password, the MEDVICE Insight Dashboard will appear, as shown in the image below.
The dashboard provides access to multiple functions that enable you to efficiently manage and navigate the MEDVICE Insight application.

Creating User ID & Password

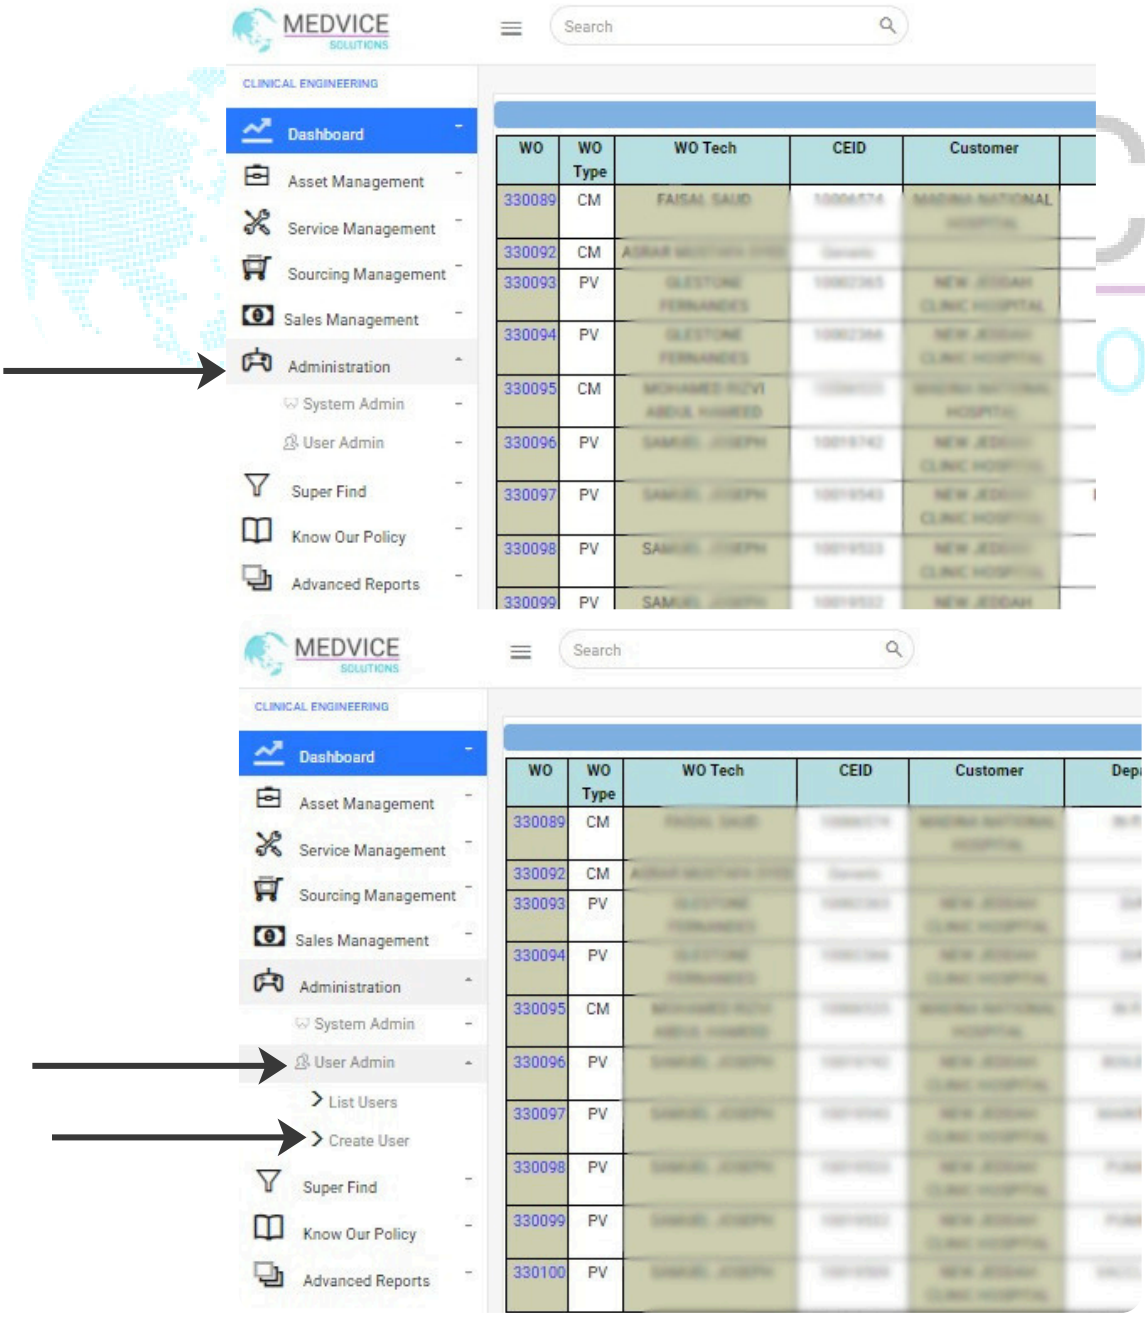

Dashboard & Administration

After logging in, the MEDVICE Insight Dashboard will appear, as shown in the image below.

Note: The “Administration” tab is accessible only to users with Manager or Reference Manager access.

Click on the “Administration” tab. The Administration section provides two options:

1. System Admin 2.User Admin

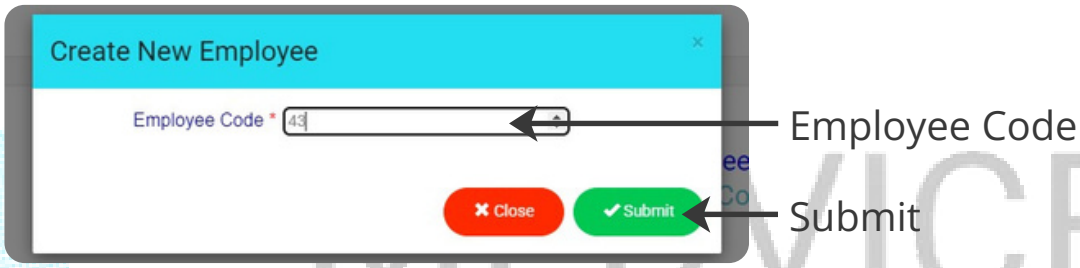

MEDVICE SOLUTIONS

Create User Admin

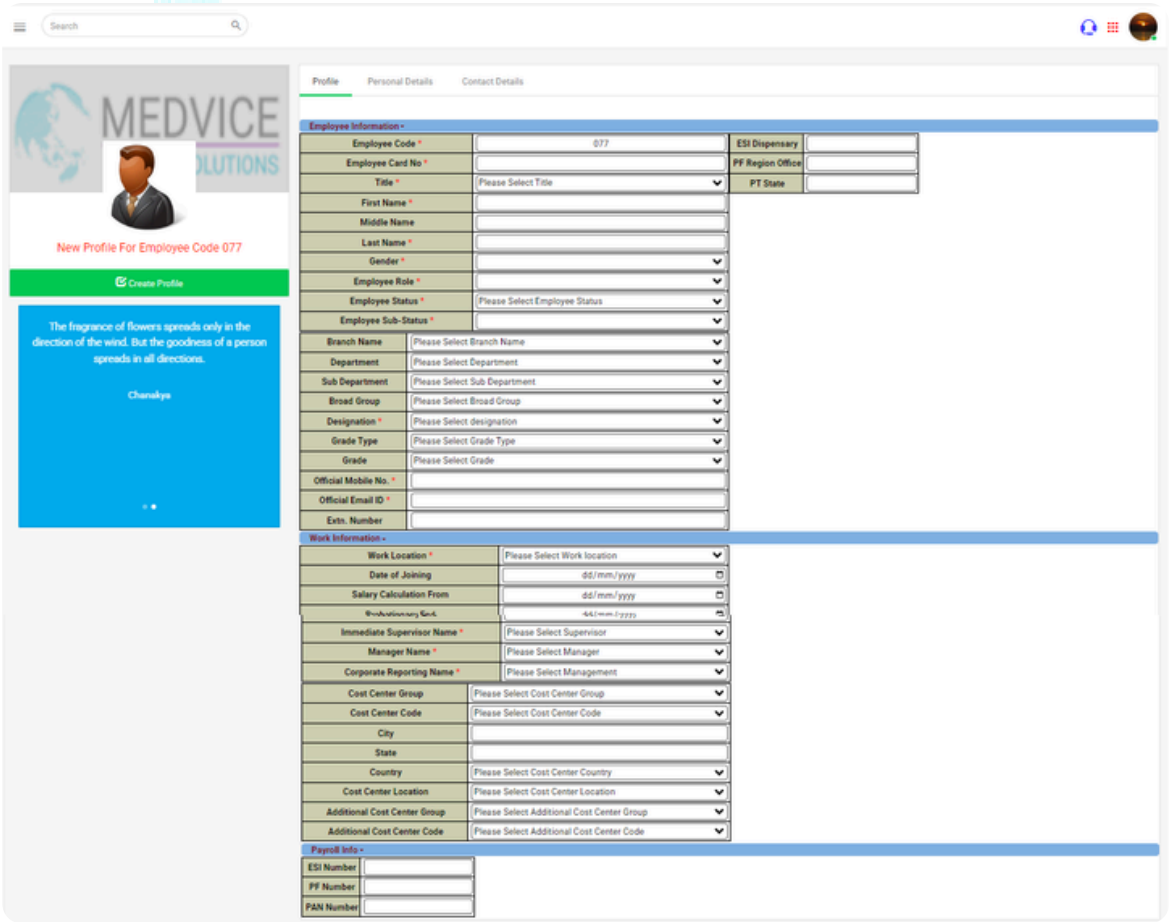

Under the User Admin section,twooptionsareavailable:

1.List Users
2.Create Users

Click on the Create User tab to create the user.
After clicking “Create User,” the “Create New Employee” pop-up window will appear, prompting you to enter the required information, as shown in the image below.

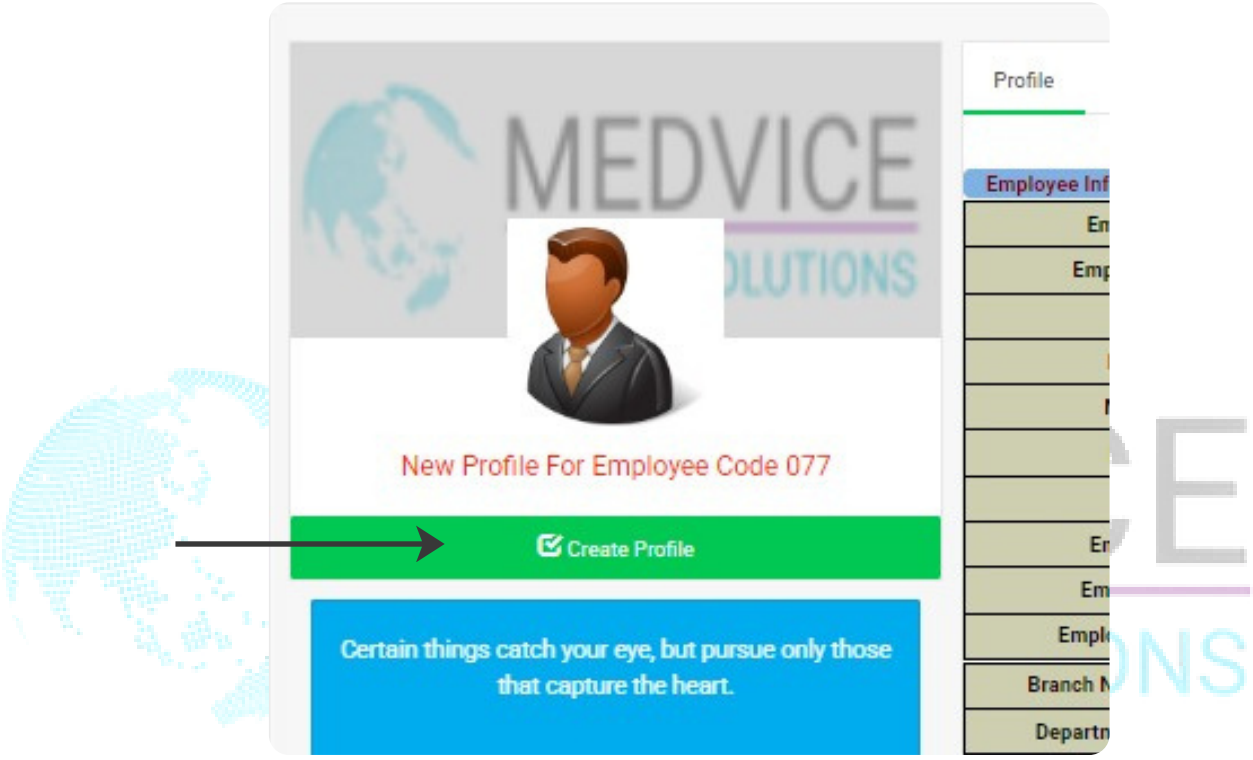

After clicking the “Submit” button, the “New Profile for Employee” window will be displayed. Enter all the required information in the mandatory fields to complete the employee profile.

User Profile

After entering all the required information, click the “Create Profile” button located on the left side, as shown in the image below.

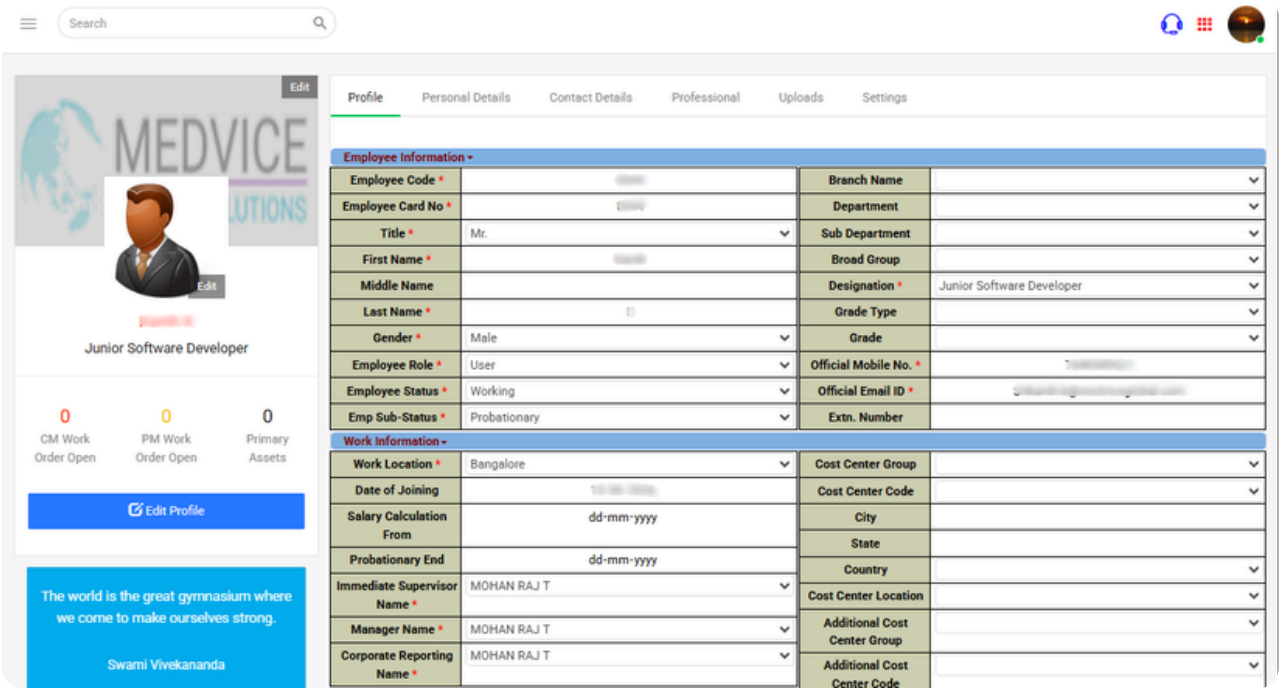

You have now successfully created the User Profile.

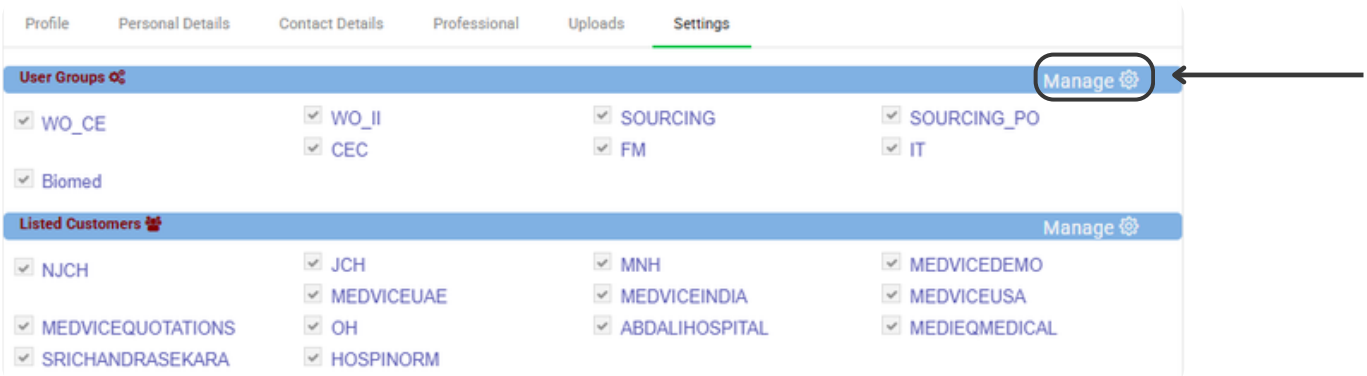

Assigning Listed Customers and User Group Access for new Users

After successfully creating the User Profile, the appropriate access permissions must be assigned to the user.

Open the newly created User Profile. Navigate to the Settings tab, as shown in the image below.

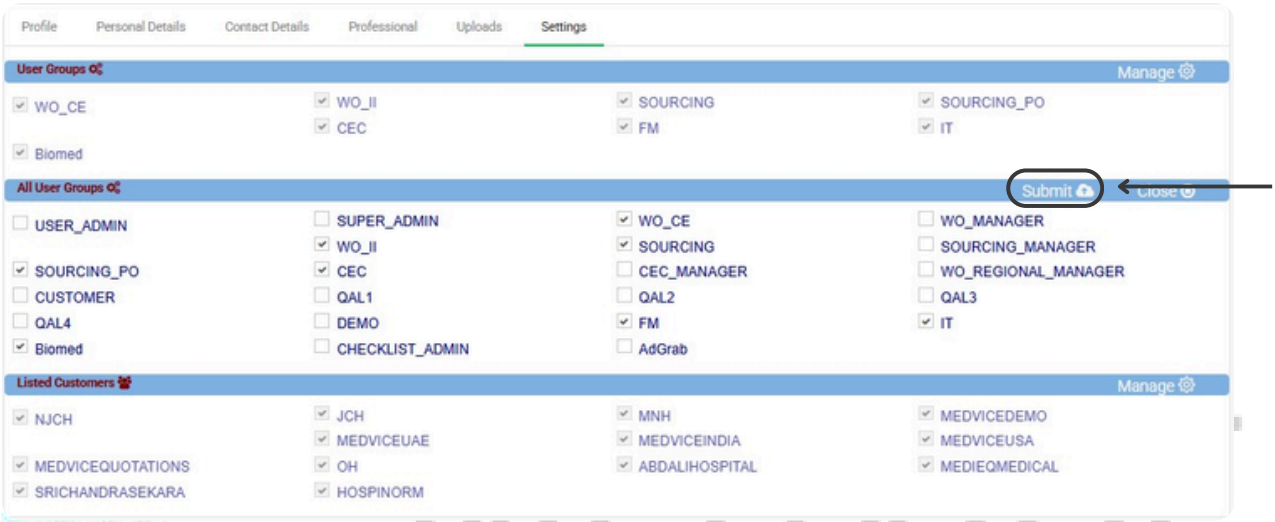

Under the Listed Customers or User Groups section, click the Manage button.

MEDVICE SOLUTIONS

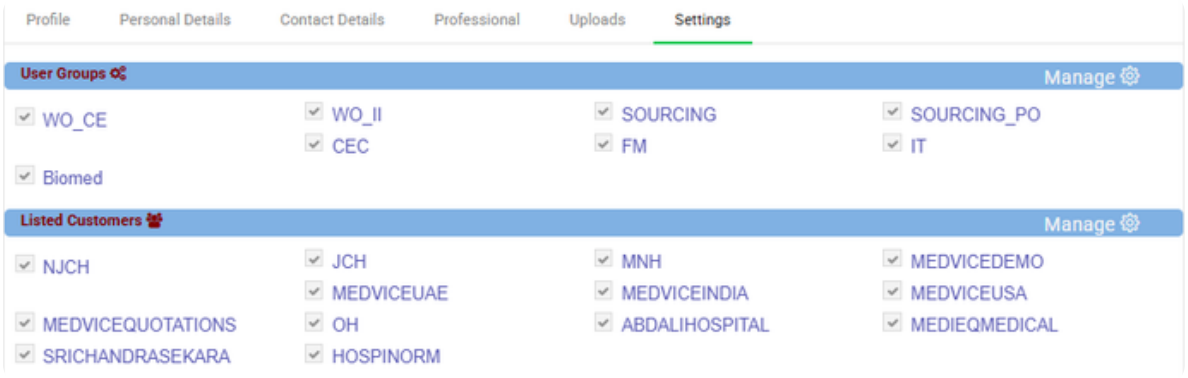

A list of all available customers, user groups, and access permissions will be displayed.

Select the required customers, user groups, and permissions that need to be assigned to the user.

After selecting the appropriate options, click the Submit button to save the changes.

The selected access rights will be assigned to the user, allowing them to access only the modules, customers, and features permitted by their assigned permissions.

Note: Access permissions can only be assigned or modified by Managers or users with the necessary administrative privileges.

MEDVICE SOLUTIONS

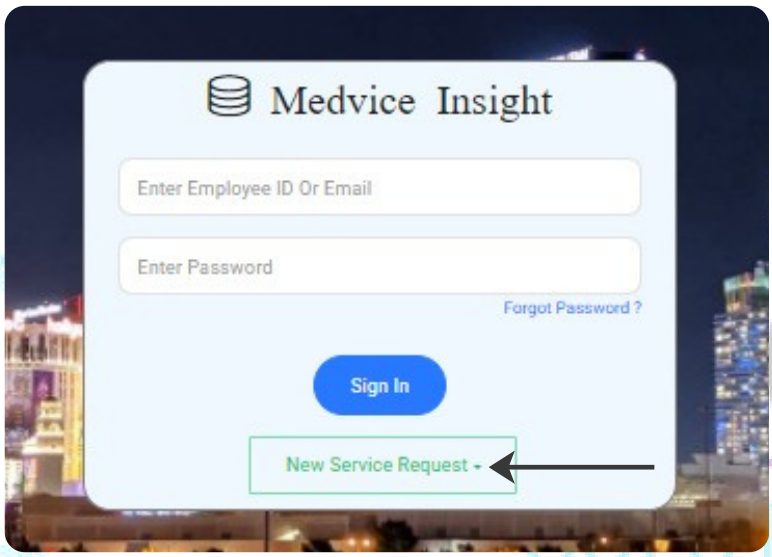

Assigning The Work Order without User ID & Password

Login Page& New Service Request

After login, the Medvice Dashboard will appear, as shown in the image below.

2. Without User ID & Password

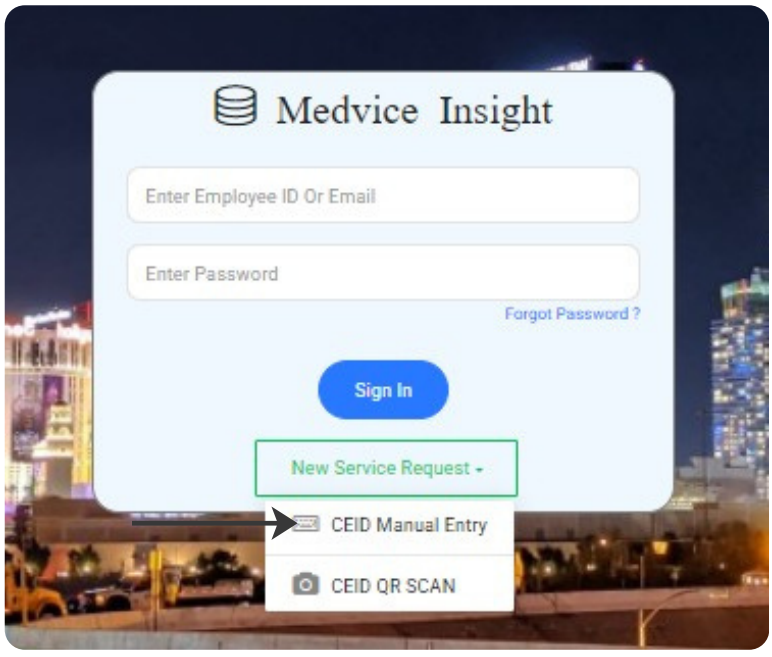

On the login page, there is an Option labelled “New Service Request”, located below the Sign In button.

After clicking on New Service Request, two options will be displayed:

1.CEID Manual Entry
2.CEID QR Scan

We will now proceed with the first method: CEID Manual Entry.

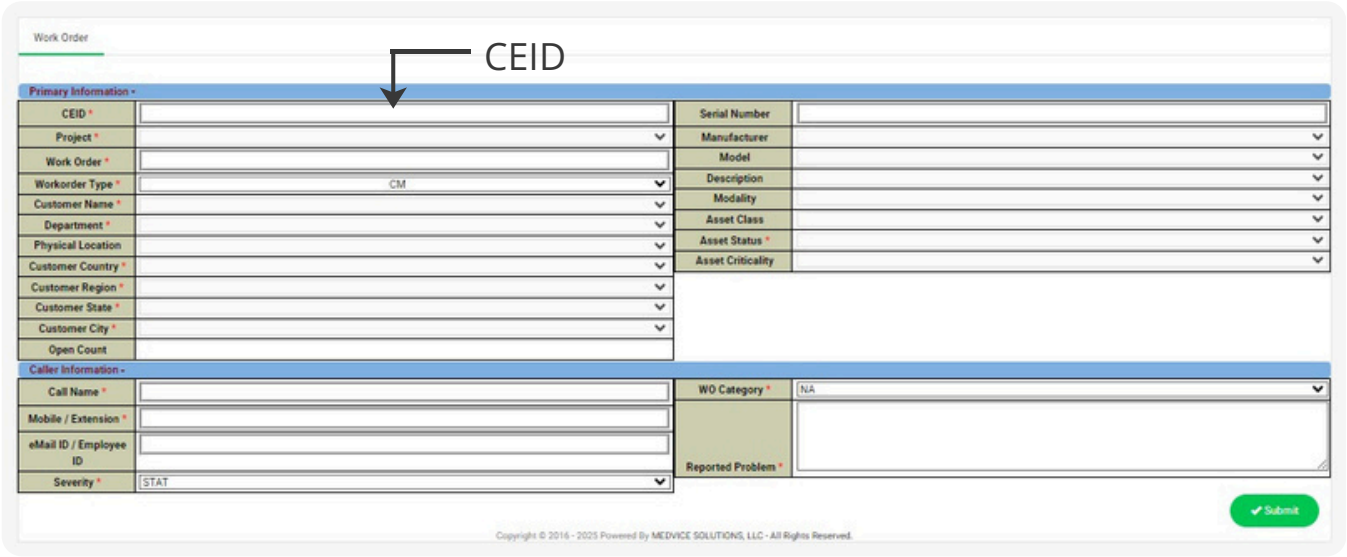

MEDVICE SOLUTIONS

Assigning with CEID Manual Entry

1. CEID Manual Entry

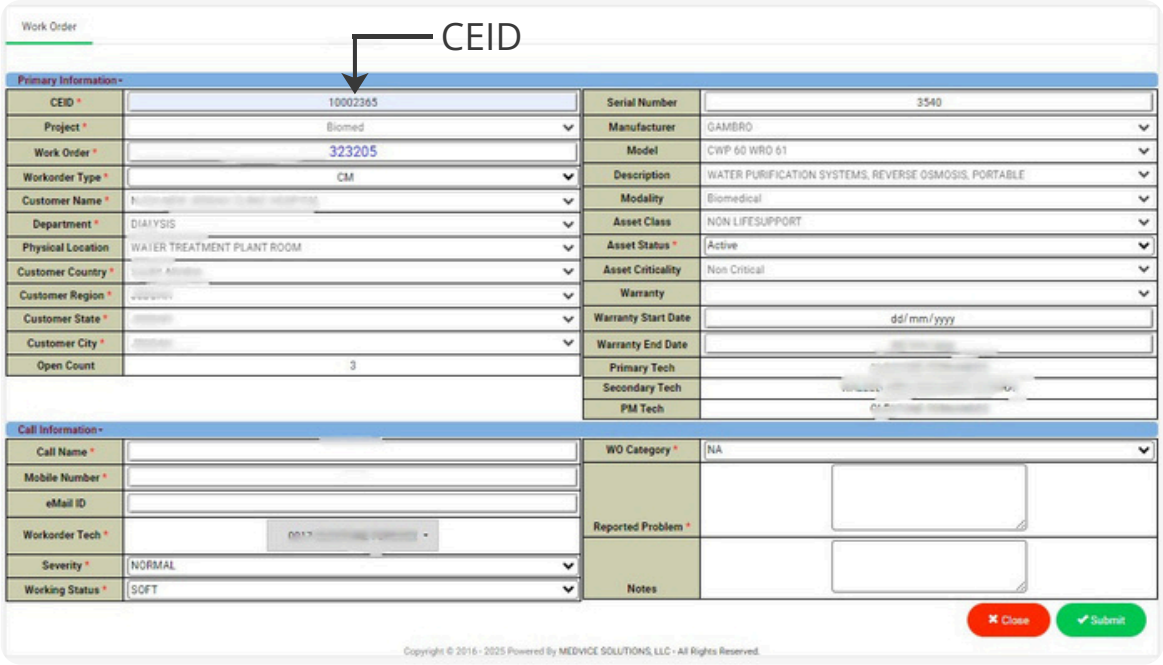

First, enter the CEID and press Enter.

After that, the Primary and Pre-Loaded Asset Information, along with the Work Order (highlighted in blue), will be displayed, as shown in the image below.

Guidelines:

- Equipment/Asset information along with CEID should be uploaded in medvice insight Correct CEID has to be entered

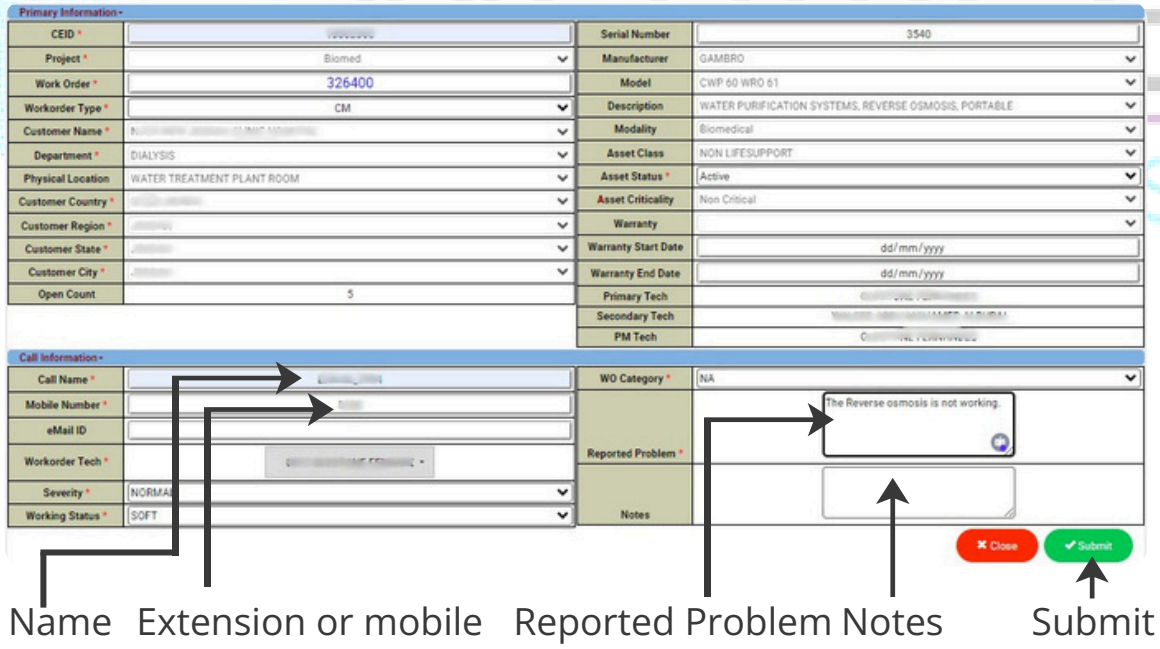

MEDVICE SOLUTIONS

Pre-Loaded & Caller Information

Now, cross-verify the Pre-Loaded Asset Information with the Customer Information to ensure that all details match the information provided in the Pre-Loaded Asset Information.

Now, enter the Caller Information manually, as shown in the image below.
a. Caller Name – Enter the caller's name, with or without the Caller ID.
b. Contact Number – Enter the mobile number or extension number.
c. Reported Problem – Enter the exact issue along with the location details.
d. Notes – Enter any additional information related to the Work Order, if applicable.

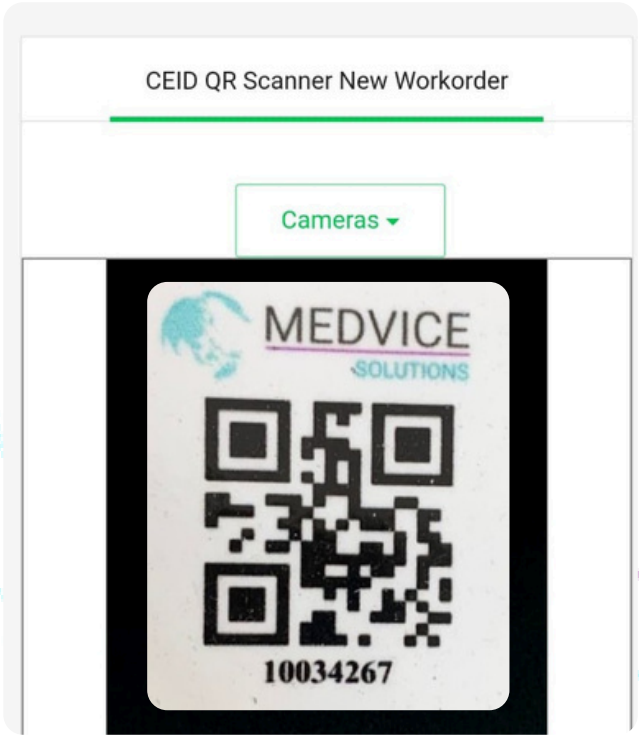

After filling in all the required information, click the Submit button to create the New Work Order.

MEDVICE SOLUTIONS

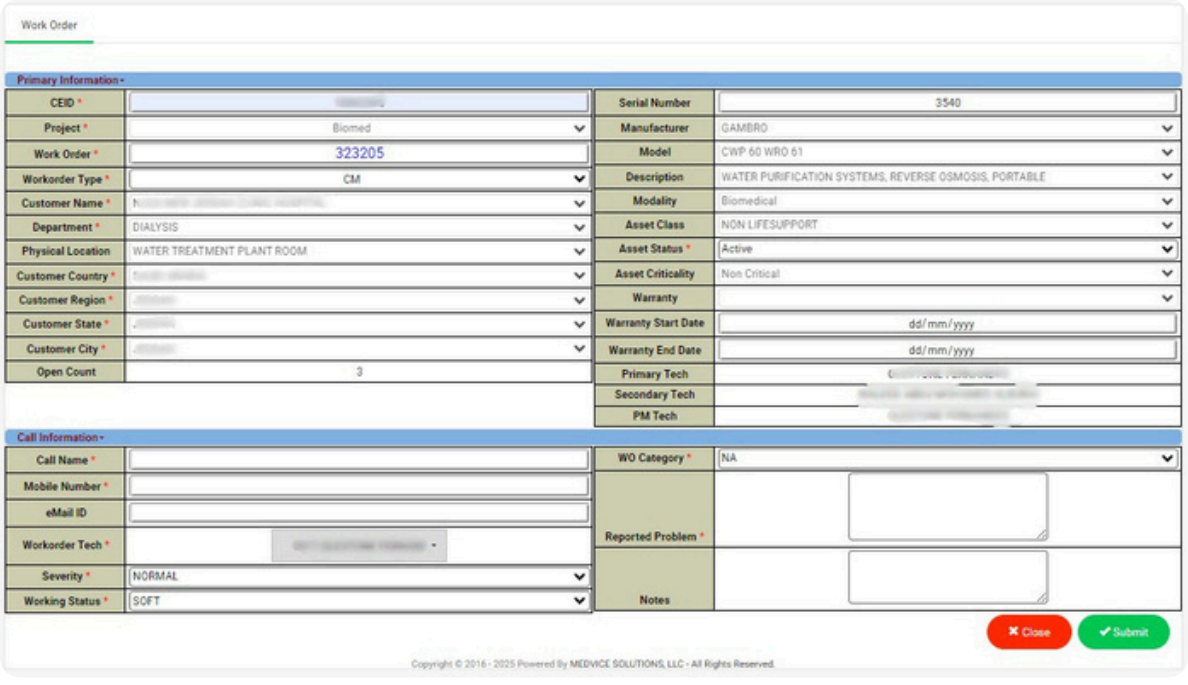

Assigning with CEID QR Scan

2. CEID QR Scan

You need to show the CEID QR Code to the webcam to proceed with assigning the Work Order.

Once the CEID QR is scanned, the pre-loaded Asset Information will automatically be displayed.

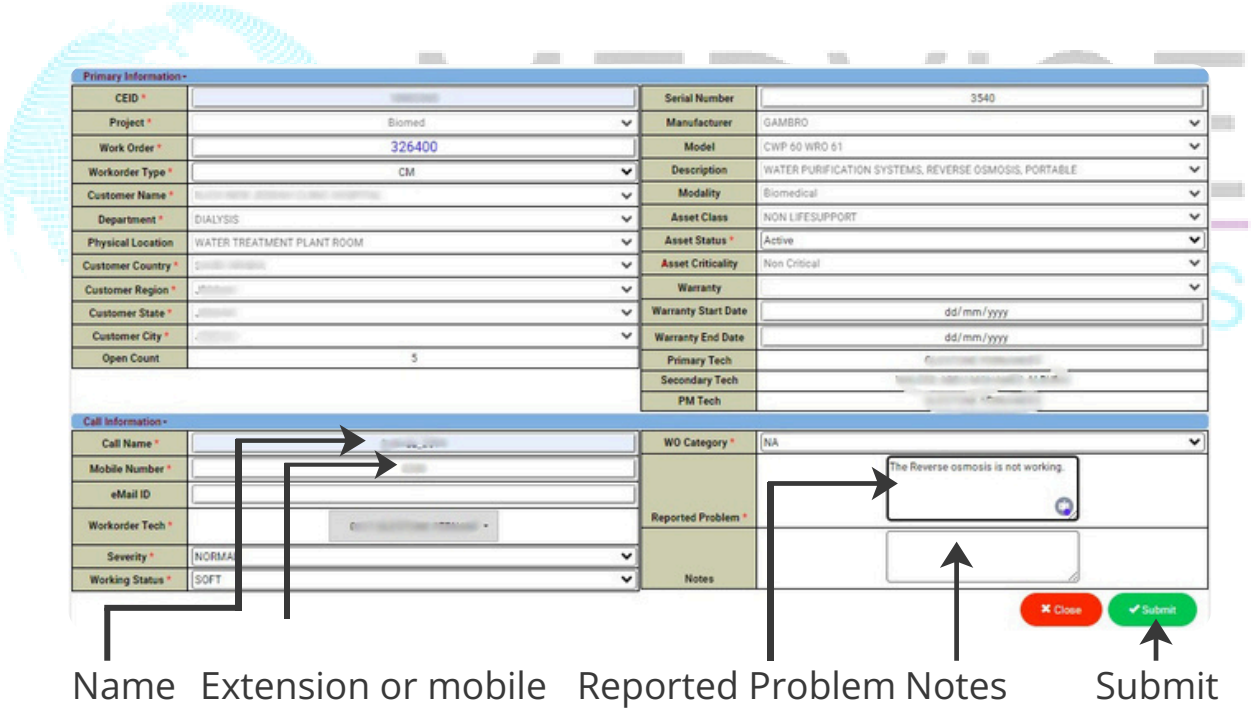

MEDVICE SOLUTIONS

New Work Order Submission

Now cross-verify the Pre-Loaded Asset Information with the Customer Information to ensure that it matches the details provided in the Pre-Loaded Asset Information.

Now, enter the Caller Information manually, as shown in the image below.
a. Caller Name – Enter the name with or without the Caller ID.
b. Contact Number – Enter the Mobile Number or Extension Number.
c. Reported Problem – Enter the exact issue, along with the location details.
d. Notes – Enter any Additional Information related to the work order, if applicable.

After filling in all the required information, click the Submit button to create the New Work Order.

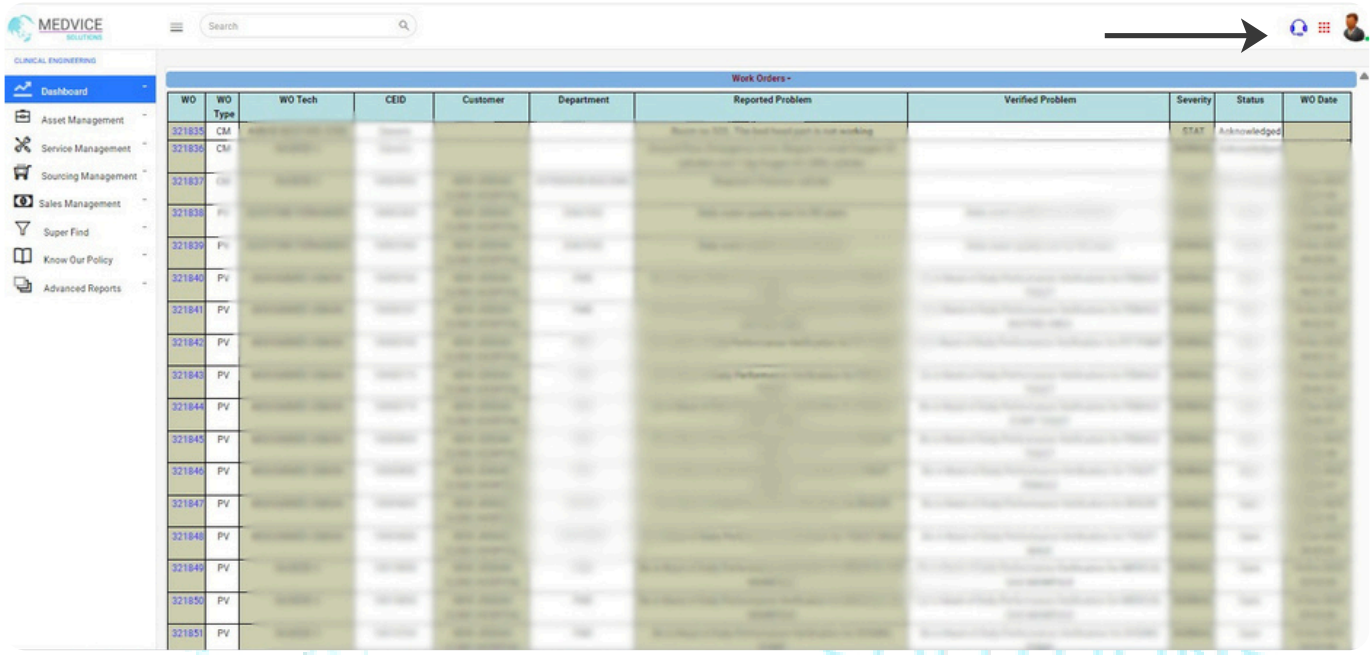

After the Work Order is assigned, the assigned technician will receive a notification on their mobile device.
Based on the notification, the technician can proceed with the assigned Work Order.

You have now successfully created a New Work Order.

Assigning The Work Order with User ID & Password

Dashboard & Work Order

After login, the Medvice Dashboard will appear, as shown in the image below.

Assigning the Work Order:
There are two methods to assign a Work Order:

1. **With User ID & Password**
2. **Without User ID & Password**

1. With User ID & Password
In this method, you must log in using your User ID and Password to assign the Work Order, as shown in the image below.

Guidelines:

- Equipment/Asset information along with CEID should be uploaded in medvice insight
- Correct CEID has to be entered

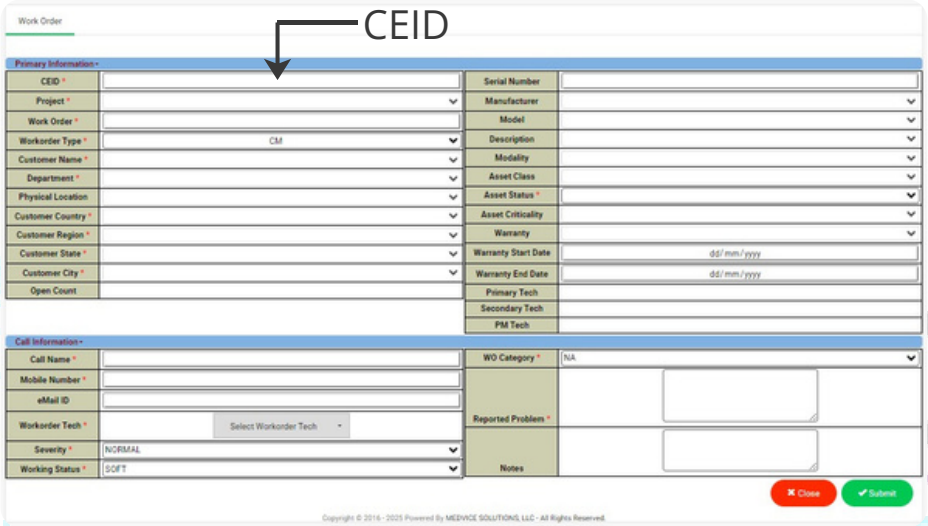

Click the Microphone icon located at the top-right corner of the screen to assign a new Work Order.

Assigning The Work Order with CEID

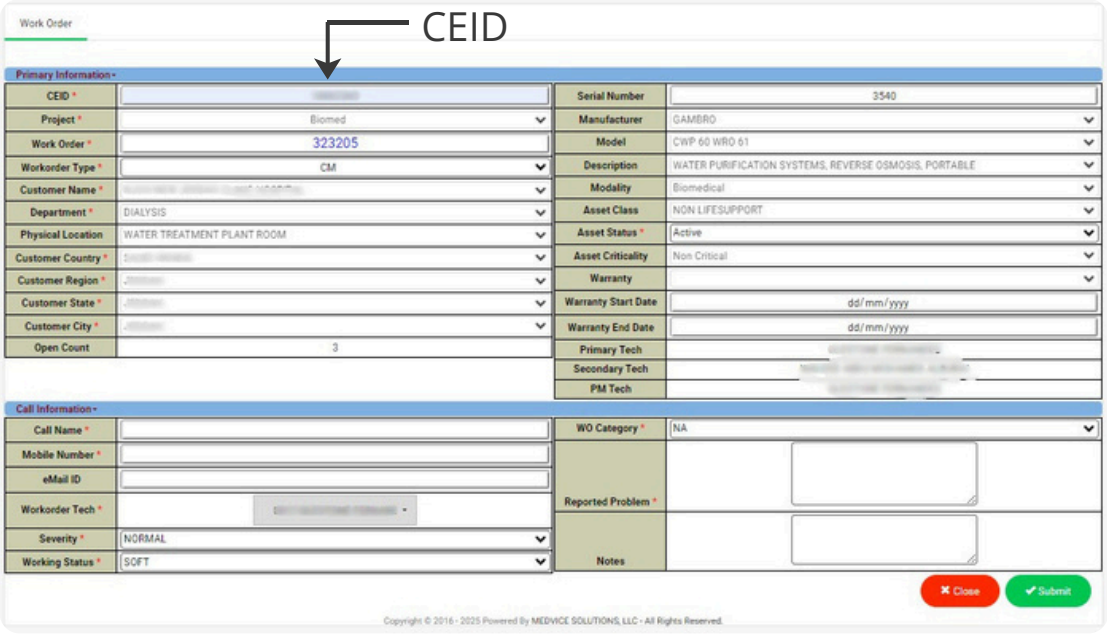

There are two ways to assign a New Work Order:

1. **With CEID**
2. **Without CEID**

1. With CEID

First, enter the CEID and press Enter.
After that, the Primary and Pre-Loaded Asset Information, along with the Work Order (highlighted in blue), will be displayed, as shown in the image below.

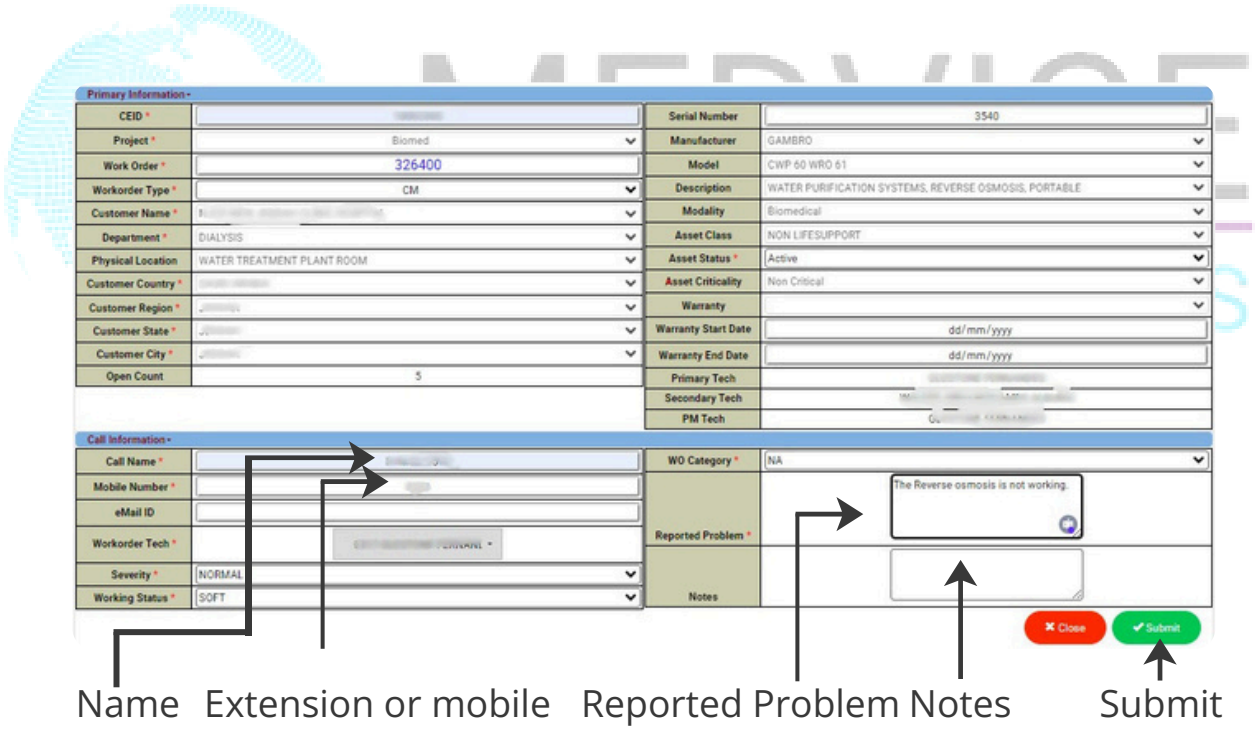

MEDVICE SOLUTIONS

Pre-Loaded & Caller Information

Now cross-verify the Pre-Loaded Asset Information with the Customer Information to ensure that it matches the details provided in the Pre-Loaded Asset Information.

Now, enter the Caller Information manually, as shown in the image below.

a. Caller Name – Enter the name with or without the Caller ID.
b. Contact Number – Enter the Mobile Number or Extension Number.
c. Reported Problem – Enter the exact issue, along with the location details.
d. Notes – Enter any Additional Information related to the work order, if applicable.

After entering all the required information, click the “Submit” button to create the New Work Order.

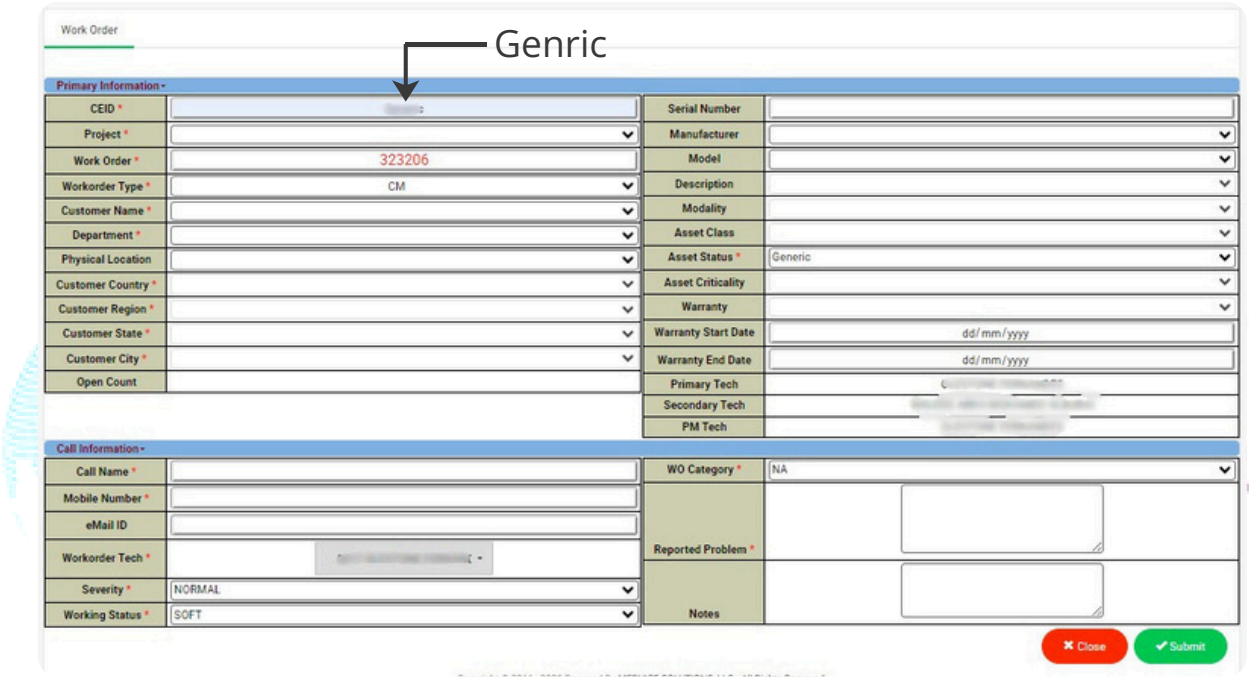

If the Pre-Loaded Asset Information and Work Order (highlighted in blue) do not appear after entering the CEID, it indicates that the CEID has not been updated in the system.

In this case, proceed using the “Without CEID” method and enter the Primary Information manually.

Assigning The Work Order without CEID

2. Without CEID

Instead of entering the CEID, type **Generic** and press Enter.
After typing "Generic" and pressing Enter, only the Work Order (displayed in red) will appear, without the Pre-Loaded Asset Information, as shown in the image below.

Next, select the appropriate Project Type, such as FM, IT, or Biomed.
After selecting the type, manually enter the Primary Information and Caller Information as shown below.

Primary Information:

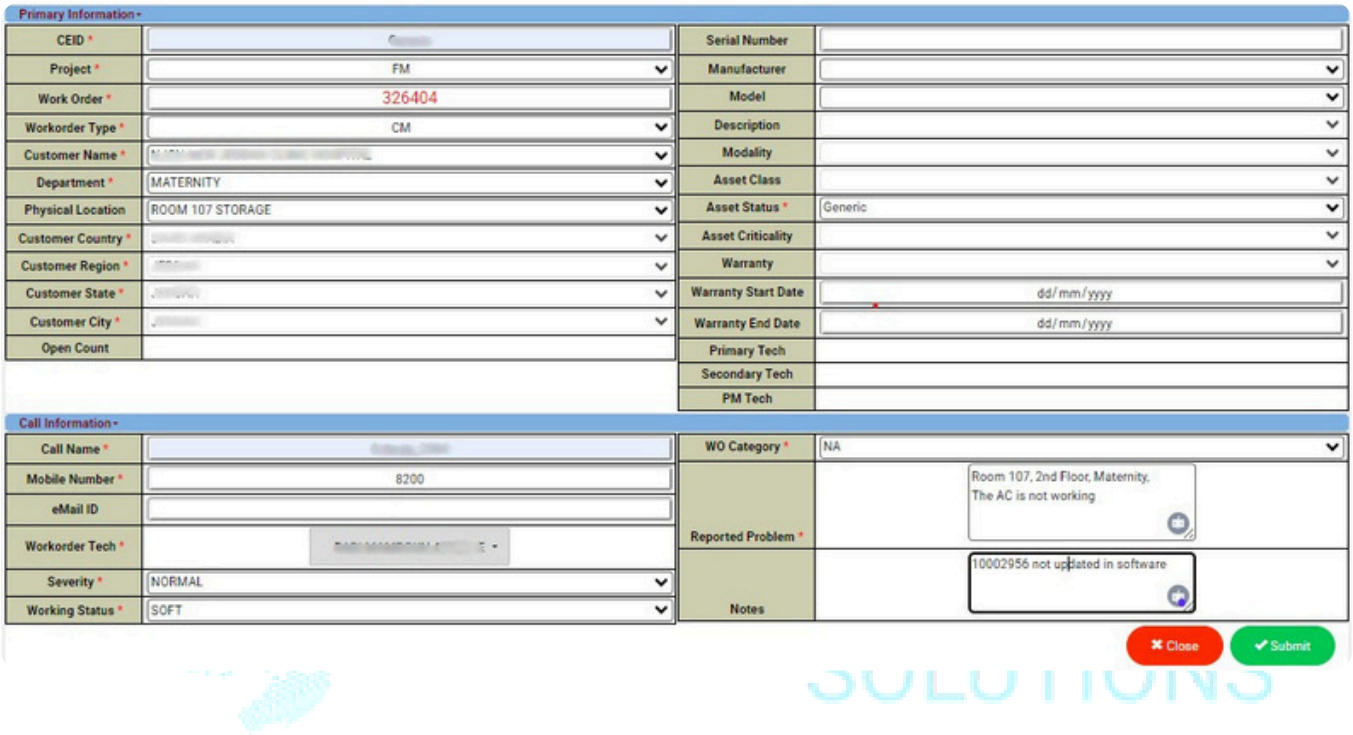

1. Hospital
2. Department
3. Floor / Room Number

Caller information:

a. Caller Name – Enter the name with or without the Caller ID.
b. Contact Number – Enter the Mobile Number or Extension Number.
c. Reported Problem – Enter the exact issue, along with the location details.
d. Notes – Enter any Additional Information related to the work order, if applicable.

New Work Order Submission

A sample image is shown below for your reference.

After filling in all the required information, click the Submit button to assign the Work Order.

After assigning the Work Order, the assigned technician will receive a notification message on their mobile device.
Based on this notification, the technician will proceed to handle the Work Order.

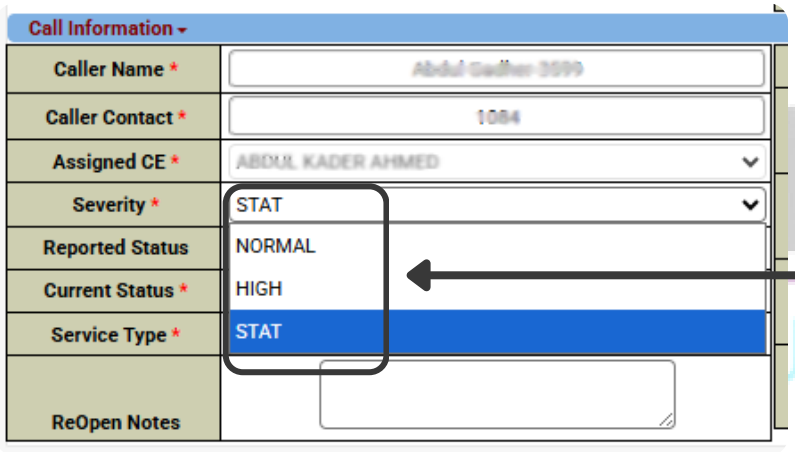

You have now successfully created a New Work Order.

Work Order Acknowledgement

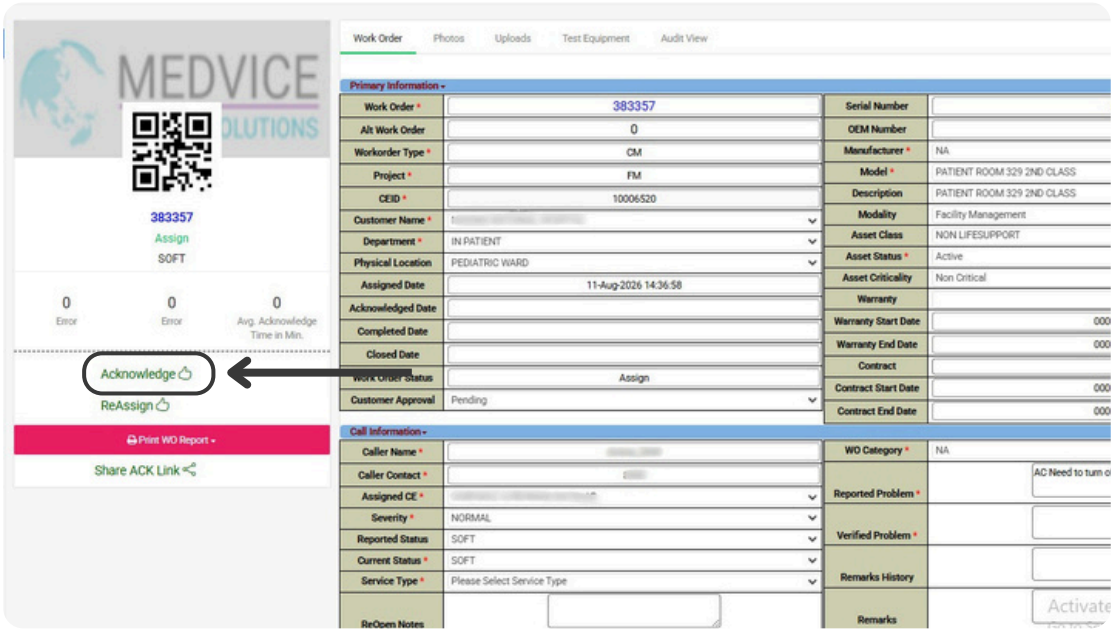

Work Order Acknowledgement

Work Order Acknowledgement Based on Severity

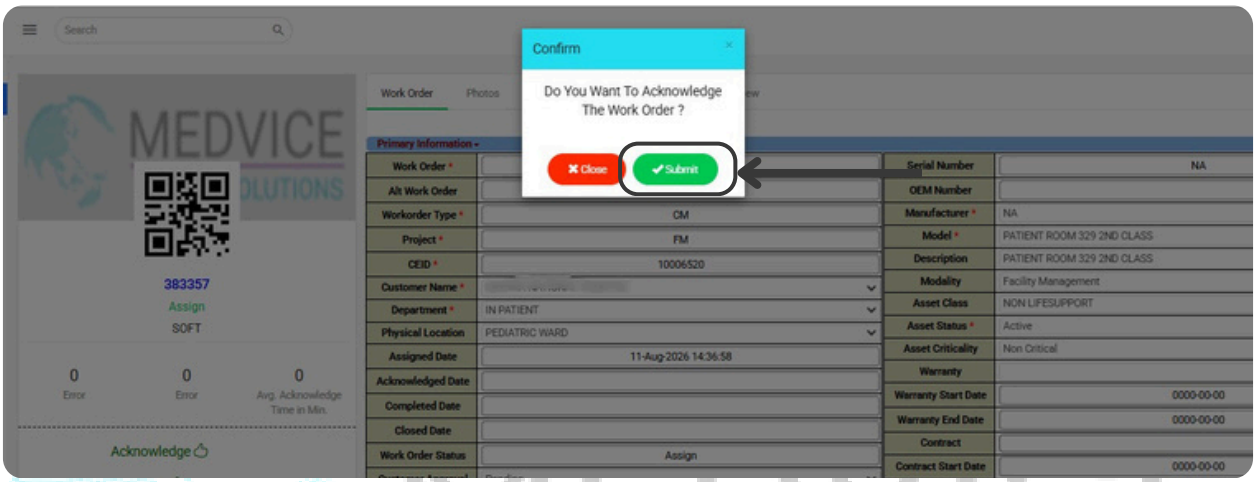

- **NORMAL:** Technician must acknowledge the Work Order within 60 minutes.
- **HIGH:** Technician must acknowledge the Work Order within 30 minutes due to higher priority.
- **STAT:** Technician must acknowledge the Work Order immediately / within 30 minutes as it represents a critical or emergency situation (acknowledge the Work Order immediately).

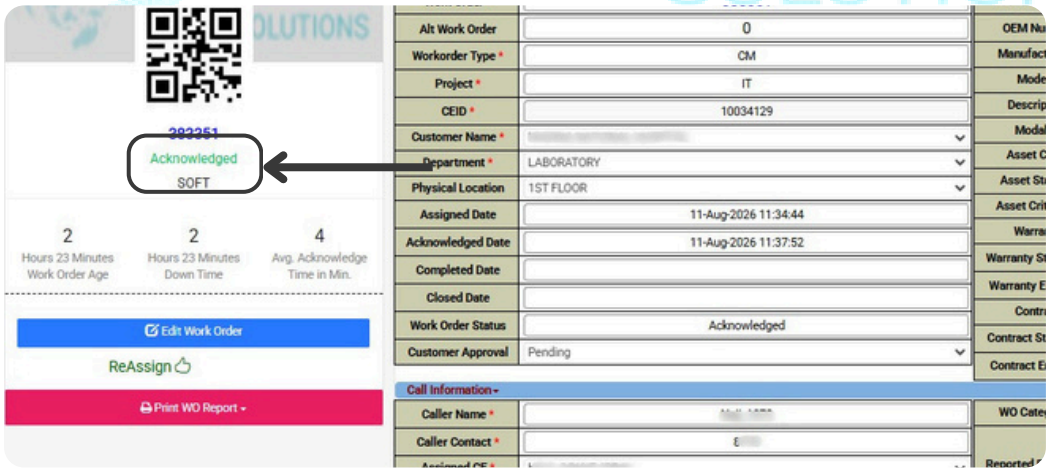

- After creating the CM Work Order, the Acknowledgement option will be displayed.
- Click Acknowledgement to acknowledge the Work Order.

- An Acknowledgement pop-up will appear.
- Click Submit in the pop-up.
- The Work Order will be successfully acknowledged.

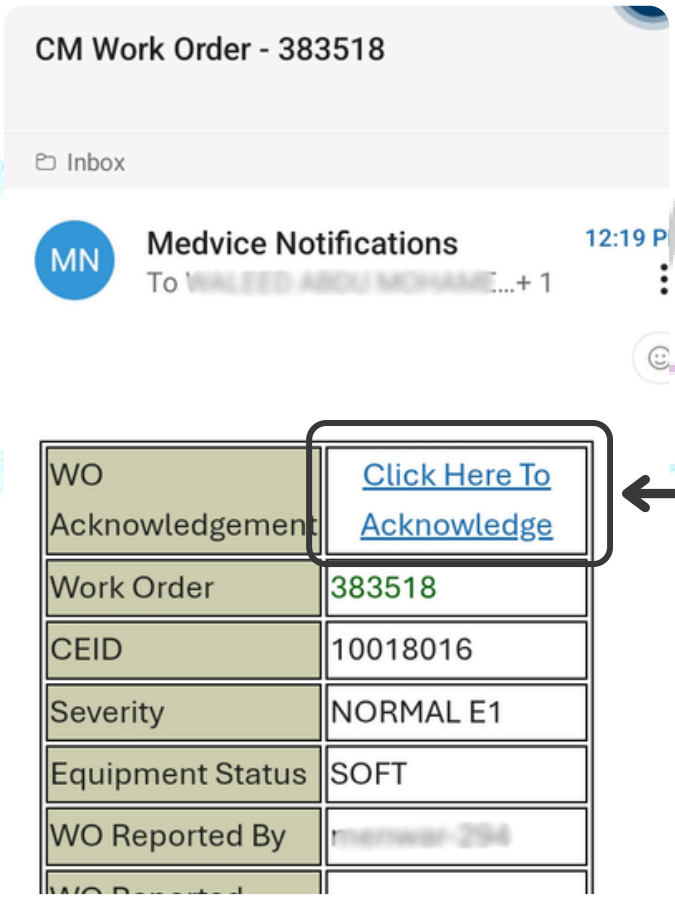

The Work Order has been successfully acknowledged through Insight.

Work Order Email Notification

- Once the Work Order is created, the assigned technician will also receive a notification via email within in 30 seconds
- They can view and acknowledge the Work Order directly from the email using their mobile phone, without needing to log in to Insight.

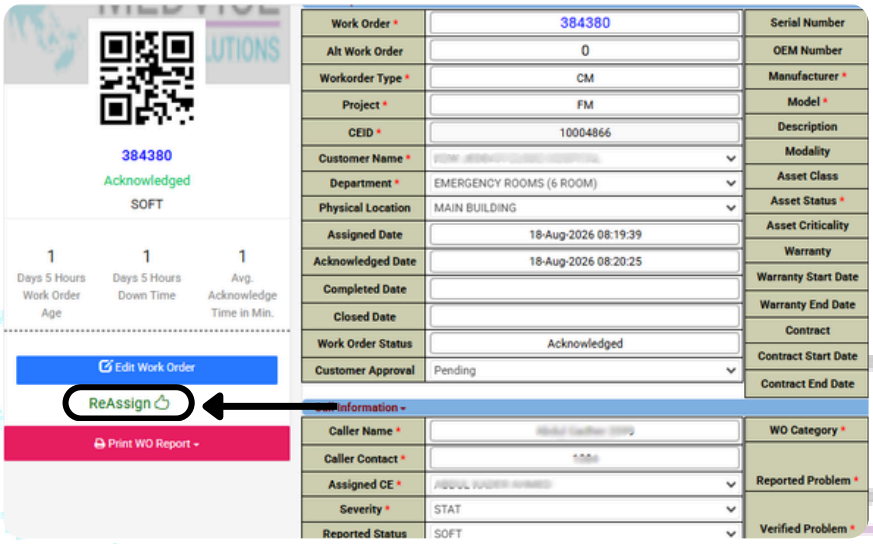

Reassigning Work Order

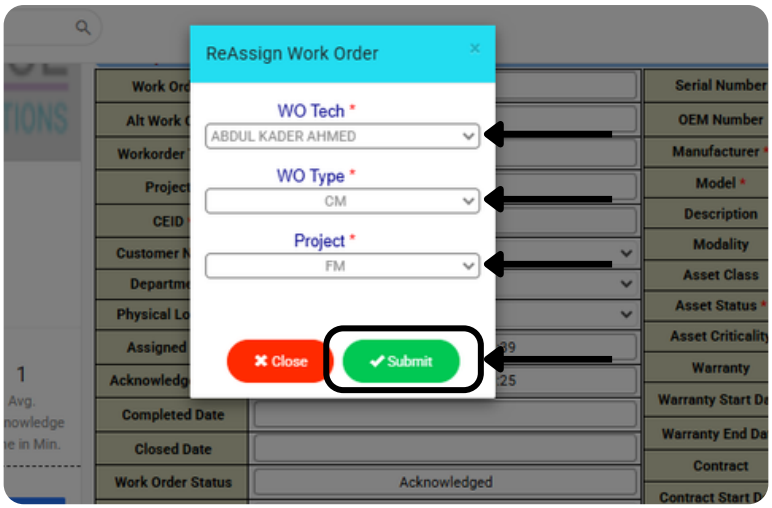

Reassign Work Order

If a Work Order has been assigned incorrectly for example, to the wrong Technician, Project, or Work Order Type, it can be reassigned with the appropriate details using the Reassign option.

- Open the Work Order that needs to be reassigned.

- Click Reassign, A popup will appear showing the current Technician, Project, and Work Order Type.
- Select the appropriate Technician, Project, and Type, verify the updated details, and click Submit to reassign the Work Order.

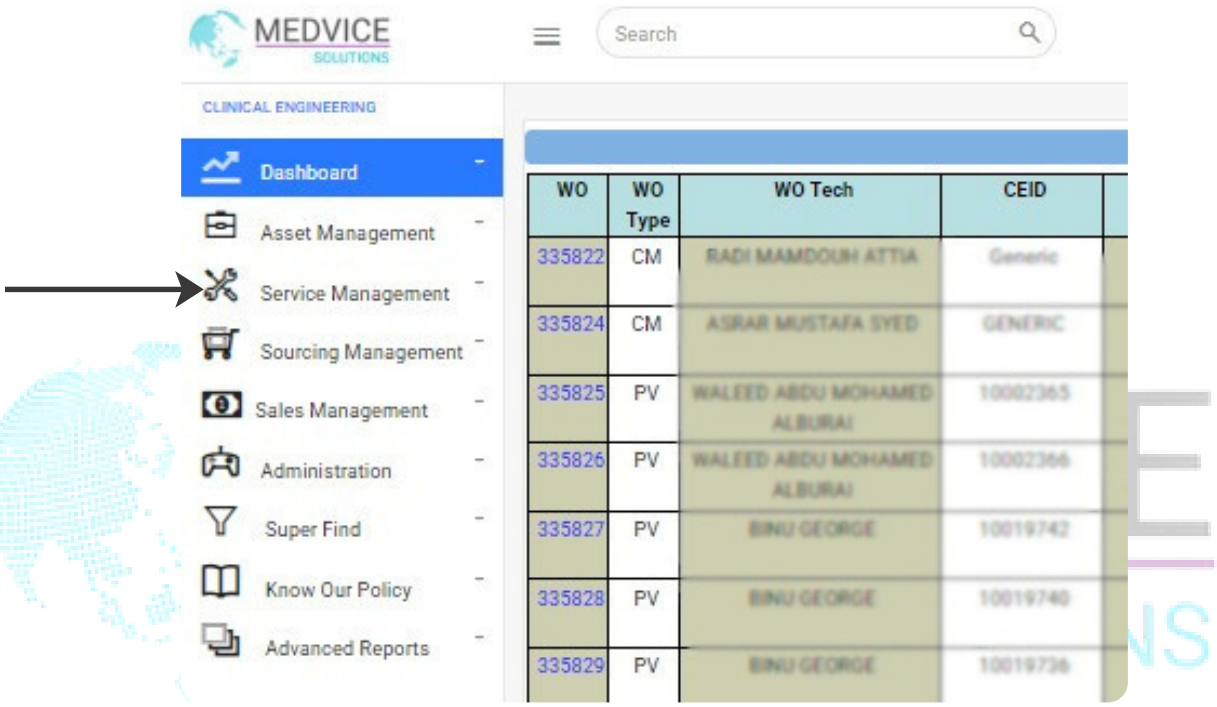

The Work Order has been successfully reassigned to the appropriate Technician, Project, and Work Order Type.

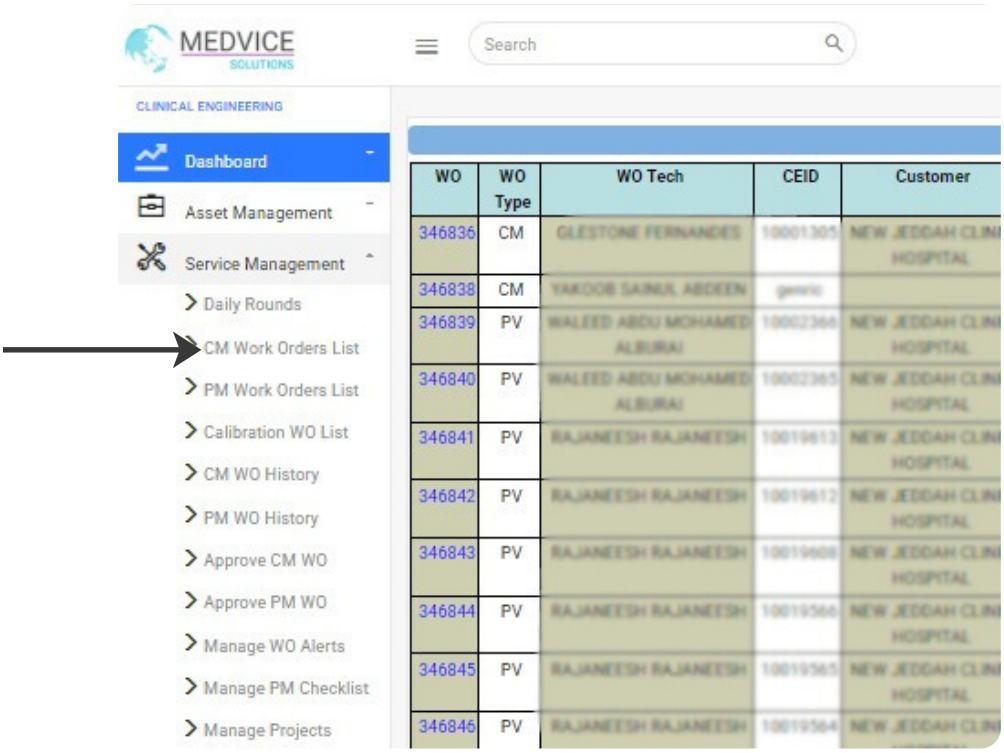

Completing CM Work Orders Without Part

Dashboard

After login, the Medvice Dashboard will appear, as shown in the image below.
Click on the “Service Management” tab.

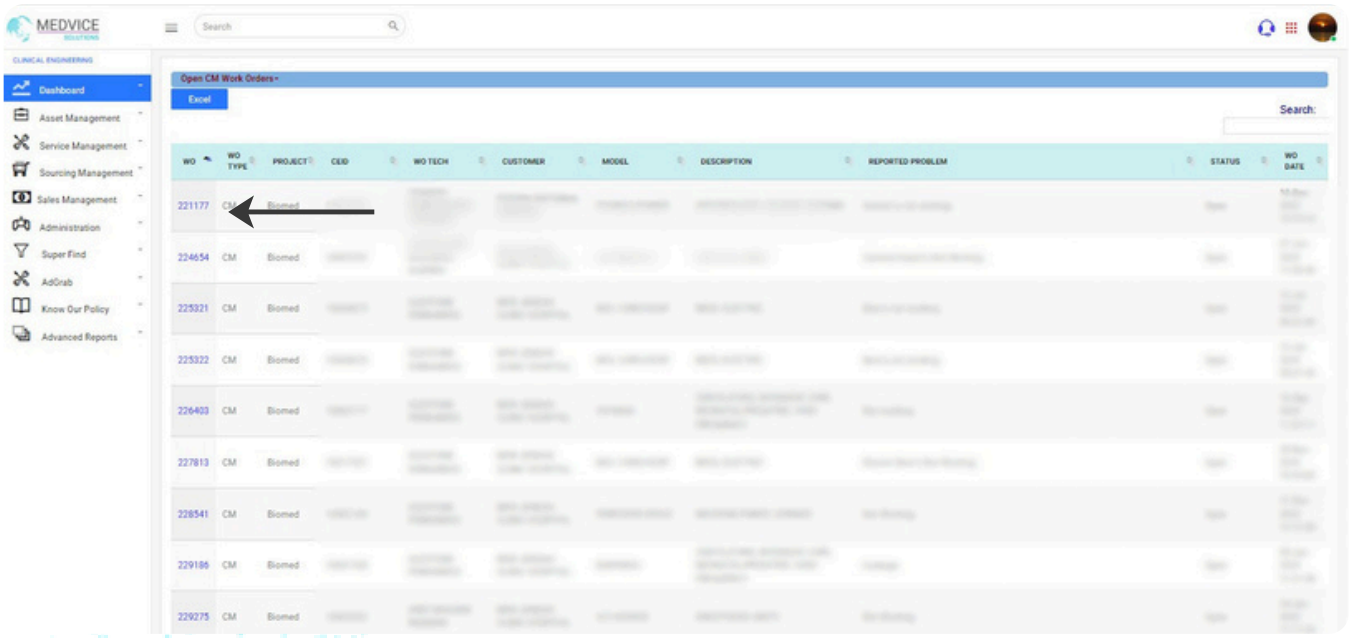

Under the Service Management section, select CM Work Orders List.

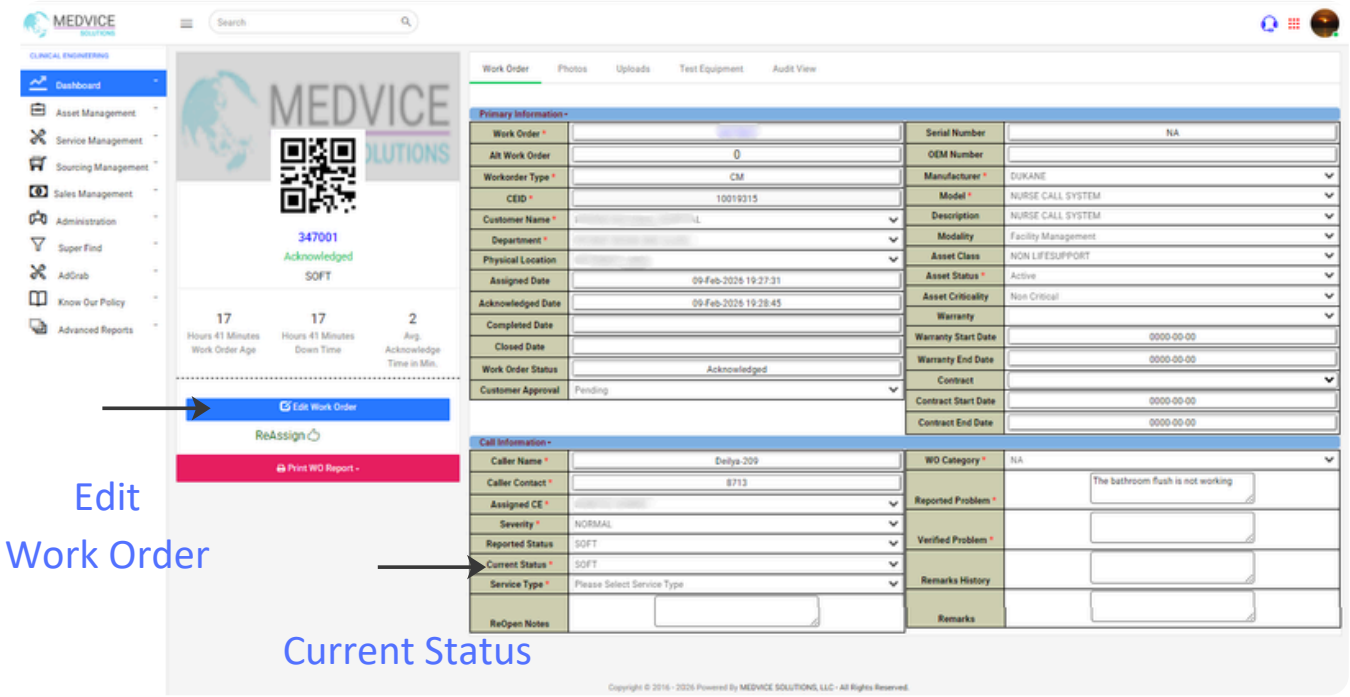

CM Work Orders List

After selecting the “CM Work Orders List” tab, the CM Work Orders page will appear, as shown in the image below.

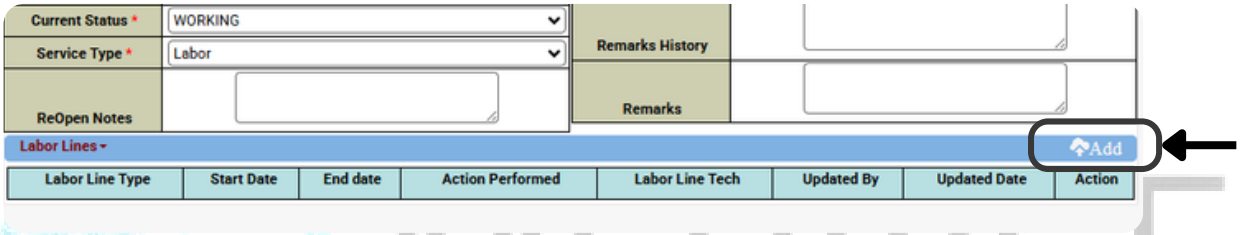

Then, click on the Respective Work Order Number located on the left side to open and view the detailed Work Order page shown in the image below.

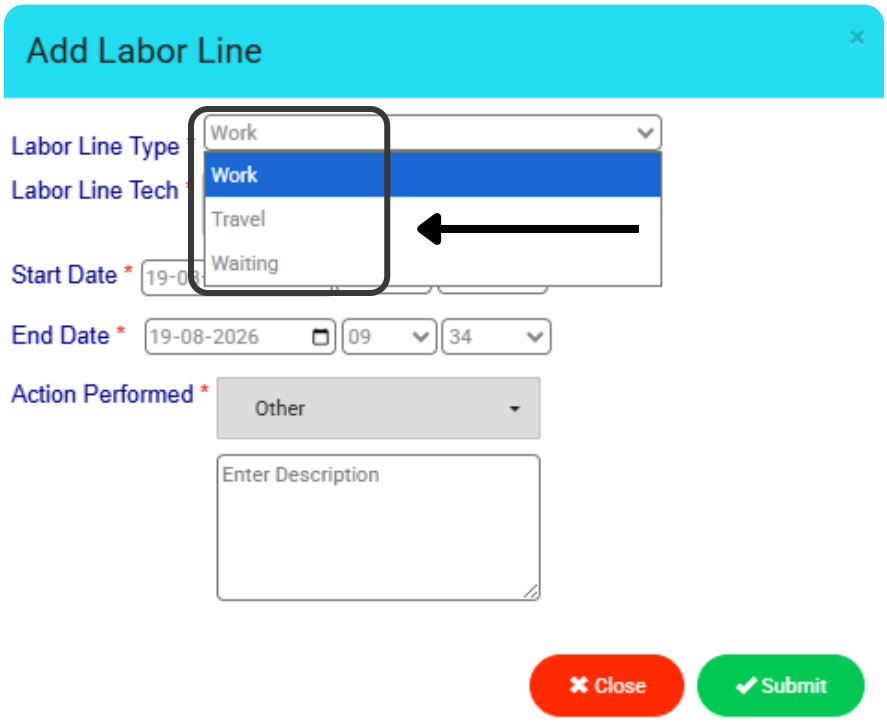

Add Labour line

If no Labour Lines are listed under the Caller Information section, click "Edit Work Order." In the Current Status field, select "Working." Once the status is updated, the Labour Lines section will be displayed.

Click the "Add" button. The "Add Labour Line" pop-up window will then appear.

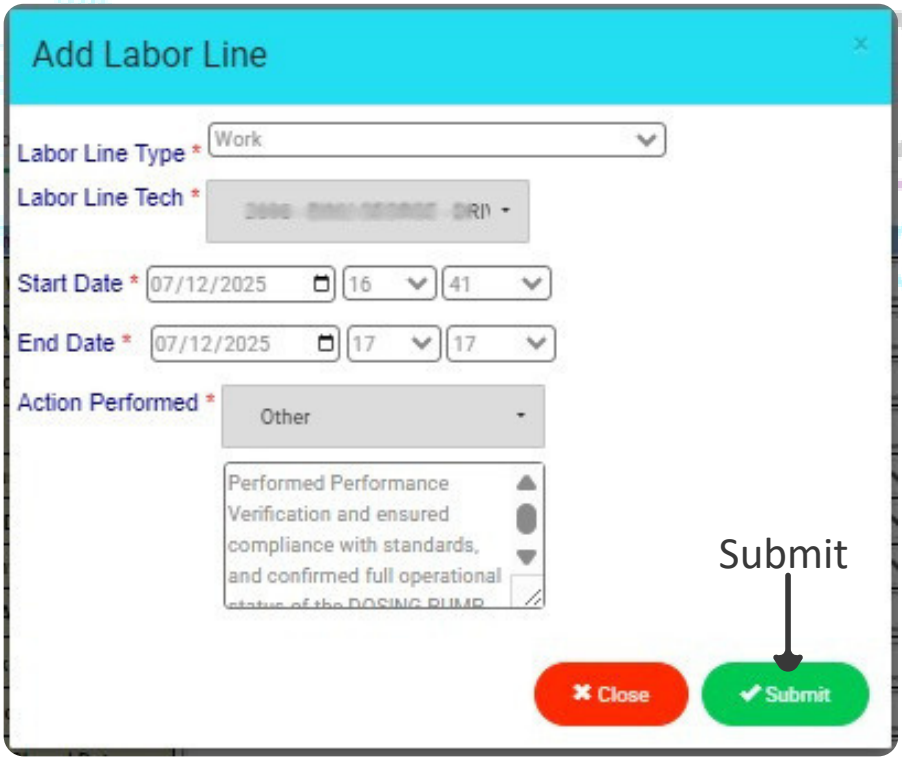

In this window, select the appropriate Technician, choose the relevant Date and Time, and select the appropriate Labour Line Type based on the technician's activity.

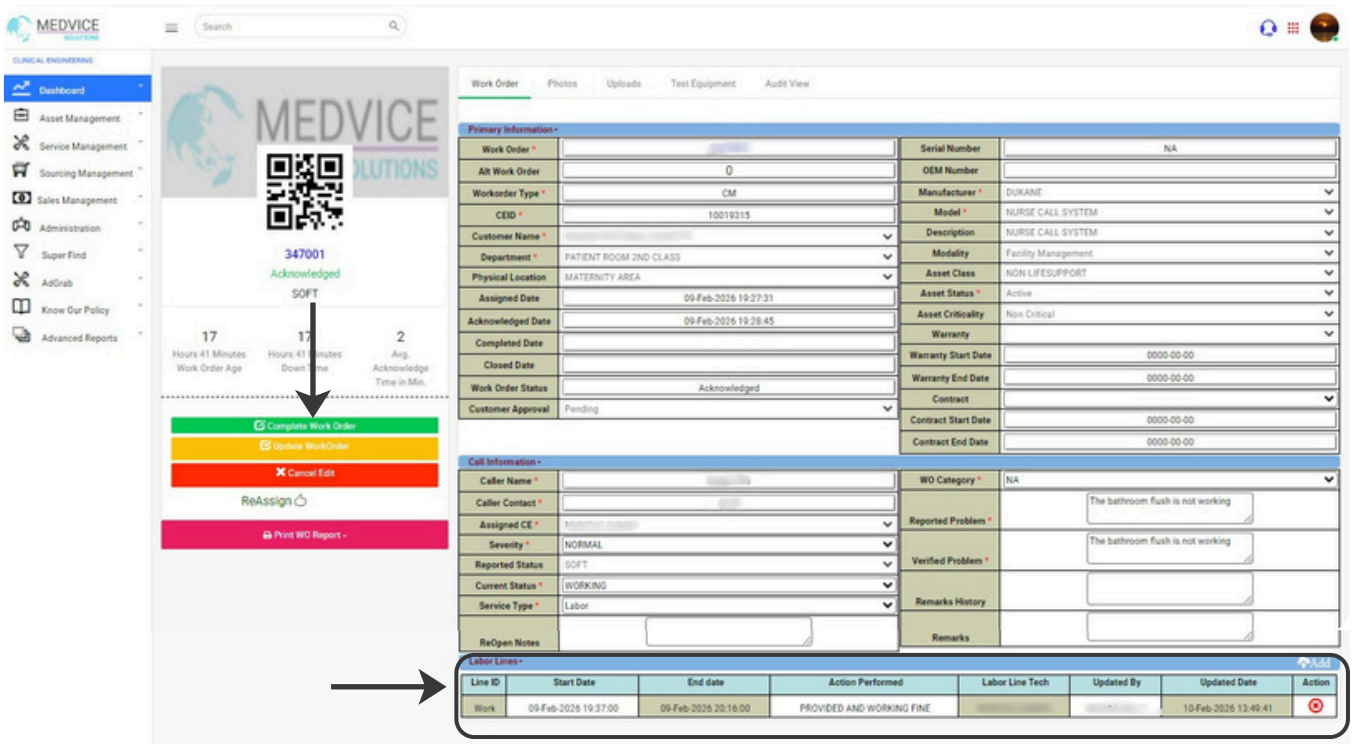

- **Work:** When the technician has reached the department / location and has started working on the equipment or Work Order.
- **Travel:** When the technician is travelling to the respective department / location to attend the equipment or Work Order and the actual work has not yet started.
- **Waiting:** When the technician is waiting for confirmation, permission, approval, equipment access, or any other required action before starting or continuing the work.

After adding the technician, the Labour Line section will be displayed.

Completing CM Work Order

To complete the Work Order, click the “Complete Work Order” button. A confirmation pop-up window will appear. Click “Submit” to successfully complete the Work Order, as shown in the images below.

After completing the work order, proceed to Approve the work order. Closing a work order can only be performed by authorised users, such as relevant Managers, Engineers, or Department Heads.

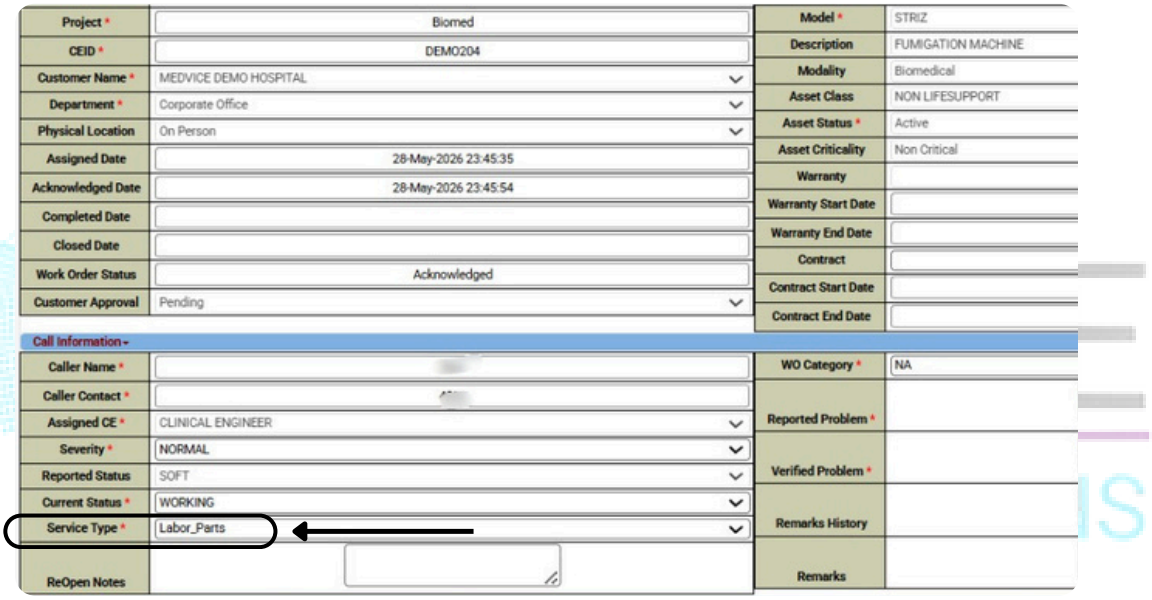

MEDVICE SOLUTIONS

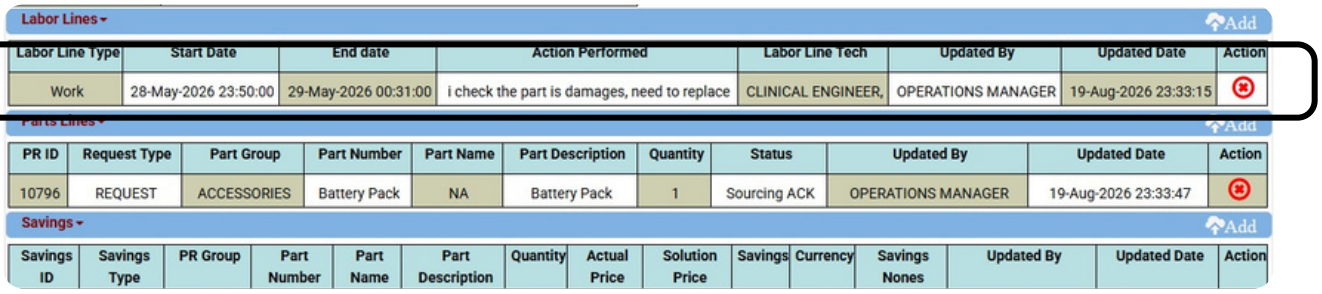

Completing CM Work Orders With Part

Work Orders With Part

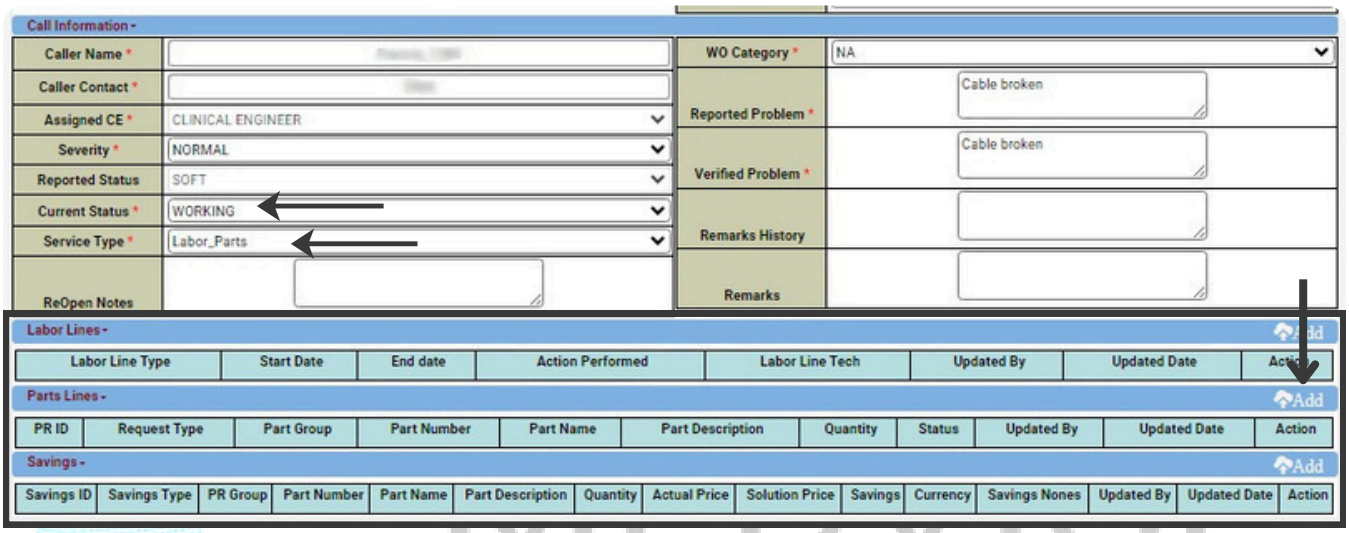

Select the respective Work Order (WO) for which the Part Request needs to be raised. Select “Labour Parts” as the Service Type. In the Labour Line section, add the required parts.

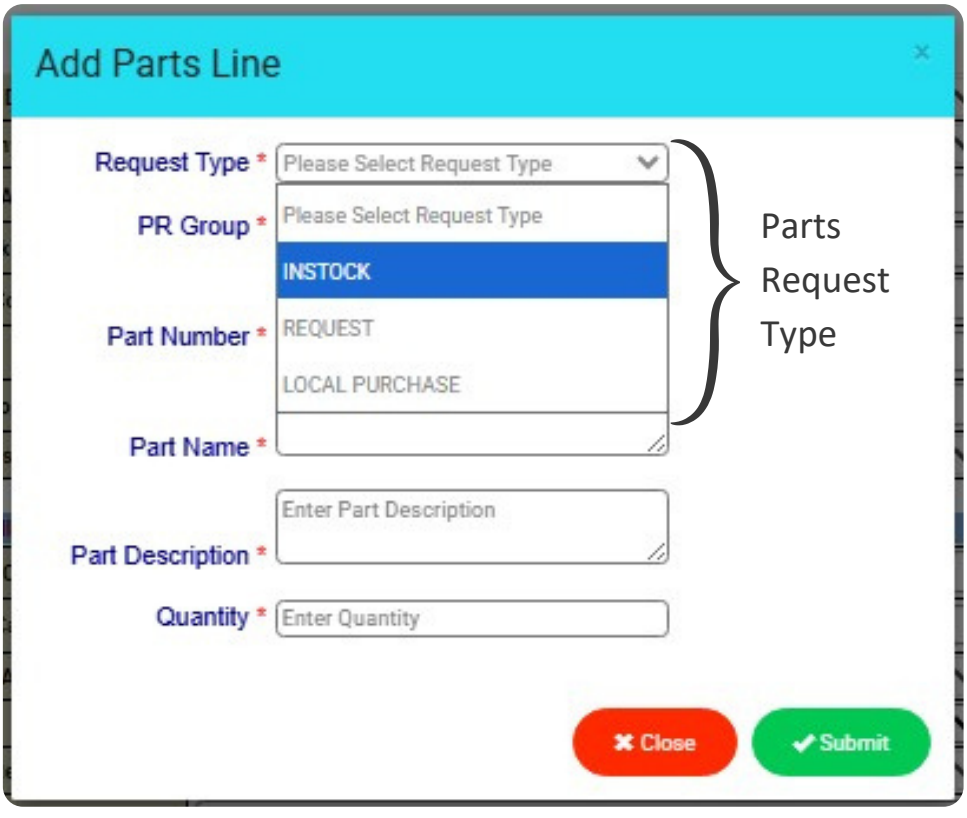

1. Add the first Labor Line when requesting the required part, before the technician starts the work.

2.After selecting the required fields, the Labour Lines and Part Lines sections will be displayed, as shown in the image below.

To add a new part, click the "Add" button in the Part Lines section.
A pop-up window will appear, allowing you to enter the required part details.

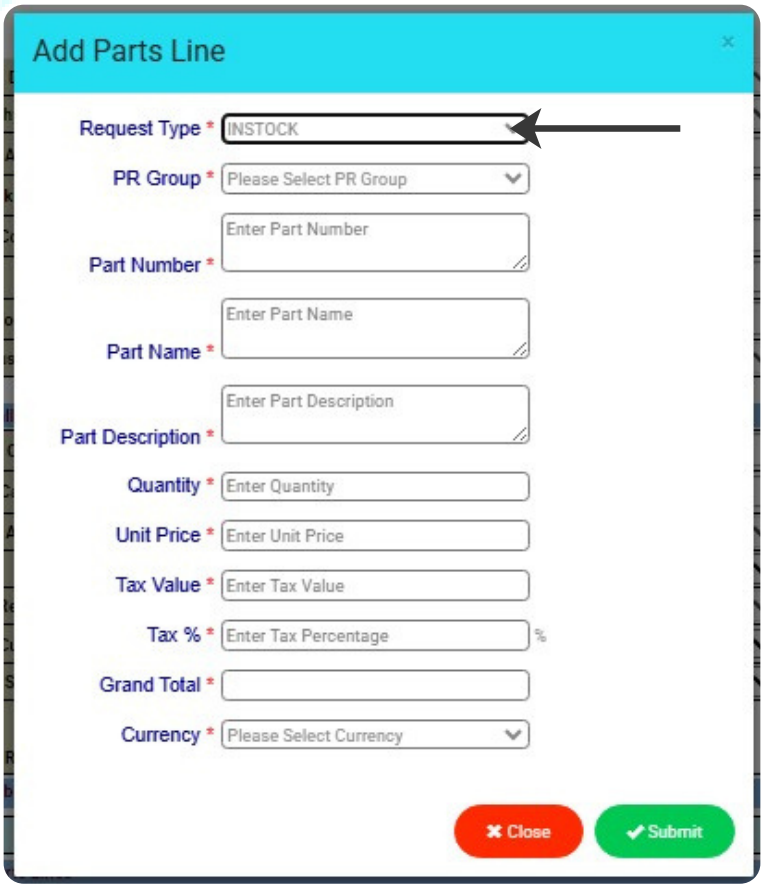

Requesting Parts Lines

Choose the appropriate Request Type based on your requirements. Each of the three request types serves a different purpose and follows a specific workflow. The following sections explain the criteria and process for each request type in detail.

1. InStock
2.Local Purchase
3. Request

1. InStock

If the required part is available in stock, select the In Stock option and use the available part to complete the work order. No additional part request is required. After replacing the part, ensure that the part details are added to the Part Lines section before completing the work order.

MEDVICE SOLUTIONS

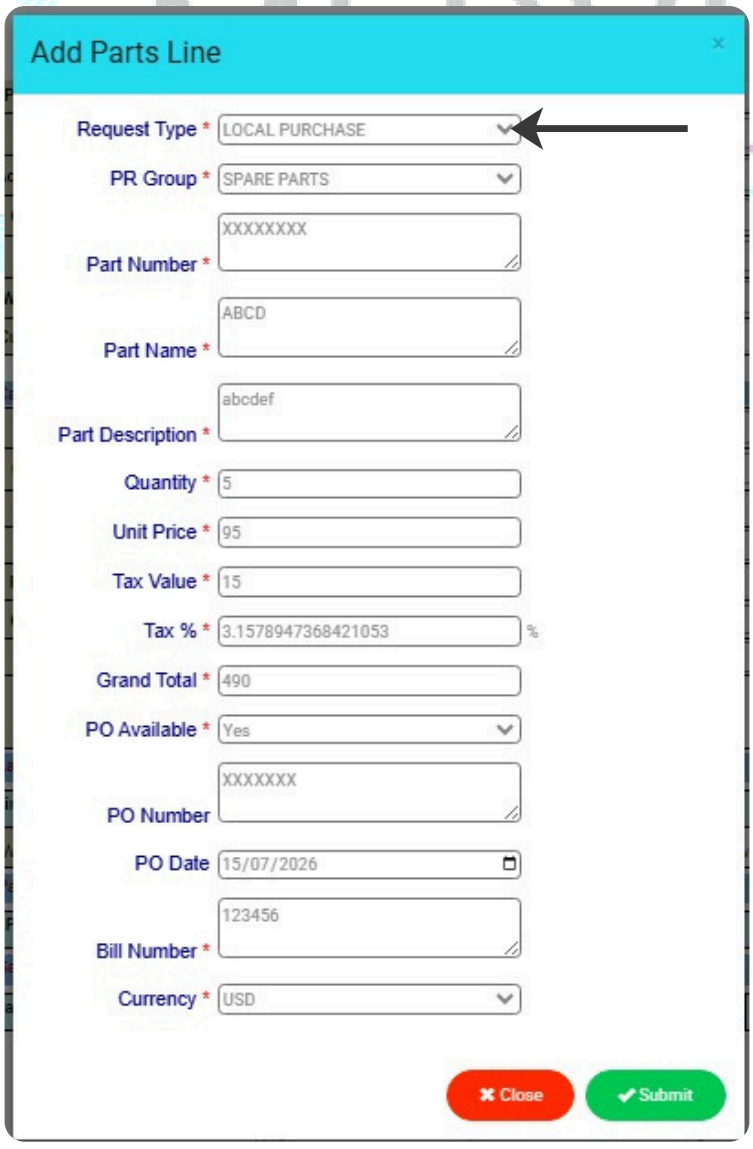

InStock, Local Purchase & Request

2. Local Purchase

If the required part is not available in stock, procure it through a Local Purchase from a nearby supplier or vendor. After purchasing the part, obtain the purchase invoice from the supplier.

Next, select the “Local Purchase” option and enter all the required details in the pop-up window, including Part Name, Quantity, Unit Price, Taxes, Invoice Details, and any other mandatory fields.

After entering all the required information, click “Submit” and proceed with completing the Work Order.

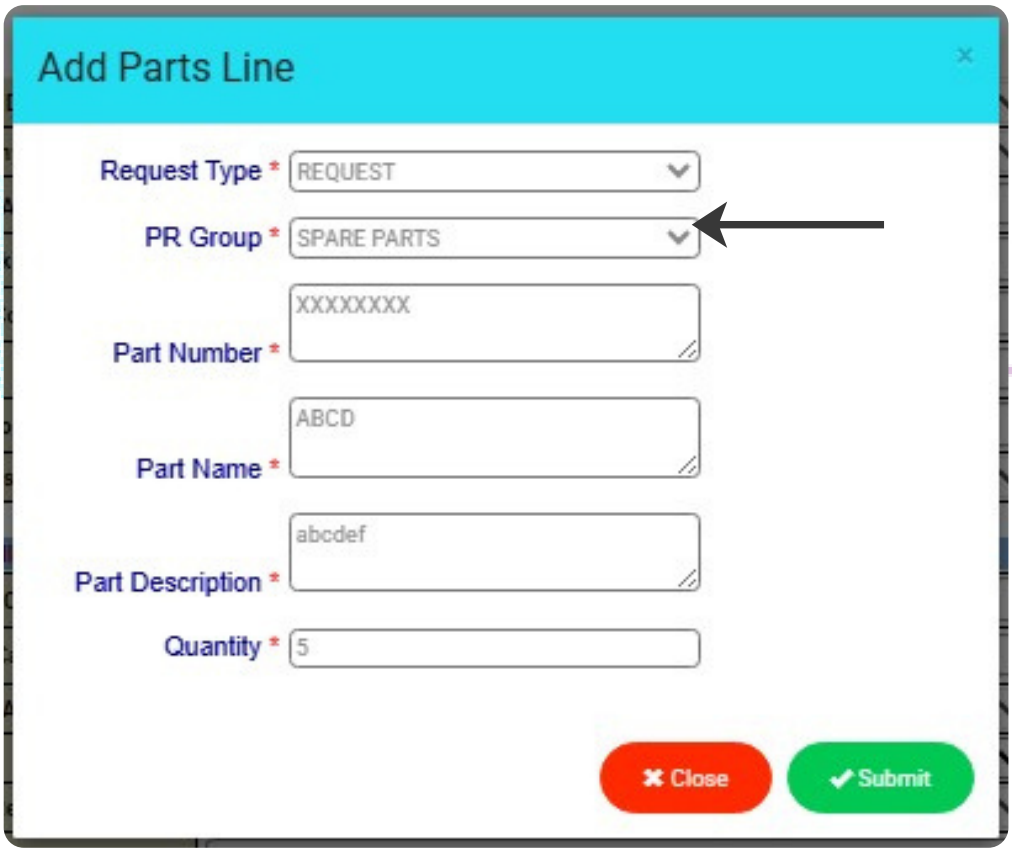

MEDVICE SOLUTIONS

Reuqest Pop-Up

3. Request

If the required part is not available through either In Stock or Local Purchase, the technician must create a Part Request by providing all the required information.

MEDVICE SOLUTIONS

Request Email

Work Order	372399
CEID	DEMO220
Severity	NORMAL E1
WO Reported By	Francis_1286
WO Reported Contact	2964
City	Henderson
Customer Group	Medvice Solutions LLC
Customer	MEDVICE DEMO HOSPITAL
Department	RADIOLOGY DEMO
Physical Location	DEMO ROOM
Manufacturer	BIBBY SCIENTIFIC
Model	SA8
Description	MIXERS, BLOOD BANK, DONOR BLOOD
Serial Number	4552155
WO Date	19-Jun-2026 00:12:16 PST
WO Tech	CLINICAL ENGINEER
Reported Problem	Cable broken

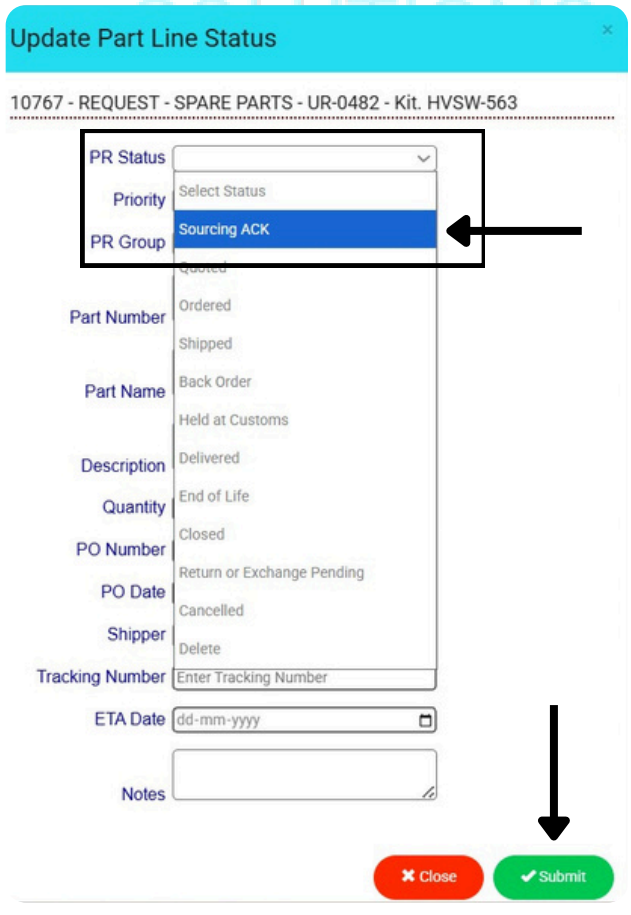

Part Line ID	Request Type	Part Group	Part Number	Part Name	Part Description	Quantity	Status	Requested By	Requested Date
10603	REQUEST	SPARE PARTS	XXXXXXXX	ABCD	abcdef	5	Requested	OPERATIONS MANAGER	15-Jul-2026 00:23:57

Once the request is submitted, it will be sent to Supply Chain / MEDVICE Solutions for processing. A notification regarding the Part Request will be sent to the respective email address, as shown in the image.

Once the request has been processed, navigate to Sourcing Management and select “RFQ List.” Locate the respective Work Order (WO) for which the Part Request was raised, and select the “Update” option.

Acknowledge the Work Order by changing its status to Sourcing Ack and click Submit.

Once submitted, the Work Order status will be updated to Sourcing Ack, indicating that the sourcing request has been acknowledged and the process has moved to the next stage.

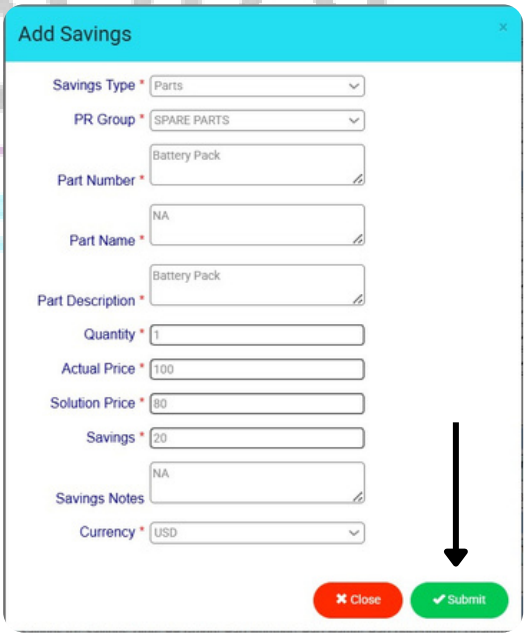

3.Savings refers to the cost saved by purchasing an asset or part at a price lower than its original or expected price.

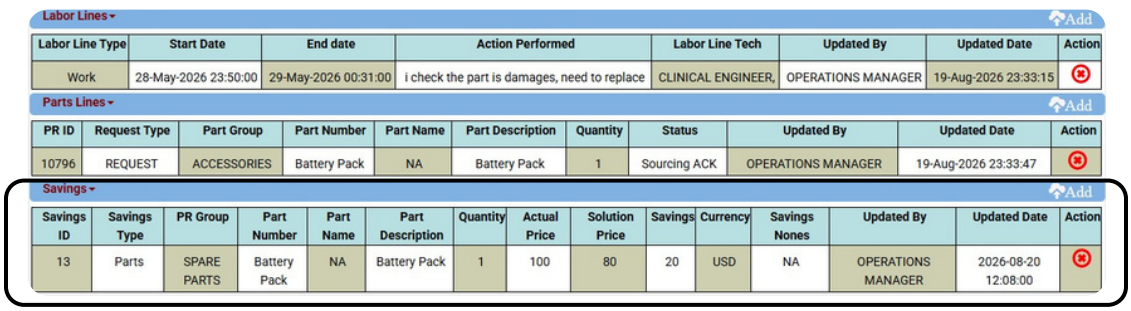

Savings is the amount saved when an asset or part is purchased below its original or expected price. For example, if an asset costs ₹100 but is purchased for ₹80, the savings is ₹20.

In Savings. Click Add and a pop-up window will appear, where you can enter the required savings details.

Select the Savings Type from the drop-down and enter the required details, including PR Group, Part Number, Part Name, Quantity, Actual Price, Solution Price, Savings, Notes, and Currency. Click Submit to save the details. The entered savings information will then be available for review.

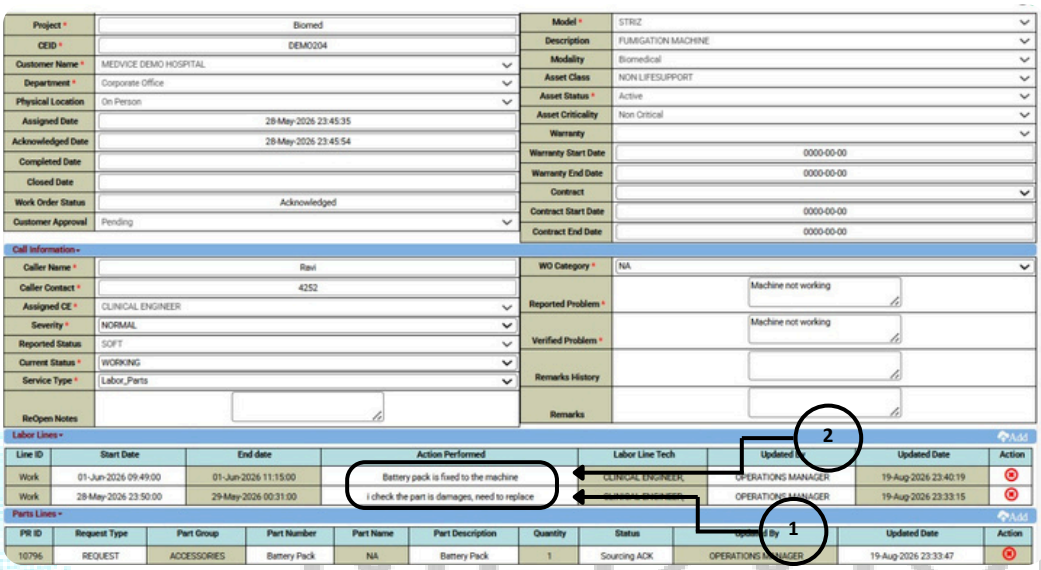

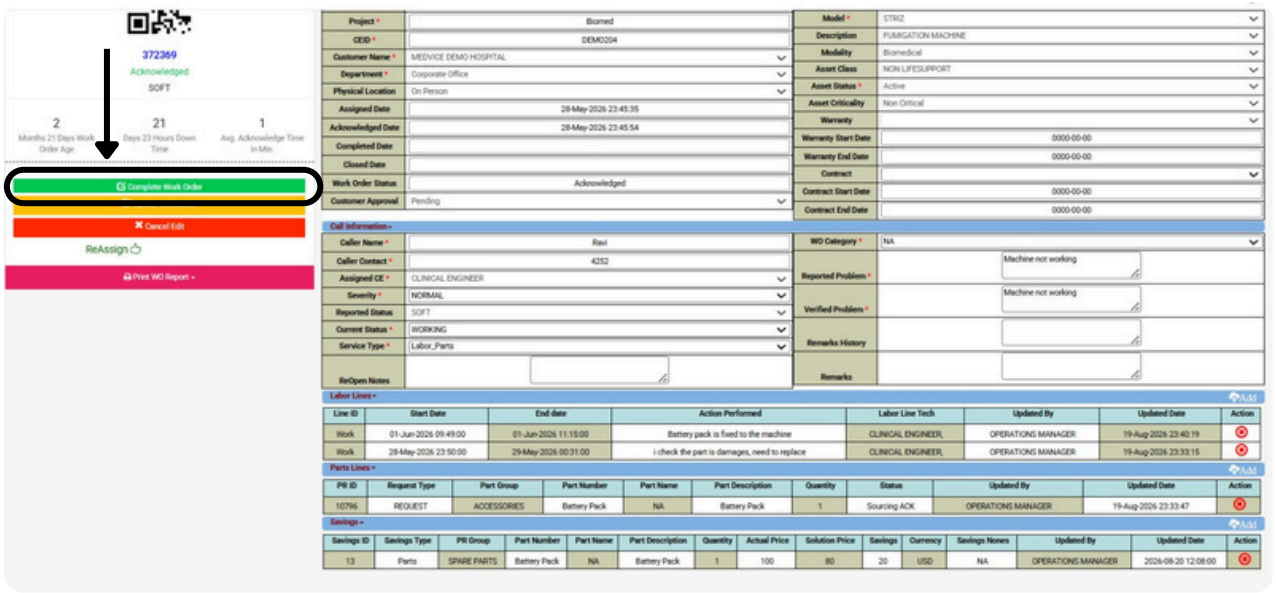

Once the requested part has been received and the work has been completed, add the second Labor Line to record the completed work.

MEDVICE SOLUTIONS

Once the requested part has been received and the work has been completed, add the second Labor Line to record the completed work along with the remarks describing the work performed.

Once all details have been verified, including the Labor Lines, part price, all details about the part, every detail of the part, and Part Lines, click the Complete button to successfully complete the Work Order.

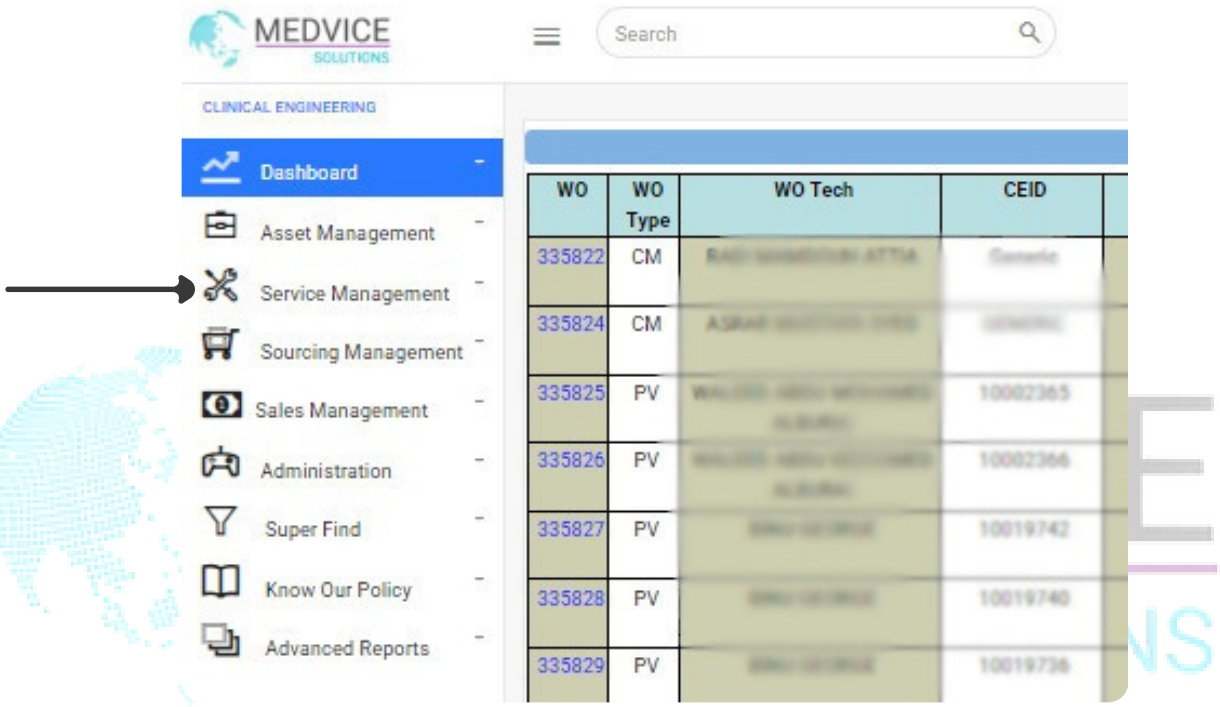

The Work Order has been successfully completed with the required parts added.

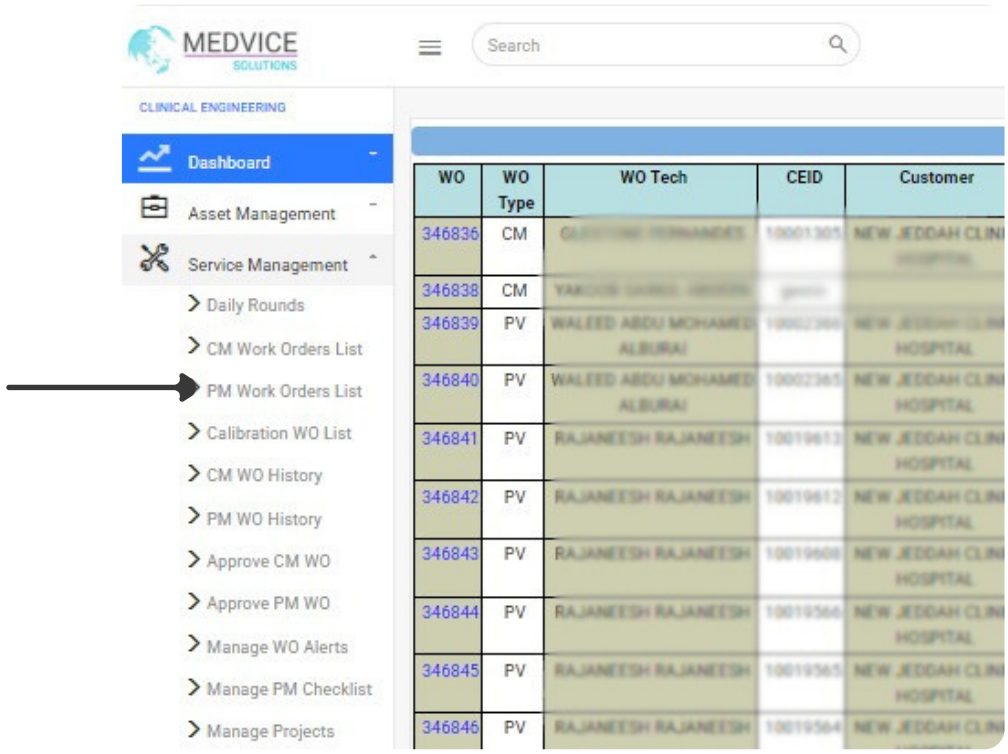

Completing PM Work Orders

Dashboard

After login, the Medvice Dashboard will appear, as shown in the image below.
Click on the “Service Management” tab.

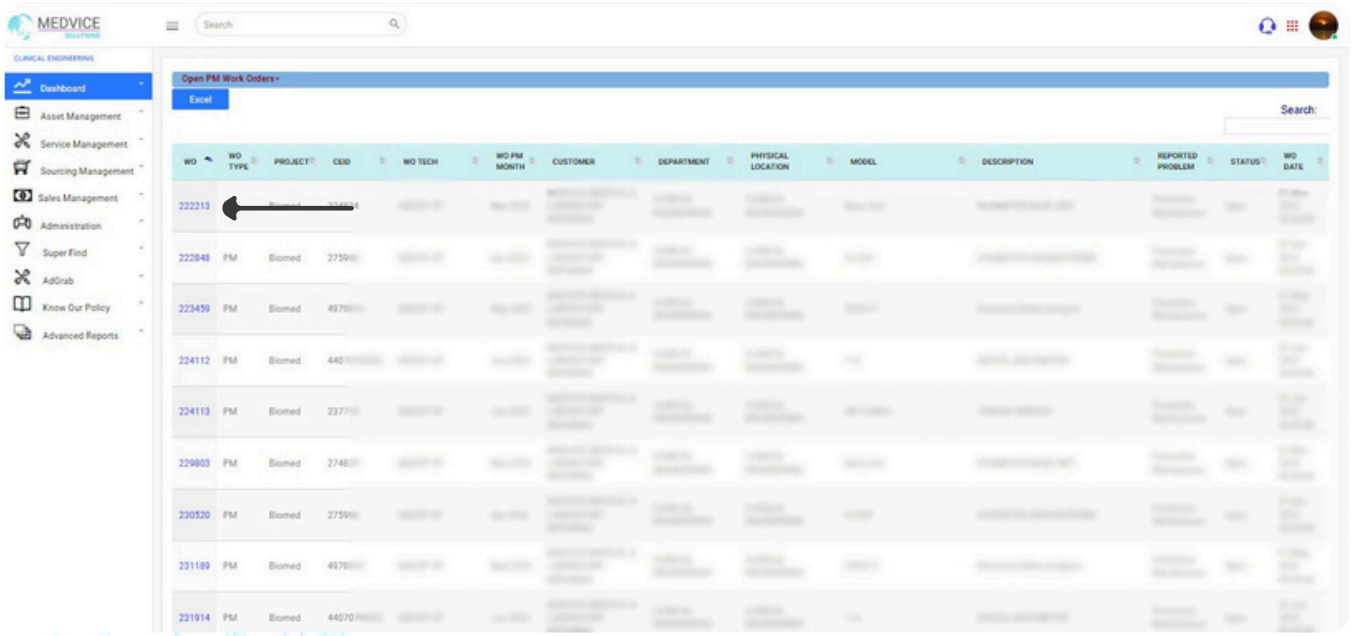

Under the Service Management section, select PM Work Orders List.

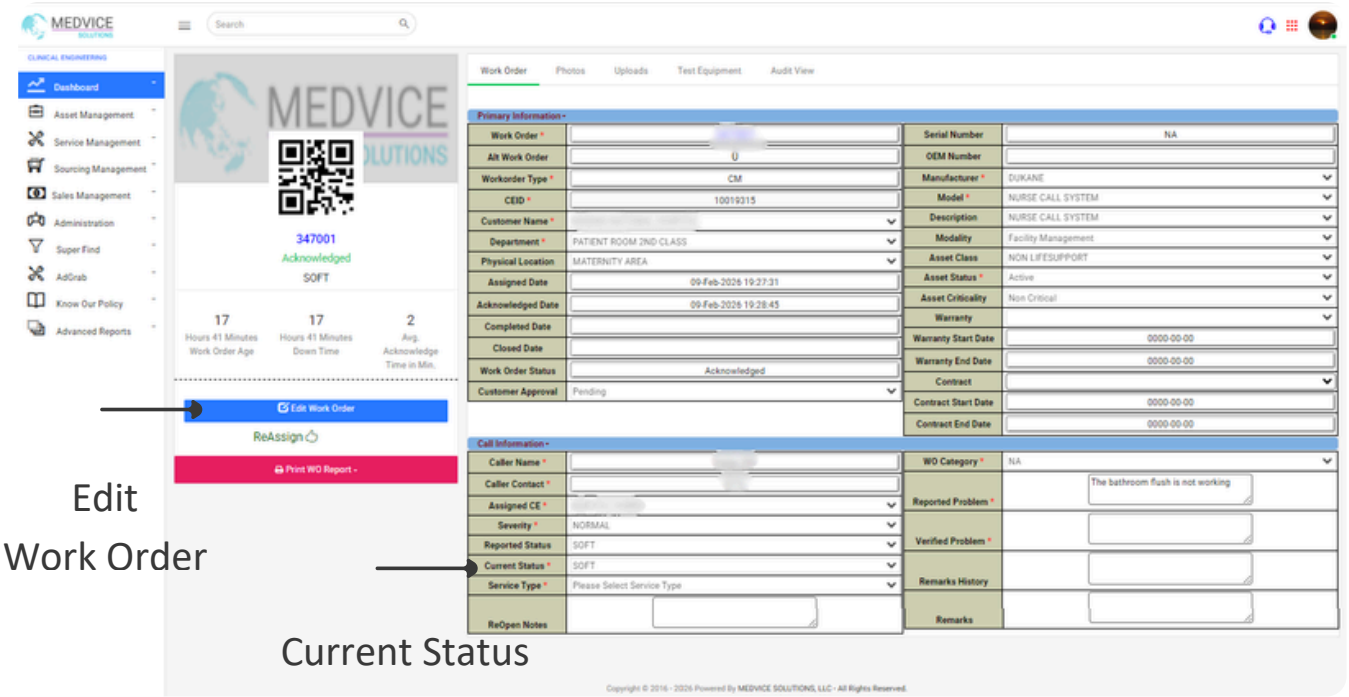

PM Work Orders List

After selecting the PM Work Orders List tab, the PM Work Orders page will appear as shown in the image below.

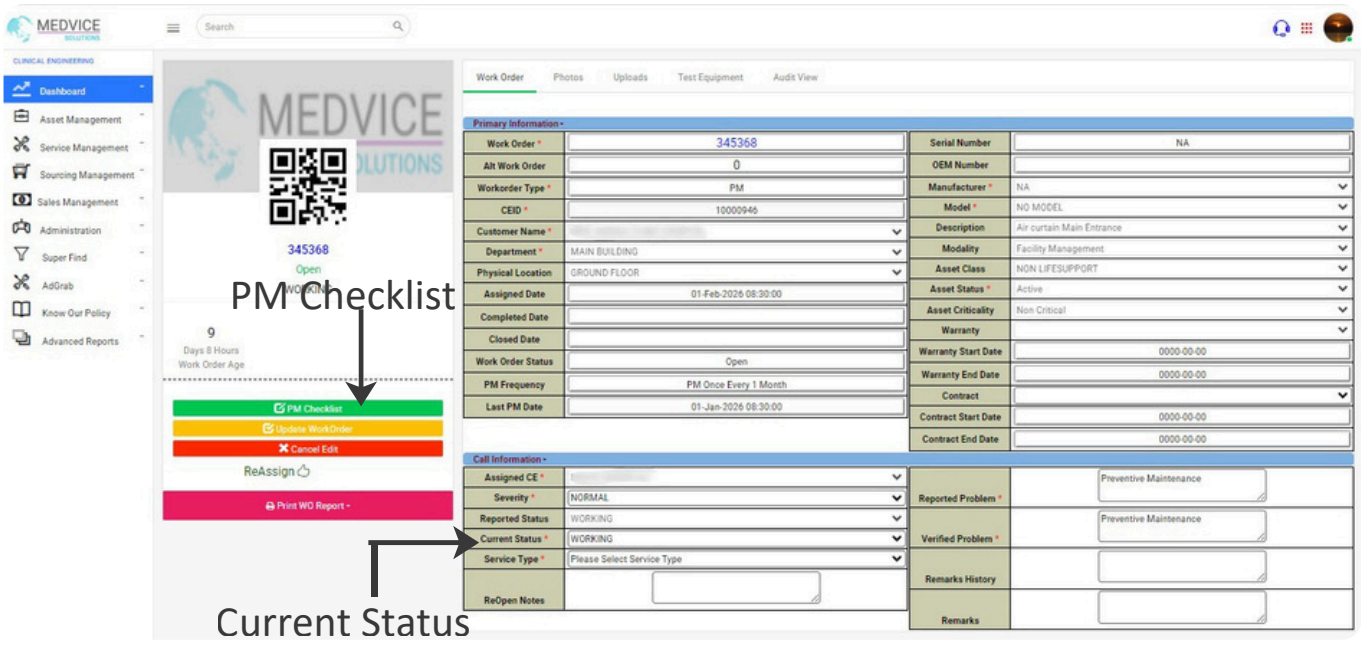

Then, click on the Respective Work Order Number located on the left side to open and view the detailed Work Order page shown in the image below.

PM Work Orders List

Click “Edit Work Order.” The “PM Checklist” button will be displayed above the “Update Work Order” option, as shown in the image below.

First, add the Labour Details. After adding the Labour Details, proceed to add the PM Checklist.

If no Labour Lines are listed under the Caller Information section, change the Current Status to “Working.” Once the status is updated, the Labour Lines section will be displayed.

Click the “Add” button. The “Add Labour Line” pop-up window will appear.

In this window, select the appropriate Technician, choose the relevant Date and Time, and select the appropriate activity in the “Action Performed” field, as shown in the image below. Then, click “Submit” to add the Labour Details.

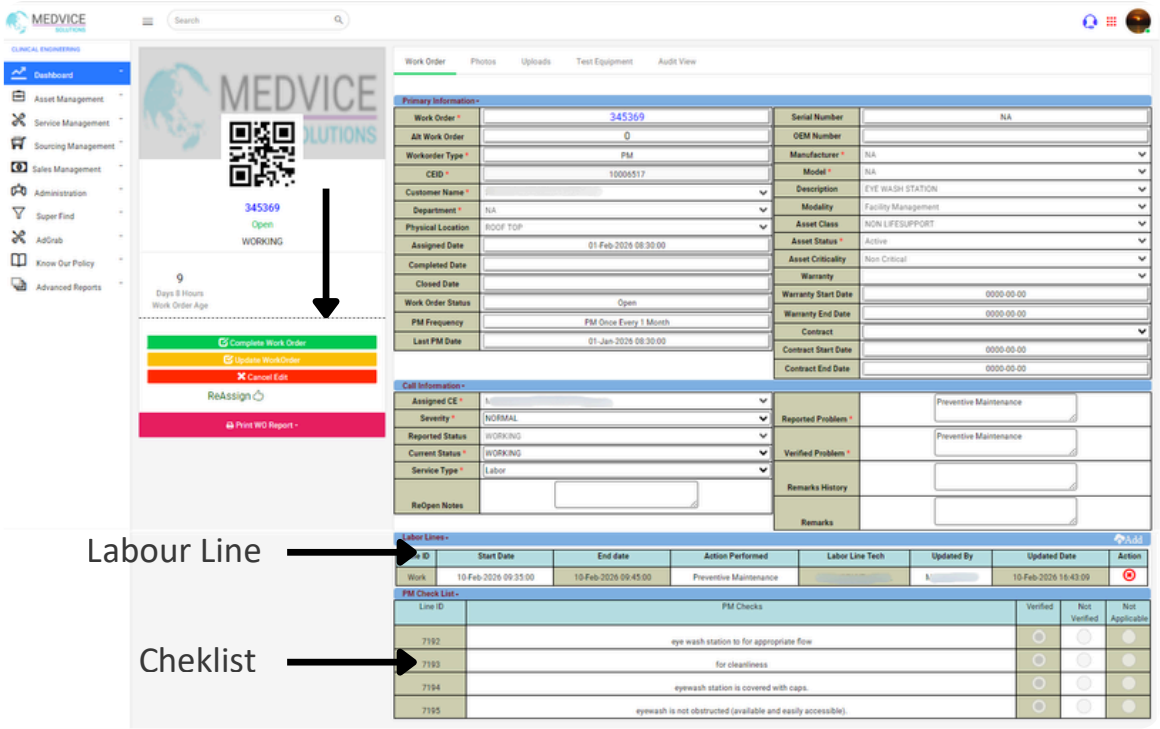

Add Labour line

After that, click the “PM Checklist” button to add the checklist. A pop-up window will appear. Select the Verified Problems and click “Submit.”

Once the Technician, Action Performed, and PM Checklist are added, the Labour Line and PM Checklist sections will be displayed.

To complete the Work Order, click “Complete Work Order.” A confirmation pop-up will appear. Click “Submit” to successfully complete the Work Order, as shown in the images below.

Completing PM Work Order

After completing the work order, proceed to Approve the work order. Closing a work order can only be performed by authorised users, such as relevant Managers, Engineers, or Department Heads.

MEDVICE
SOLUTIONS

Note:-

The PM duration varies for each equipment based on its type, maintenance requirements, and the procedures specified by the OEM advisory. Each device may have a different duration depending on the number of checks, inspections, servicing activities, and other tasks required to complete the PM.

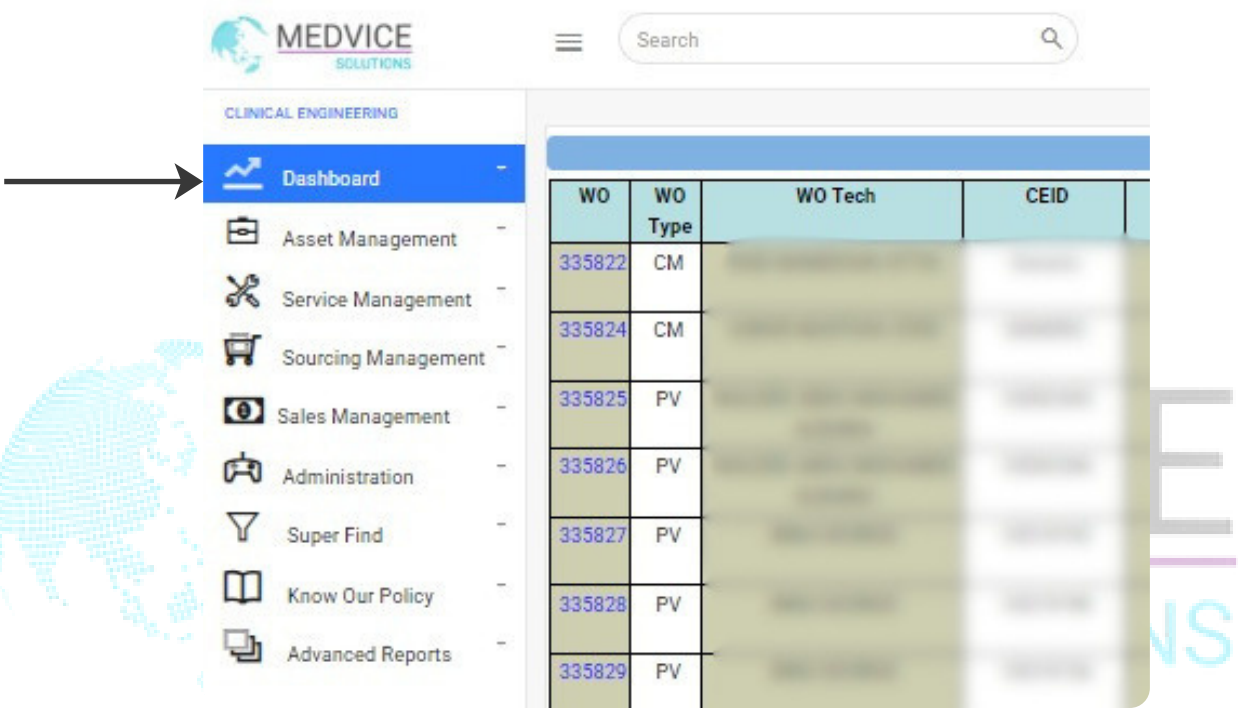

You have now successfully Completed the PM Work Orders.

MEDVICE
SOLUTIONS

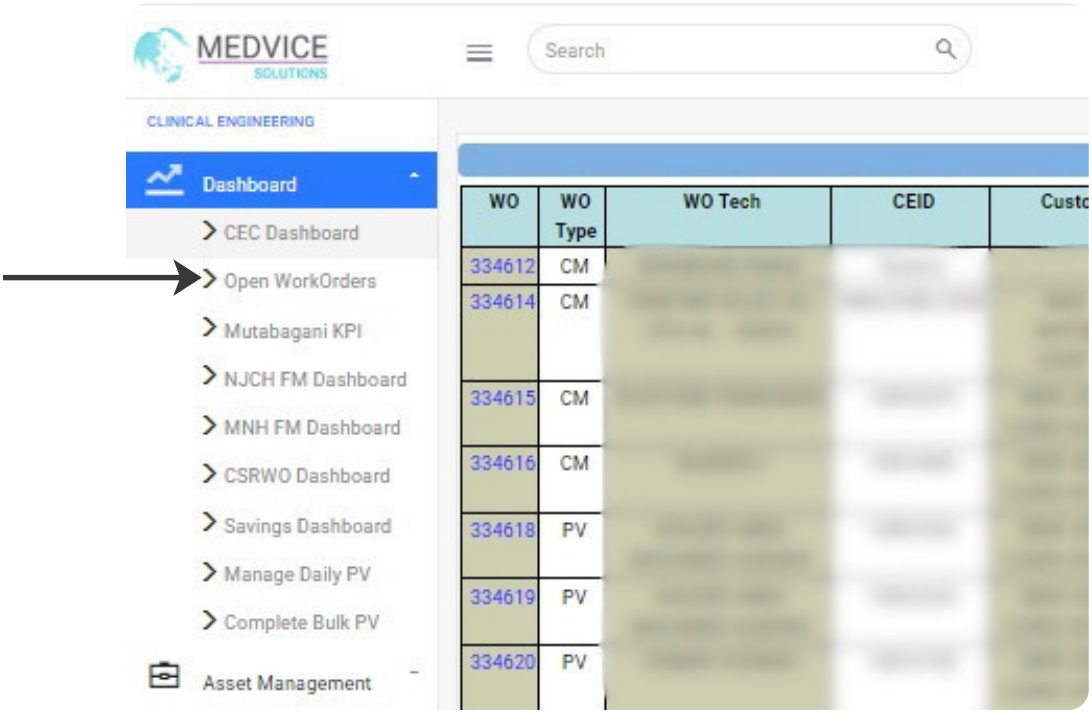

Completing PV calls

Dashboard

After login, the Medvice Dashboard will appear, as shown in the image below. Click on the “Dashboard” tab.

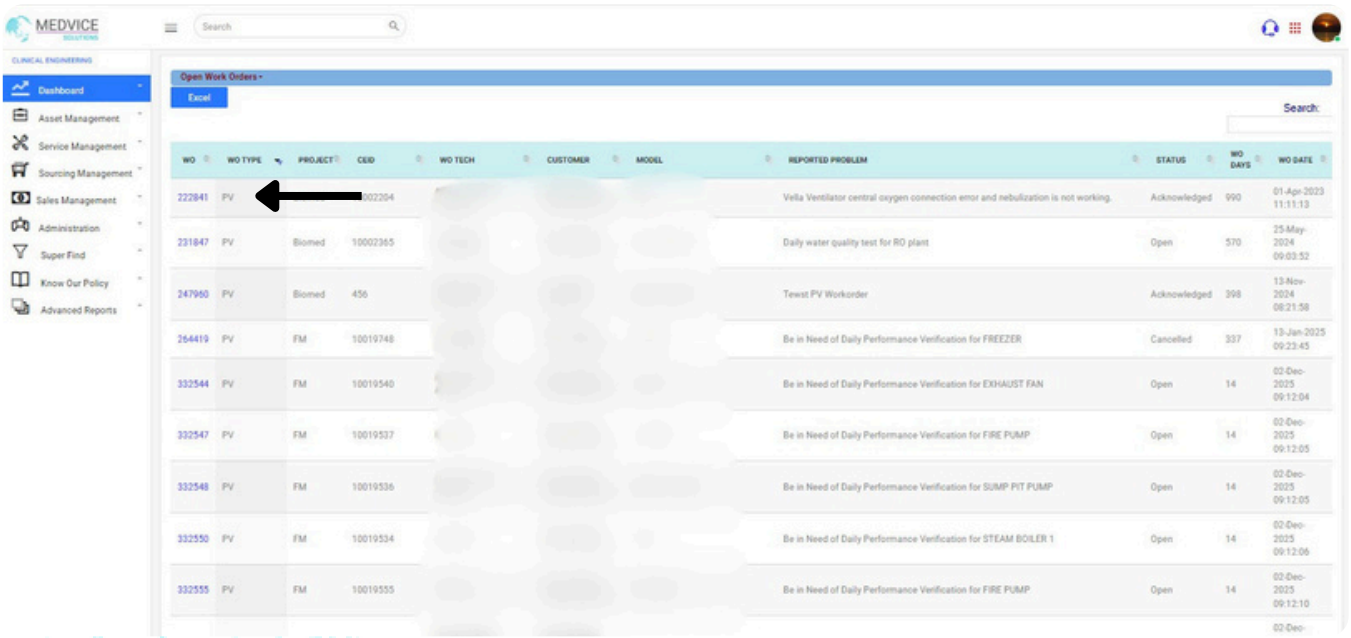

Under the Dashboard section, select Open Work Orders.

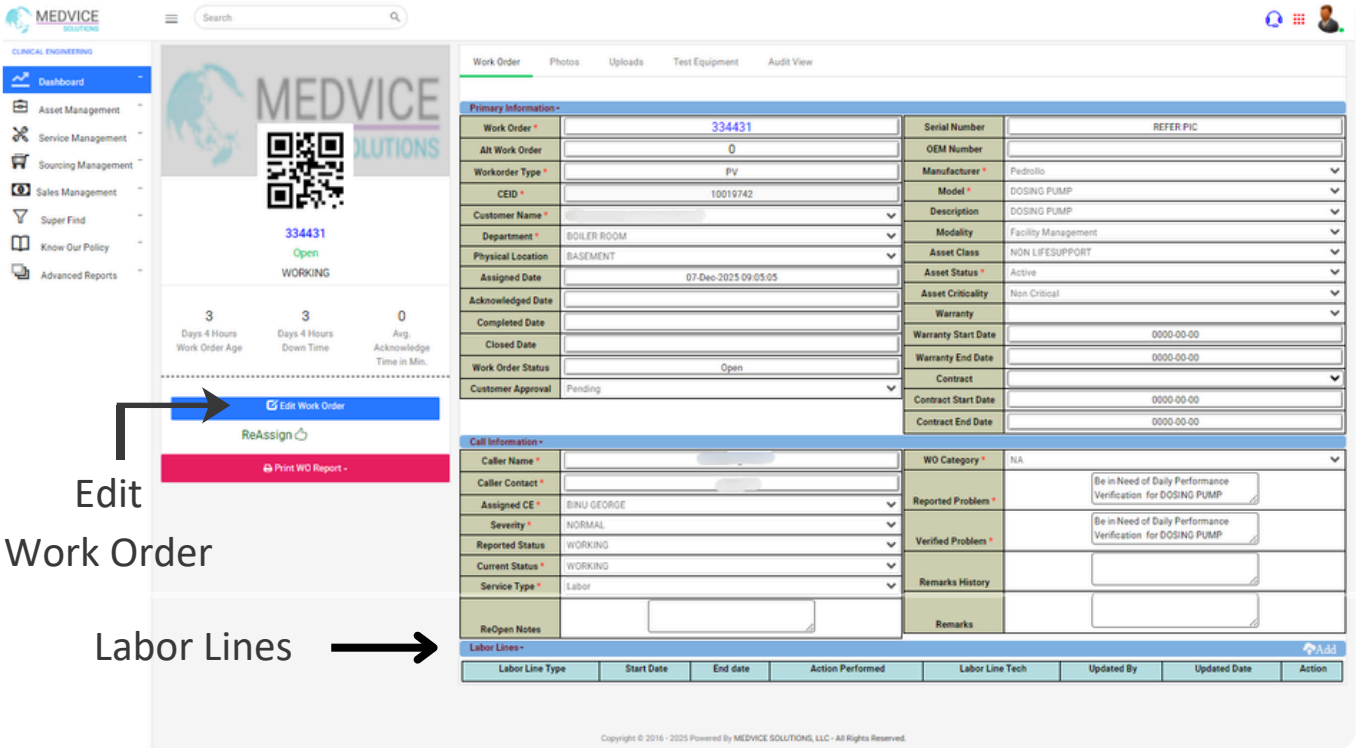

Edit PV Work Orders

After selecting the Open Work Orders tab, the Open PV Work Orders page will appear as shown in the image below.

Then, click on the Respective Work Order Number located on the left side to open and view the detailed Work Order page shown in the image below.

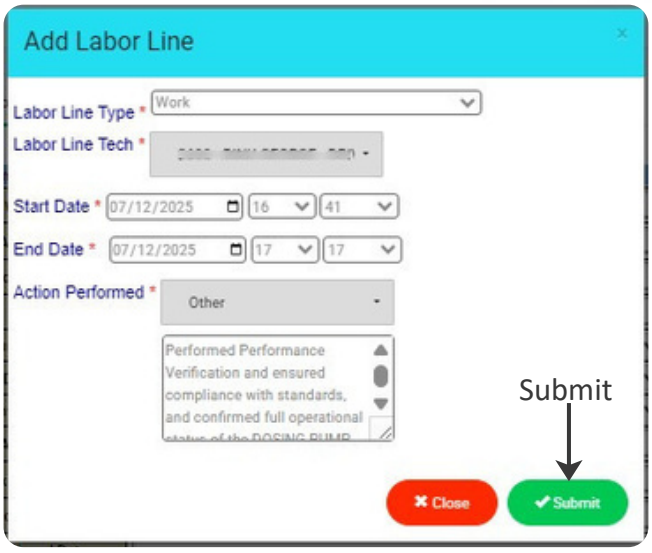

Add Labour line

If no labour is listed under the Labour Lines section, it indicates that the Work Order has not yet been completed.

To proceed with completing the PV call, the appropriate technician must be assigned based on their duty shift. Each piece of equipment requires routine checks, which may be performed once, twice, or three times per day, depending on the equipment requirements.

To assign a technician, click the Edit Work Order button. This allows you to update the labour details and assign the appropriate technician for the PV call.

After clicking Edit Work Order, the Add Labour Line pop-up window will appear. Select the appropriate Technician, choose the relevant Date and Time, and mention the Action Performed by the technician, as shown in the image below. Then, click Submit to add the labour details.

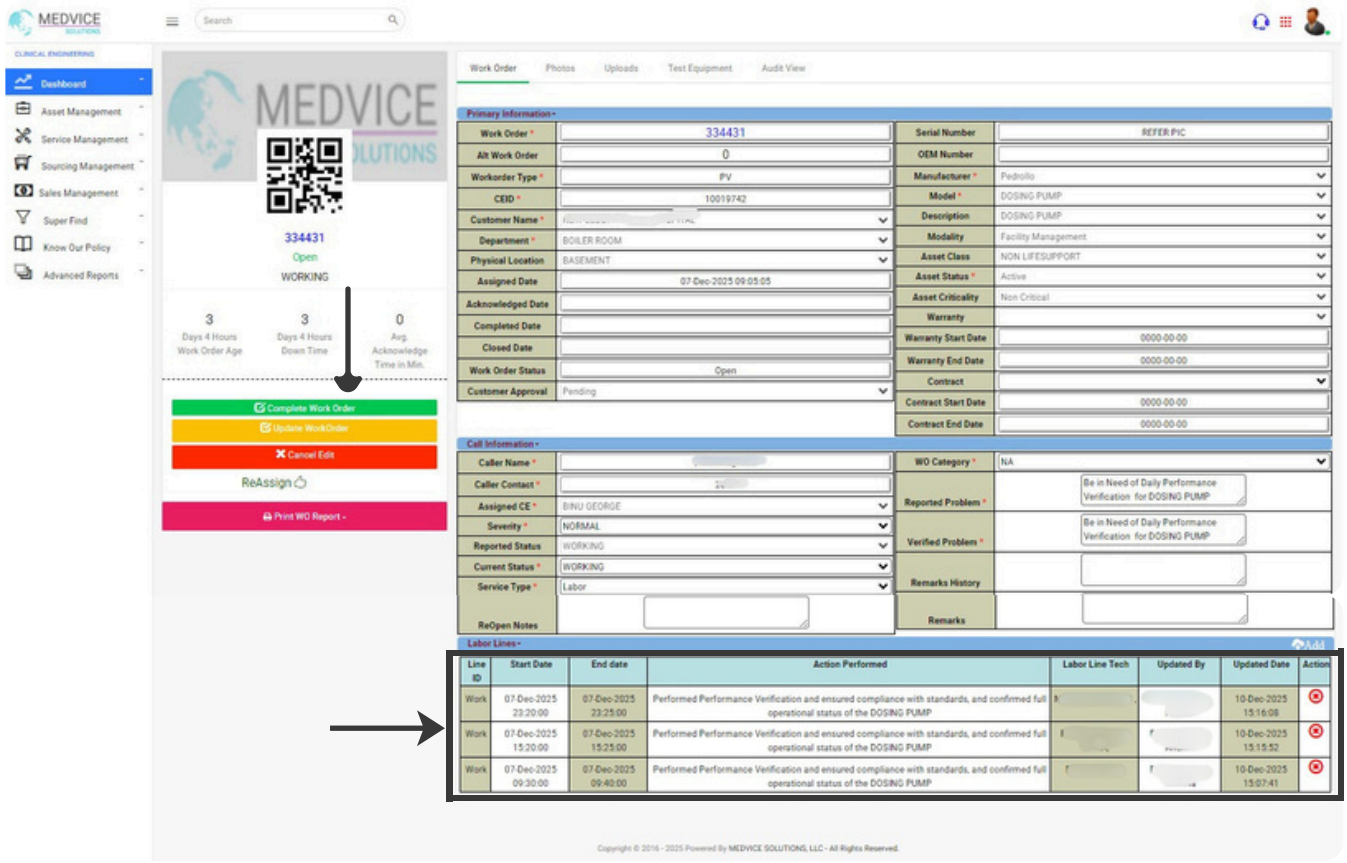

Note:-

Technicians are assigned based on the Equipment/Asset Category and their area of responsibility. For equipment requiring multiple **Performance Verifications** per day, technicians are assigned based on the required check frequency and duty shift.

Complete PV Work Order

Once the labour entries are added to the Work Order, the details will be displayed under the Labour Part Lines section, as shown in the image below.

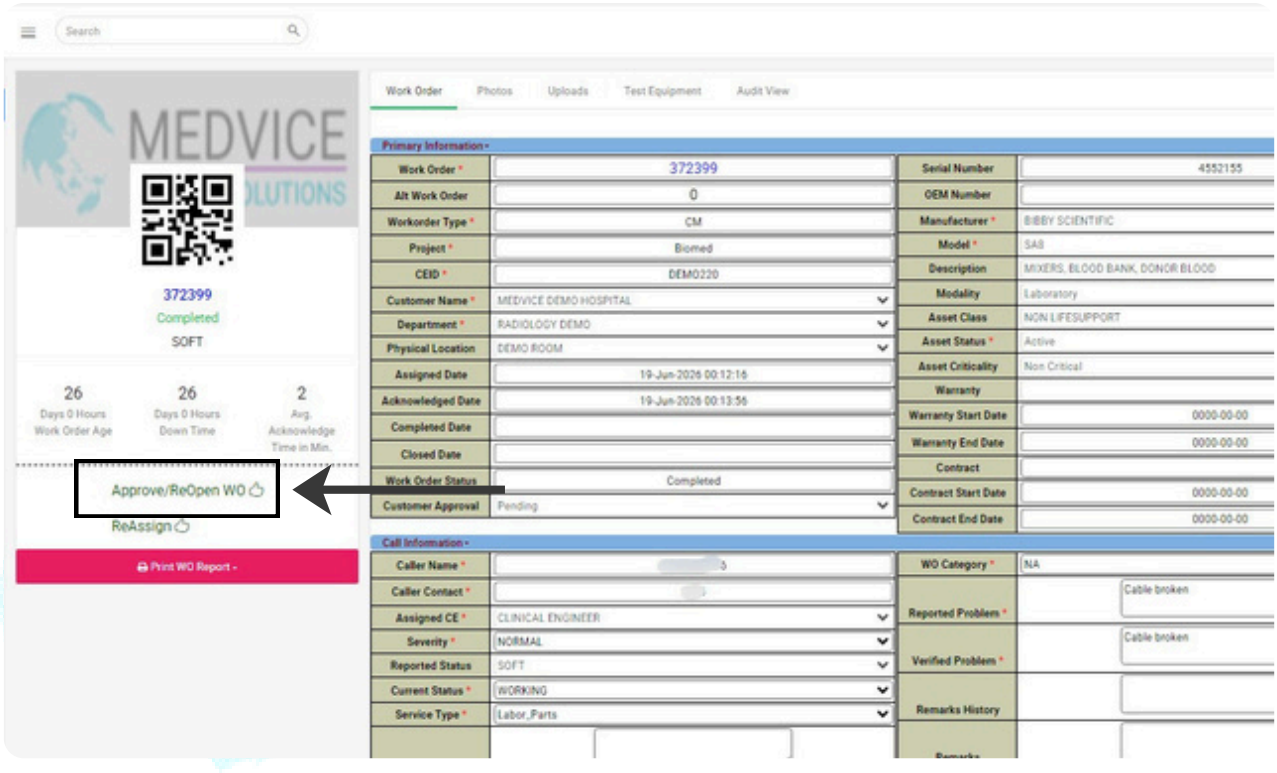

After completing the work order, proceed to Approve the work order. Closing a work order can only be performed by authorised users, such as relevant Managers, Engineers, or Department Heads.

You have now successfully Completed the Open PV Work Orders.

Approving the Work Order

After the Work Order is completed, it will be reviewed and approved by the Manager.

Click Approve from the left-side menu. A pop-up window will appear.

- Select “Approve” as the approval status
- choose the appropriate Billing Type, enter “Approved” in the Remarks field
- click “Submit” to complete the approval process.

Note:-

Once approved by the Manager, the Work Order status will be changed to “Closed,” indicating that the Work Order has been successfully completed and closed.

You have now successfully Approved the work orders.

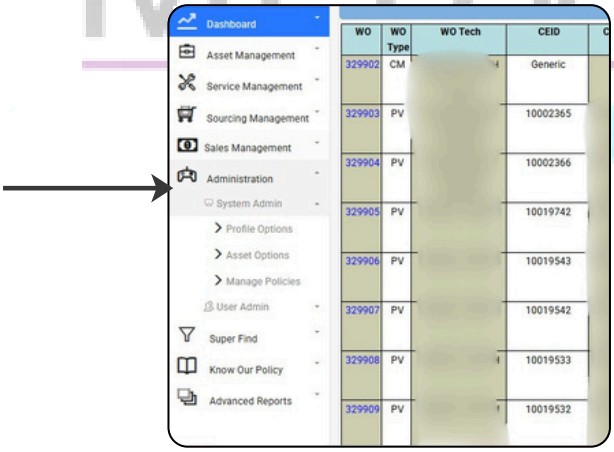

Creating The New Customer

Note:-
Before creating customer groups or profiles, you must establish a complete geographical hierarchy. Setting up these foundational regions in the correct order ensures data integrity, prevents validation errors, and streamlines your workflow.

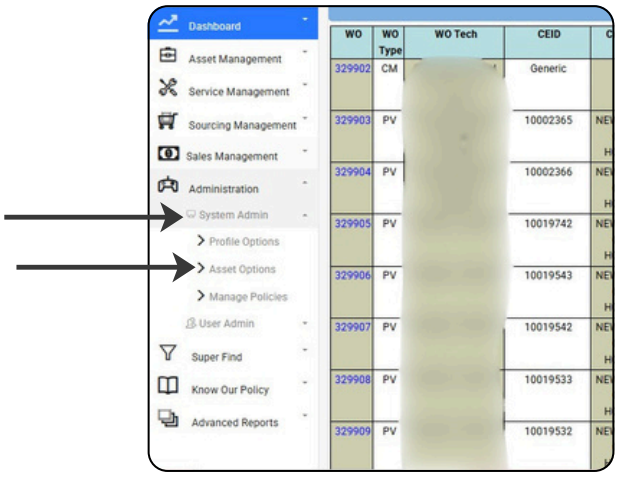

Dashboard & Administration

After logging into Medvice Insight, the system opens the WO Dashboard.
Note: The Administration tab can be accessed only by the Manager or Reference Manager.
Click on the “Administration” tab. Under the Administration section, two options are available:

1.System Admin
2.User Admin

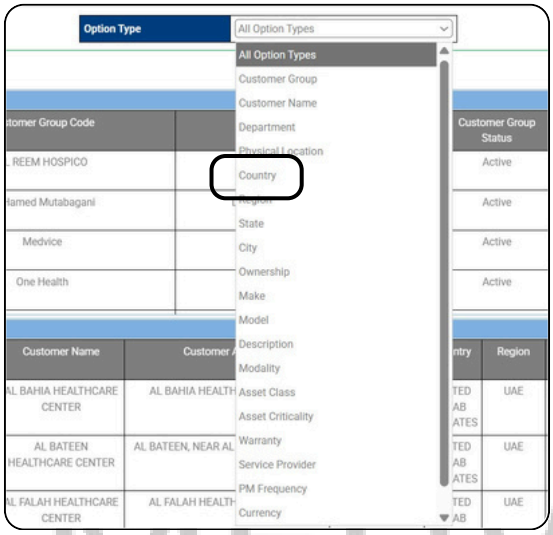

Under the System Admin section, two options are available:
Select the Asset Options tab.

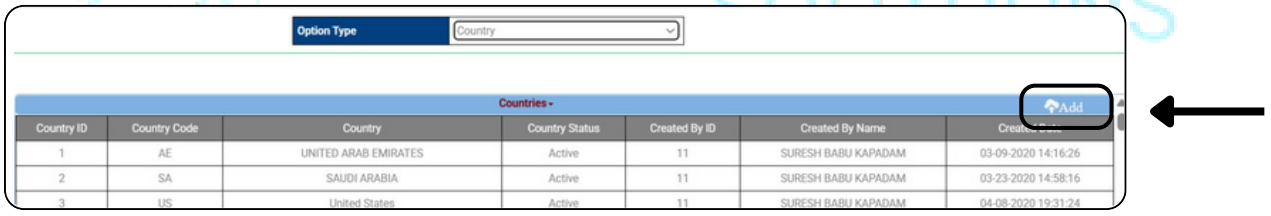

Country

- After navigating to the Asset Options page, select Country from the Option Type dropdown at the top of the page.

- The system displays the list of existing countries. Click the + Add button in the top-right corner.

In the Add Country pop-up window:

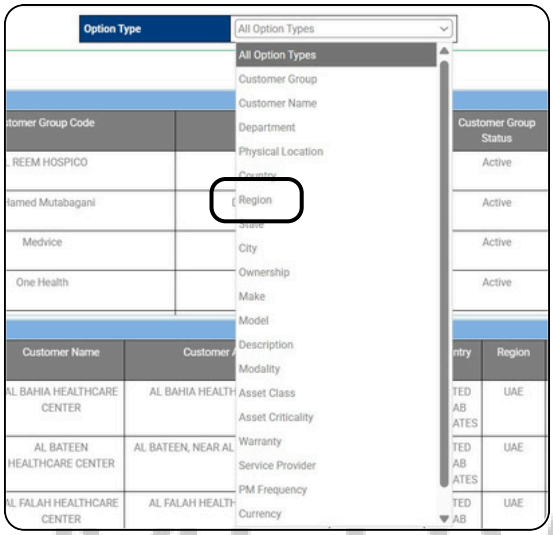

- Country Name: Enter the official name of the country.
- Country Code / ID: Enter the unique internal identifier.

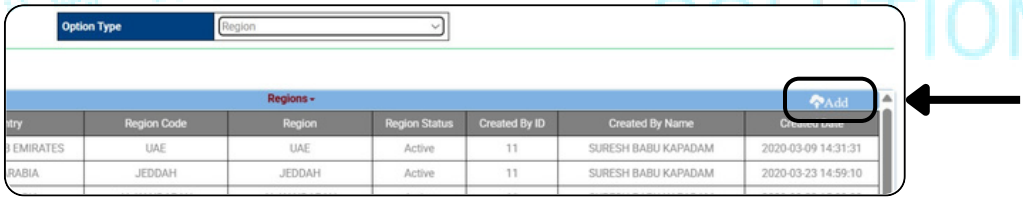

Click Submit to Add the new country.

Region

- After navigating to the Asset Options page, select Region from the Option Type dropdown at the top of the page.

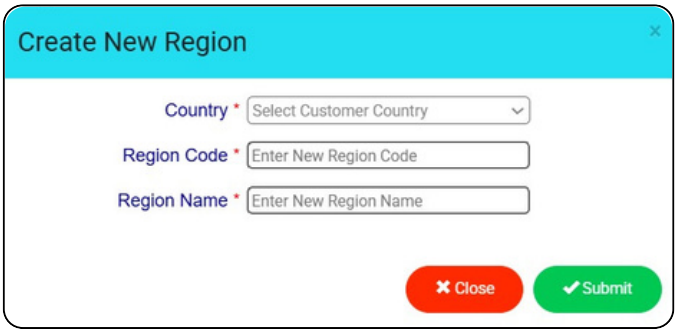

- The system displays the list of existing Regions. Click the + Add button in the top-right corner.

In the Add Regionpop-up window:

- Country: Select the customer country from the dropdown.
- Region Code: Enter the new region code.
- Region Name: Enter the new region name.

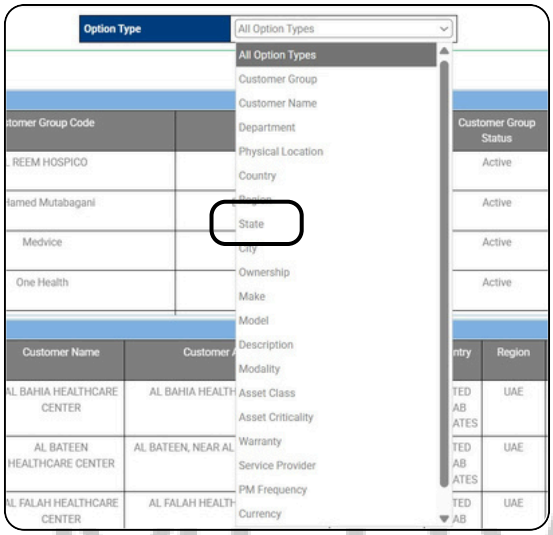

Click Submit to Add the new Region.

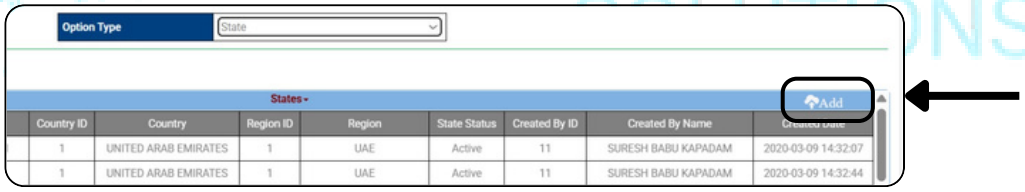

MEDVICE SOLUTIONS

State

- After navigating to the Asset Options page, select State from the Option Type dropdown at the top of the page.

- The system displays the list of existing States. Click the + Add button in the top-right corner.

In the Add State pop-up window:

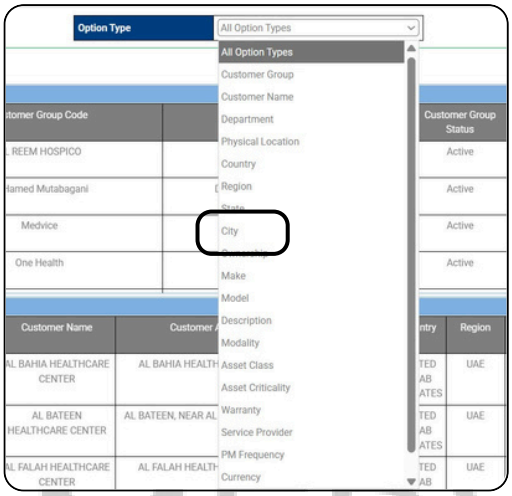

- Country: Select the customer country from the dropdown.
- Region Code: Select the customer region from the dropdown.
- State Code: Enter the new state code.
- State Name: Enter the new state name.

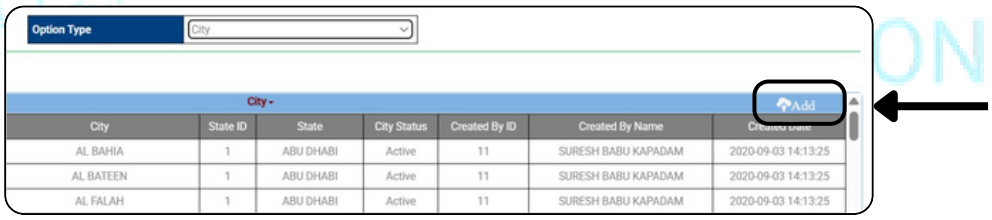

Click Submit to Add the new State.

City

- After navigating to the Asset Options page, select City from the Option Type dropdown at the top of the page.

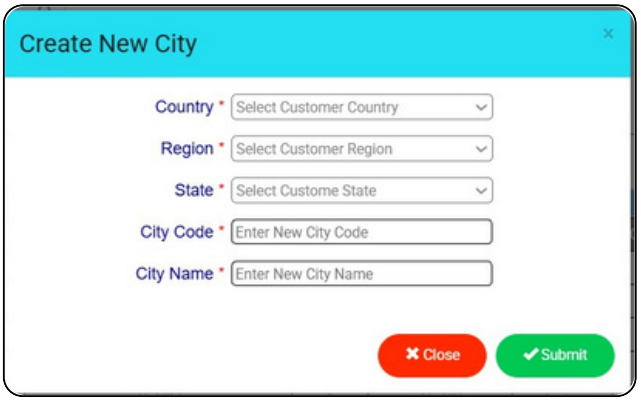

- The system displays the list of existing Cities. Click the + Add button in the top-right corner.

In the Add City pop-up window:

- Country: Select the customer country from the dropdown.
- Region: Select the customer region from the dropdown.
- State: Select the customer state from the dropdown.
- City Code: Enter the new city code.
- City Name: Enter the new city name.

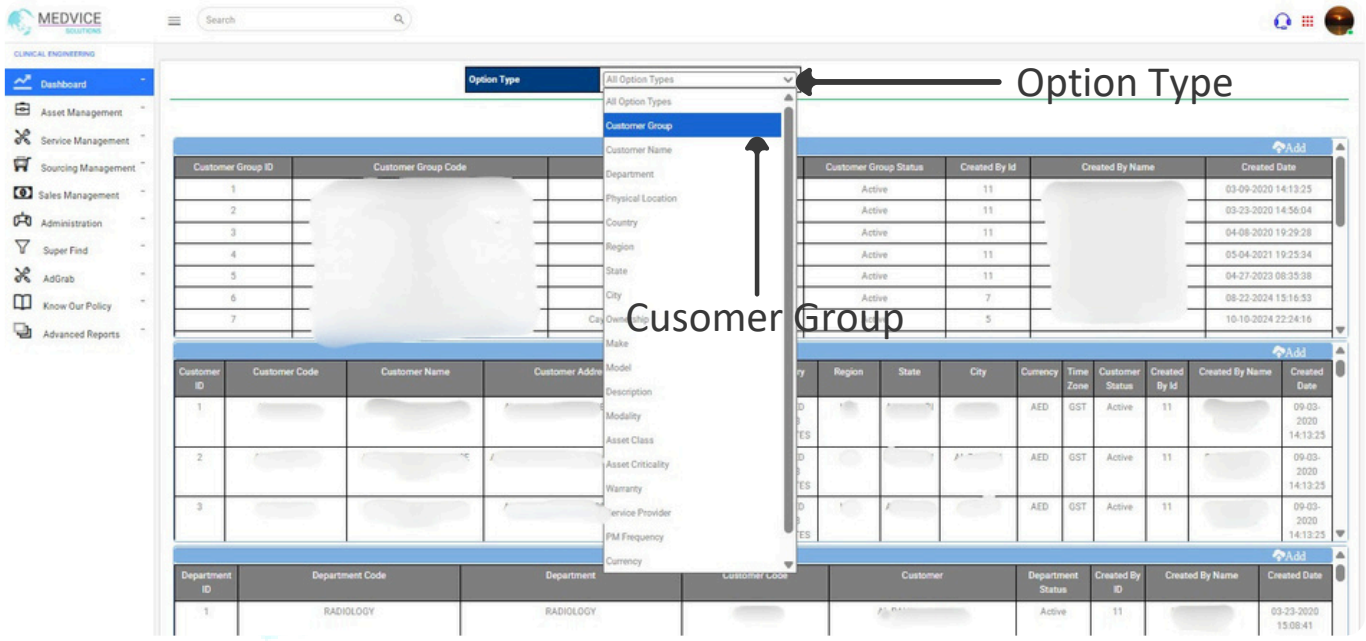

Click Submit to Add the new City.

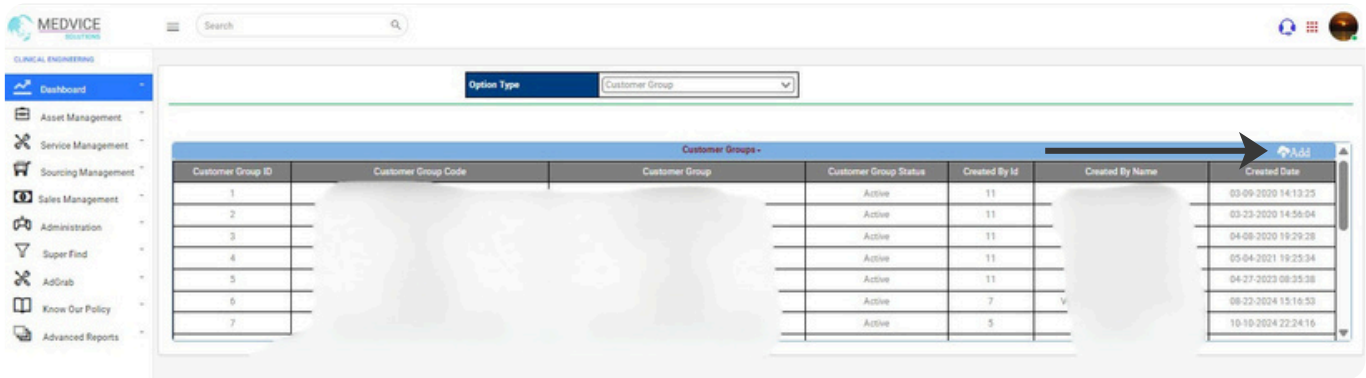

MEDVICE SOLUTIONS

Customer Group Creation

After selecting the Asset options, the system will navigate to the corresponding page. At the top of this page, an Option Type input field is available. First, select the Customer Group from this field.

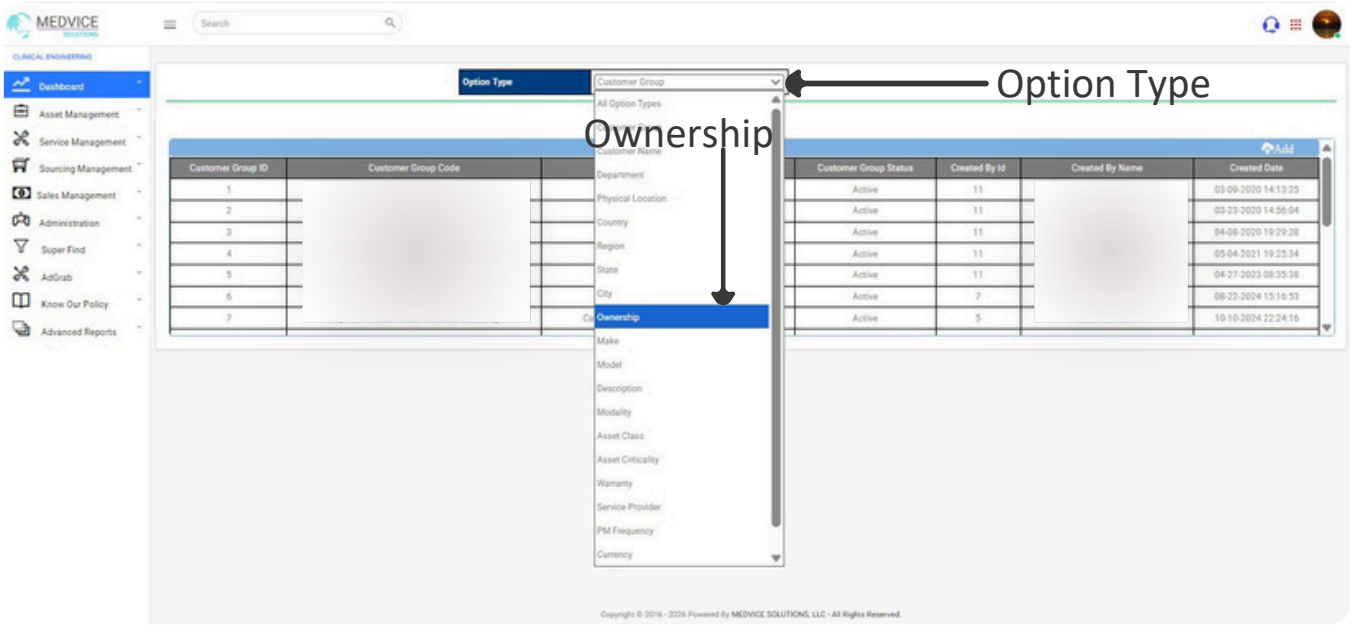

After selecting the Customer Group, a list of customer groups will be displayed. Click the Add link located at the top-right corner of the page.

A pop-up window will appear. Enter the required details and click Submit. The customer group will be created successfully.

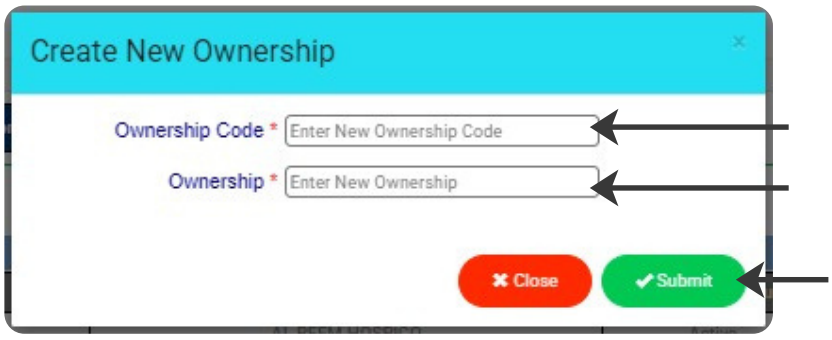

Ownership Creation

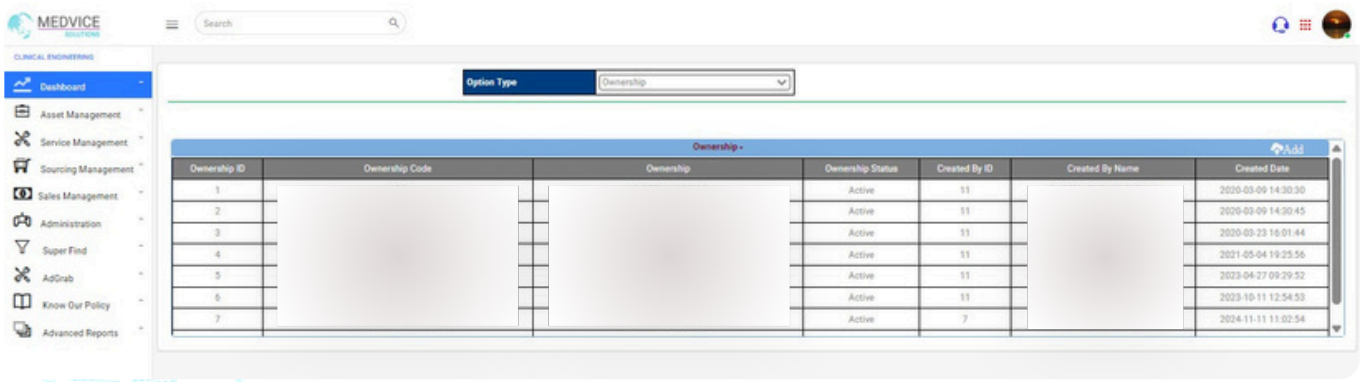

After successfully creating the Customer Group, you need to create the Ownership under the relevant Customer Group. Click on Ownership Creation, and a Create New Ownership pop-up window will appear. Then, enter the required details and click Submit. The Ownership will be created successfully as shown in the images below.

Customer Name Creation

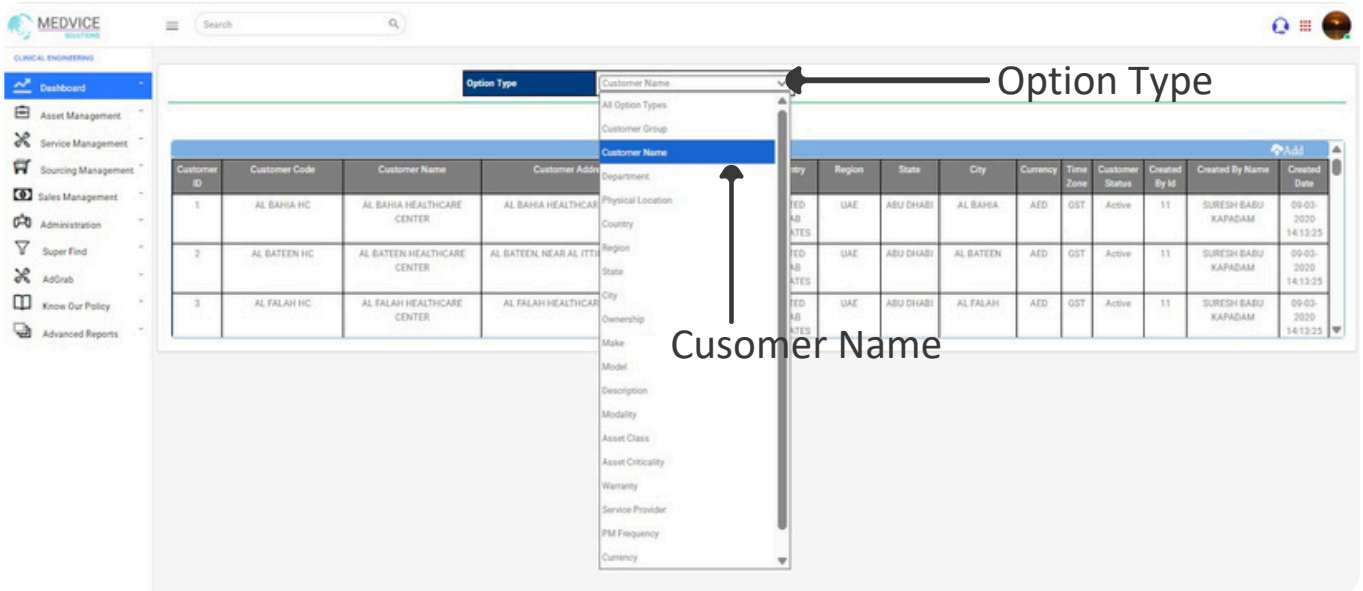

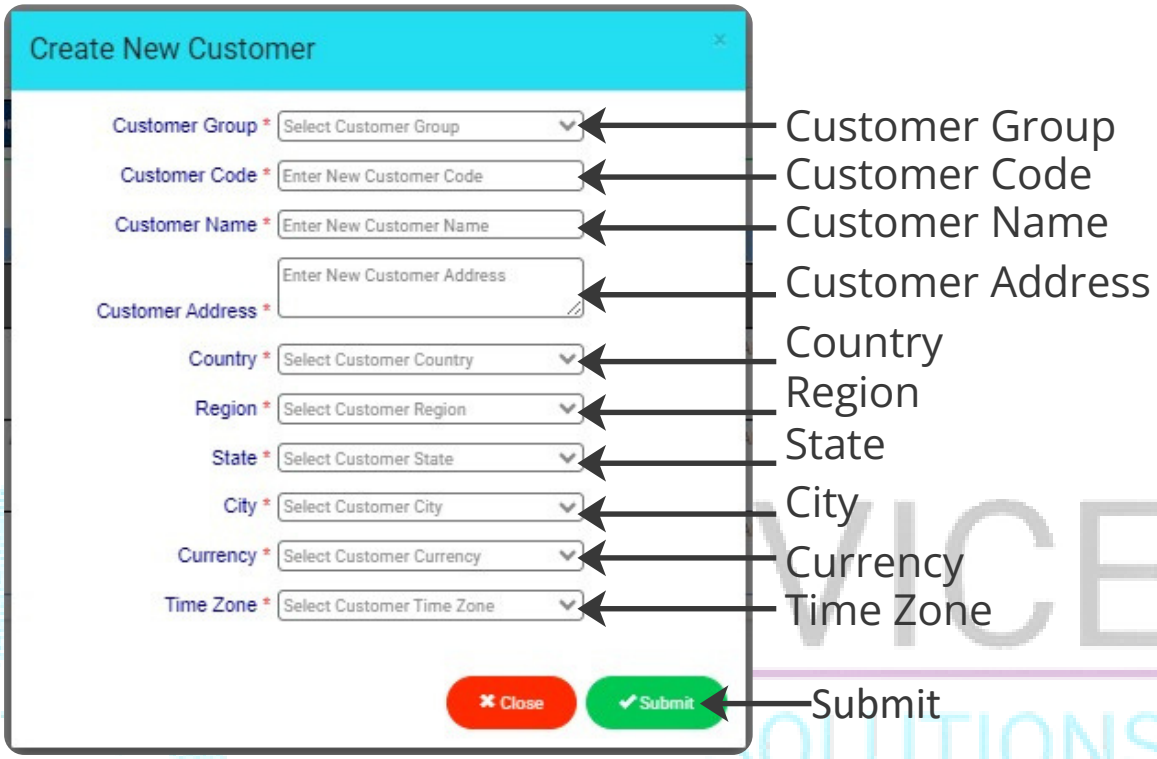

After successfully creating the Ownership, you need to create the Customer Name under the relevant Ownership.

Click on Customer Name Creation, and a Create New Customer pop-up window will appear.

Then, enter the required details and click Submit. The Customer Name will be created successfully.

Successful Customer Creation

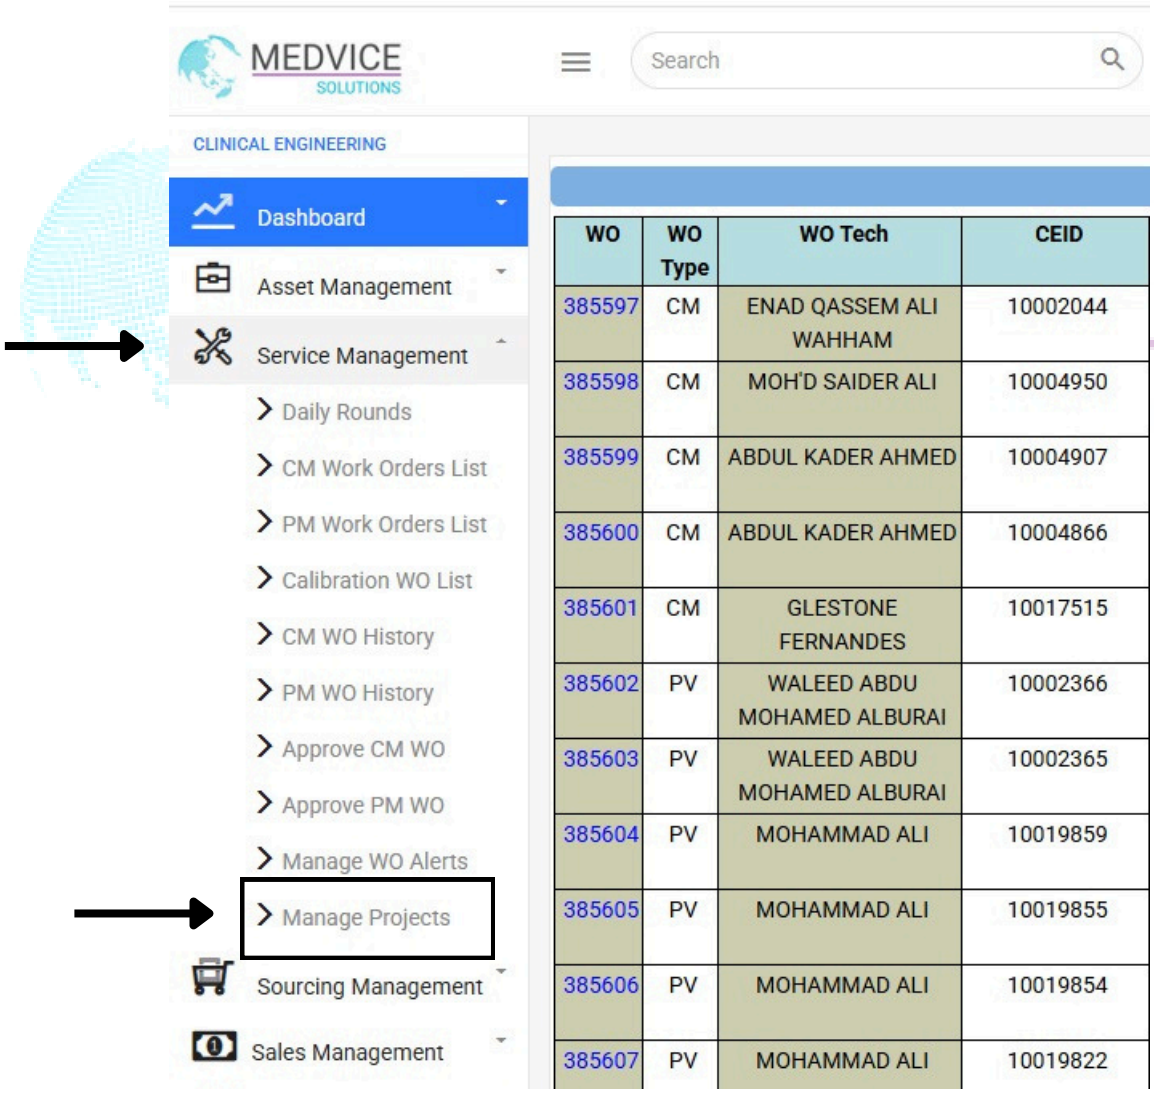

After completing the creation of the customer name, the customer is created successfully.

If the Country, State, City, Region, Currency, and Time Zone is not available while creating a customer, you must first create the required field by following the same process used to create the Customer Group, Customer Name, and Ownership.

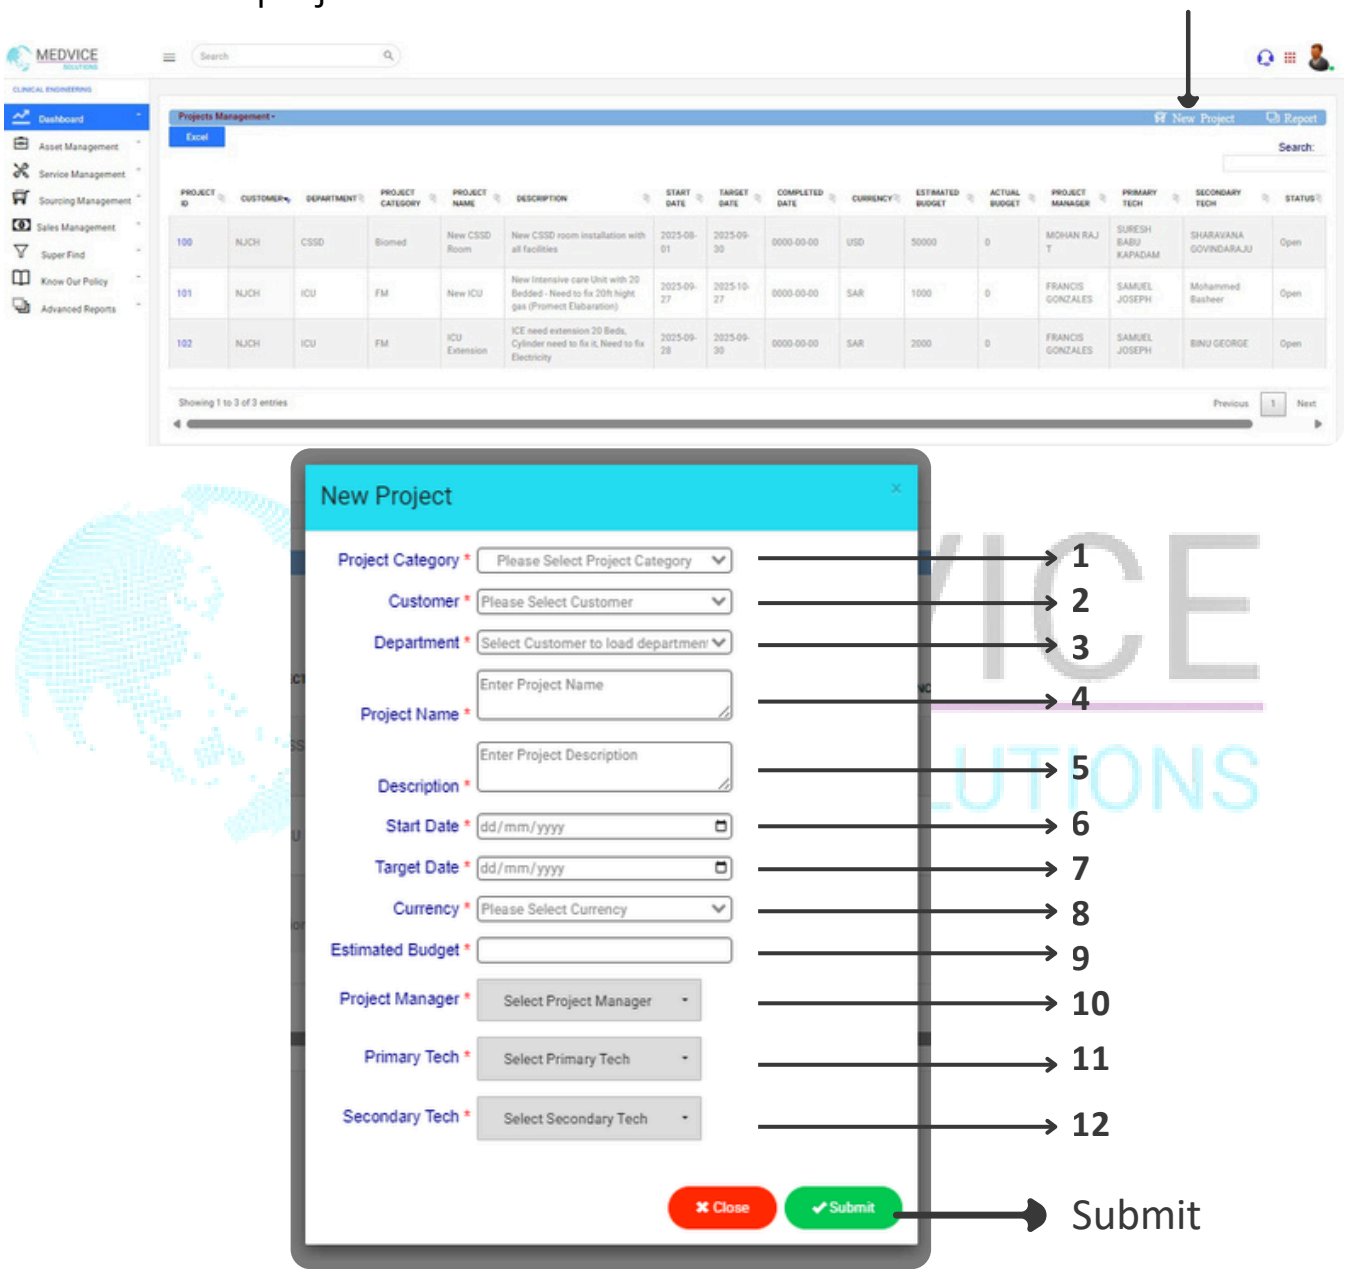

Adding New Project

Adding New Project

WO	WO Type	WO Tech	CEID
385597	CM	ENAD QASSEM ALI WAHHAM	10002044
385598	CM	MOH'D SAIDER ALI	10004950
385599	CM	ABDUL KADER AHMED	10004907
385600	CM	ABDUL KADER AHMED	10004866
385601	CM	GLESTONE FERNANDES	10017515
385602	PV	WALEED ABDU MOHAMED ALBURAI	10002366
385603	PV	WALEED ABDU MOHAMED ALBURAI	10002365
385604	PV	MOHAMMAD ALI	10019859
385605	PV	MOHAMMAD ALI	10019855
385606	PV	MOHAMMAD ALI	10019854
385607	PV	MOHAMMAD ALI	10019822

On this page, click the New Project button located at the top-right corner to add a new project.

After clicking New Project, a New Project pop-up window will appear, prompting you to fill in the required information.

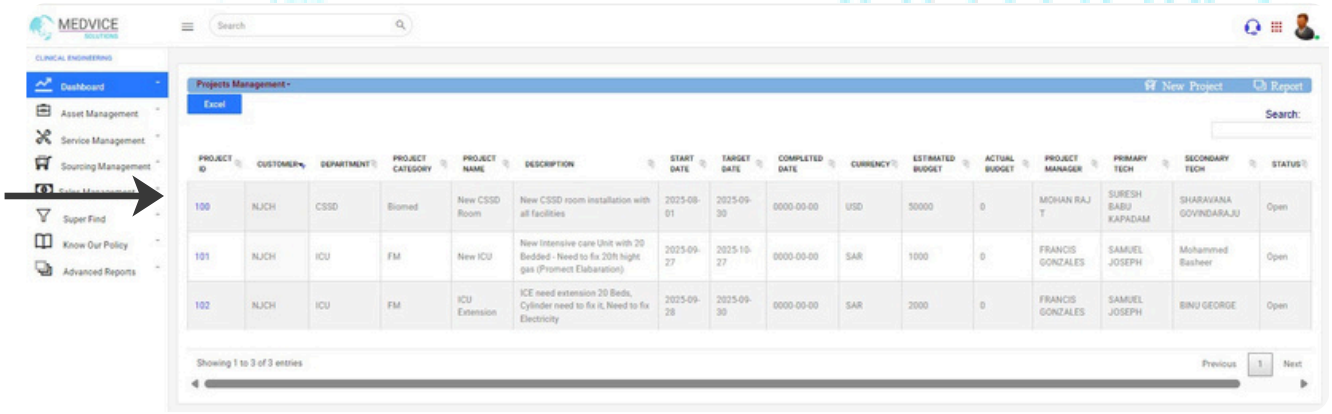

1. Select the Project category.
2. Select the customer (hospital).
3. Select the department in the hospital.
4. Provide the project name.
5. Provide the Project Description in Brief.

6. Select the start date.
7. Select the target date.
8. Select the currency.
9. Select the estimated budget.
10. Select the Project manager.
11. Select the primary technician.
12. Select the secondary technician.

After entering all the required information, click Submit to save the project.

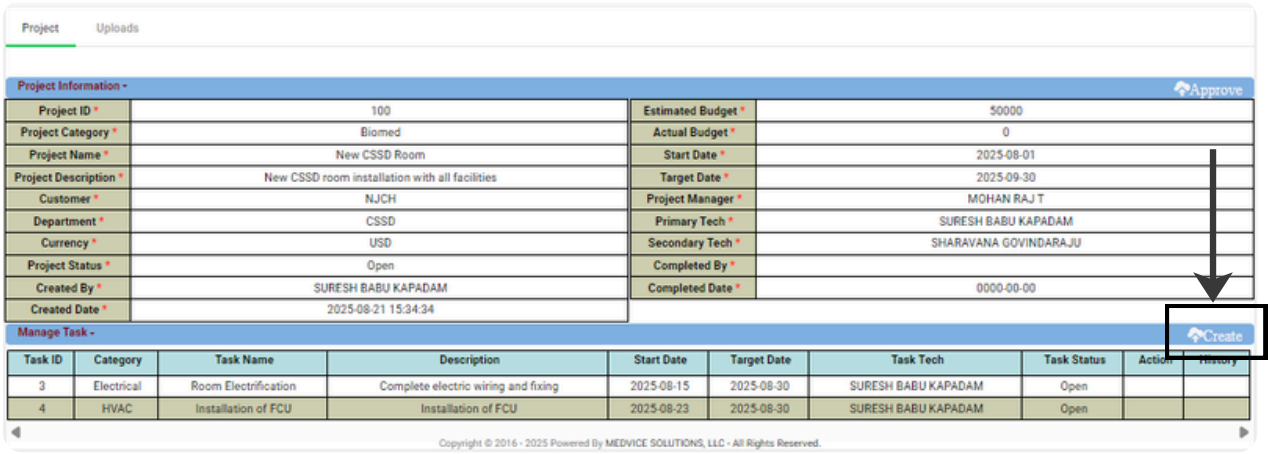

Adding a New task

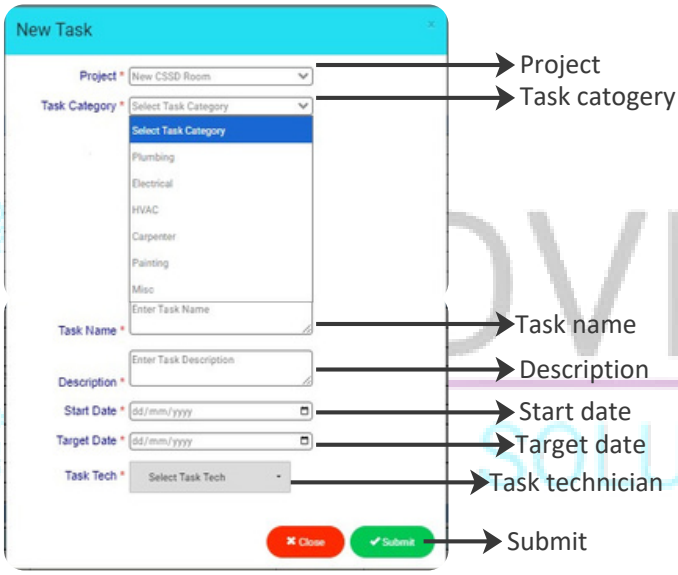

After submission, your project will be added to the Projects List on the Project Management page, as shown in the image below. Now, click the Respective Project ID to assign a new task, as shown in the image above.

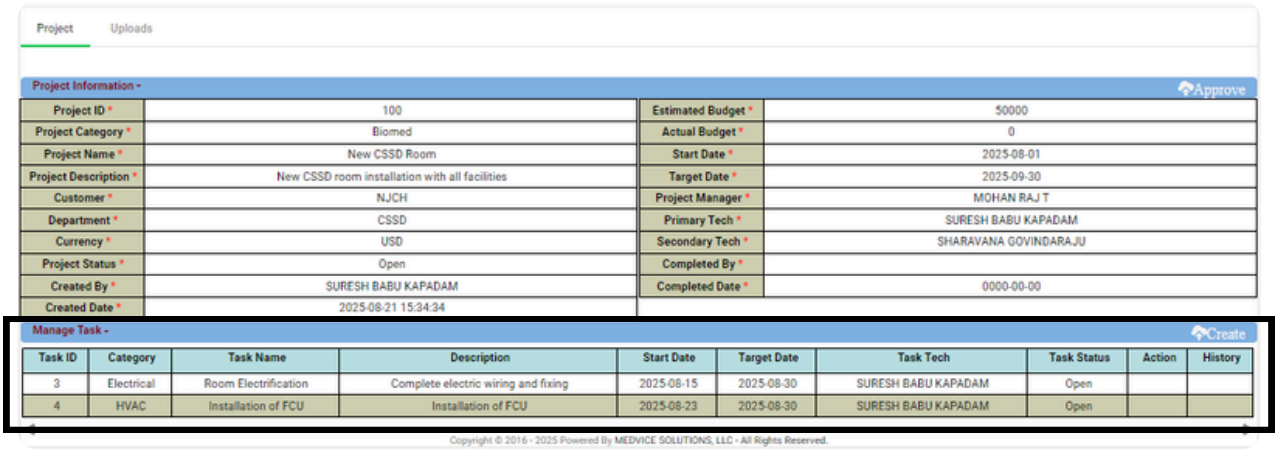

Submitting the task

After selecting the Project ID, the Project Description page will open. On this page, click the Create button located at the bottom-right corner to open the New Task pop-up window.

After filling in all the required information, click Submit to create the task. Once the task is created successfully, you can view it in the Manage Task section.

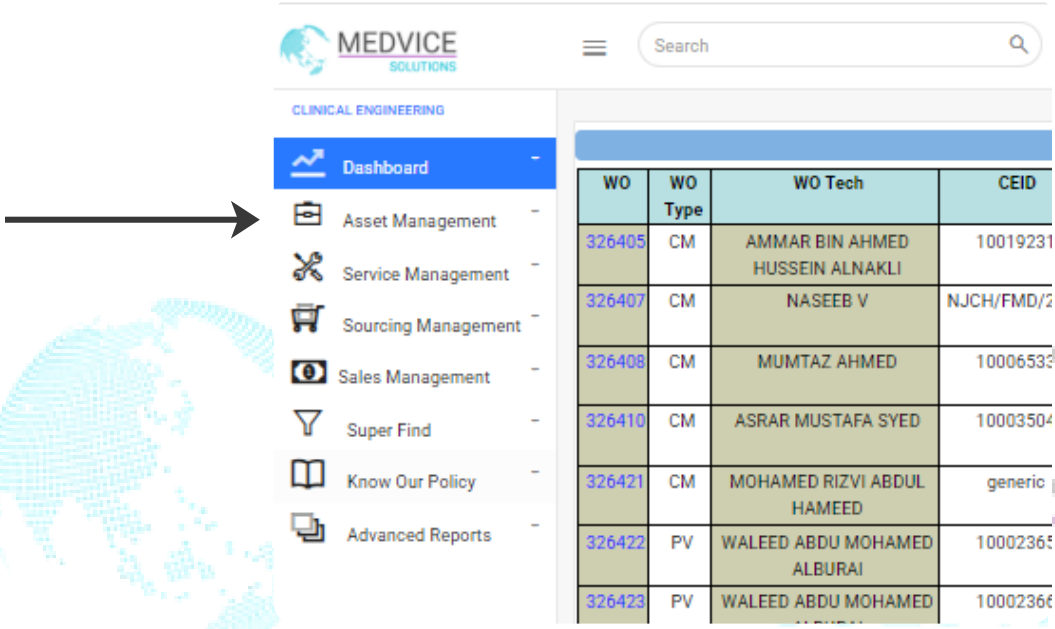

You have now successfully added the project.

MEDVICE SOLUTIONS

Adding New Asset

Dashboard

After login, the Medvice Dashboard will appear, as shown in the image below.
Click on the “Asset Management” tab.

Under the Asset Management , select the Add New Asset tab.

CEID is pre-listed in the Asset List

After clicking Add New Asset, an Asset Incoming Inventory window will appear.

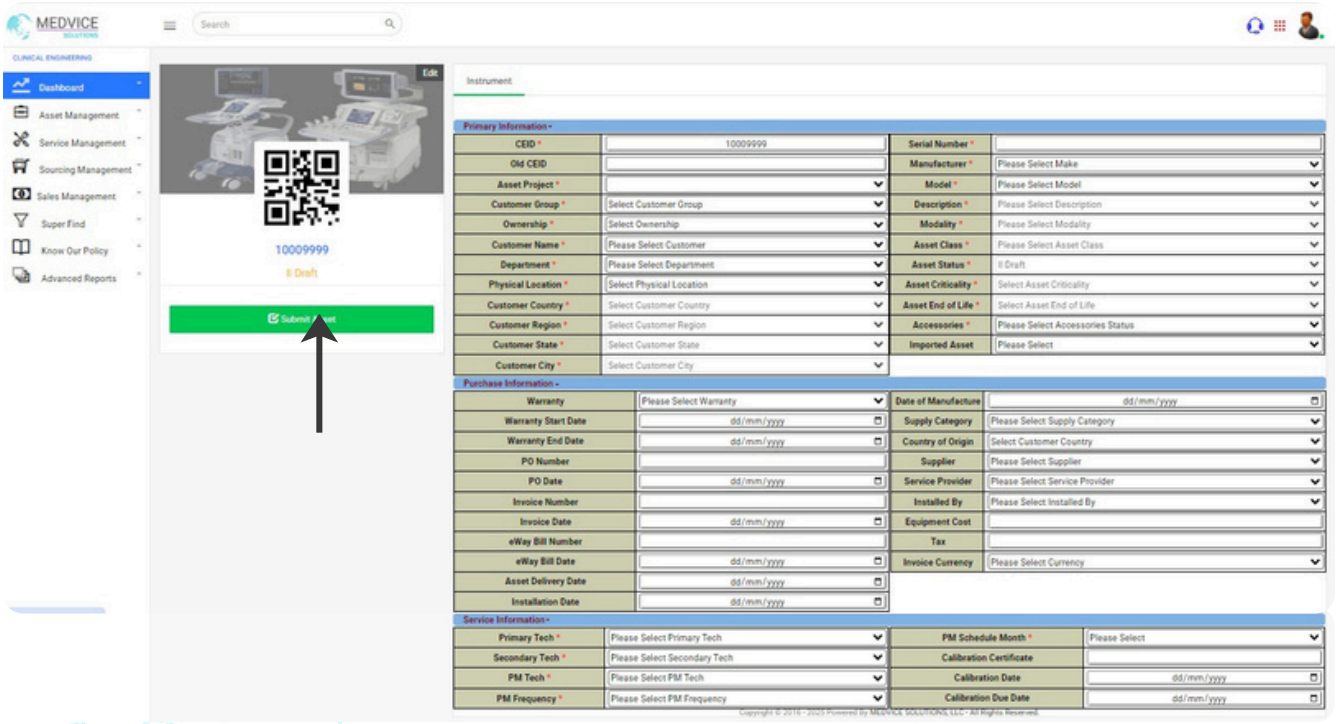

After entering the CEID, click the Submit button to proceed.
If the message "CEID already available in the Asset List" is displayed (as shown in the image below), it means that this CEID has already been added to the Asset List.

If the CEID is not already in the system, the Asset page will be displayed as shown in the image below.

Adding New Asset

Once the page is displayed, click on Edit Asset and update all the mandatory fields accordingly.

Primary Information:

1. Asset Project

- Select the relevant Asset Project, such as FM, Biomed, or IT.

2. Customer Group

- Select the relevant Customer Group.

3. Ownership

- Select the relevant Ownership.

4. Customer Name

- Select the relevant Customer Name.
- After selecting the Customer Name, the Customer Country, Region, State, and City information will be filled in automatically.

Updating All Mandatory Fields

5. Department

- Select the relevant Department associated with that Customer Name (Hospital).

6. Physical Location

- Select the relevant Physical Location associated with that Department.

7. Serial Number

- Enter the Serial Number of the Asset (Equipment).

8. Manufacturer

- Select the relevant Manufacturer & Model associated with that Asset.
- After selecting the Manufacturer & Model, the Description, Modality, Asset Class, Asset Criticality and Asset End of Life information will be filled in automatically.

9. Accessories

- Select whether Accessories are Applicable or Not Applicable for the Asset.

Service Information:

1. Primary Tech

- Select the relevant Primary Technician for the asset.

2. Secondary Tech

- Select the relevant Secondary Technician for the asset.

3. PM Tech

- Select the relevant PM Technician for the asset.

4. PM Frequency

- Select the appropriate PM Frequency, such as 2, 3, or 4 months, or choose No PM if preventive maintenance is not required.

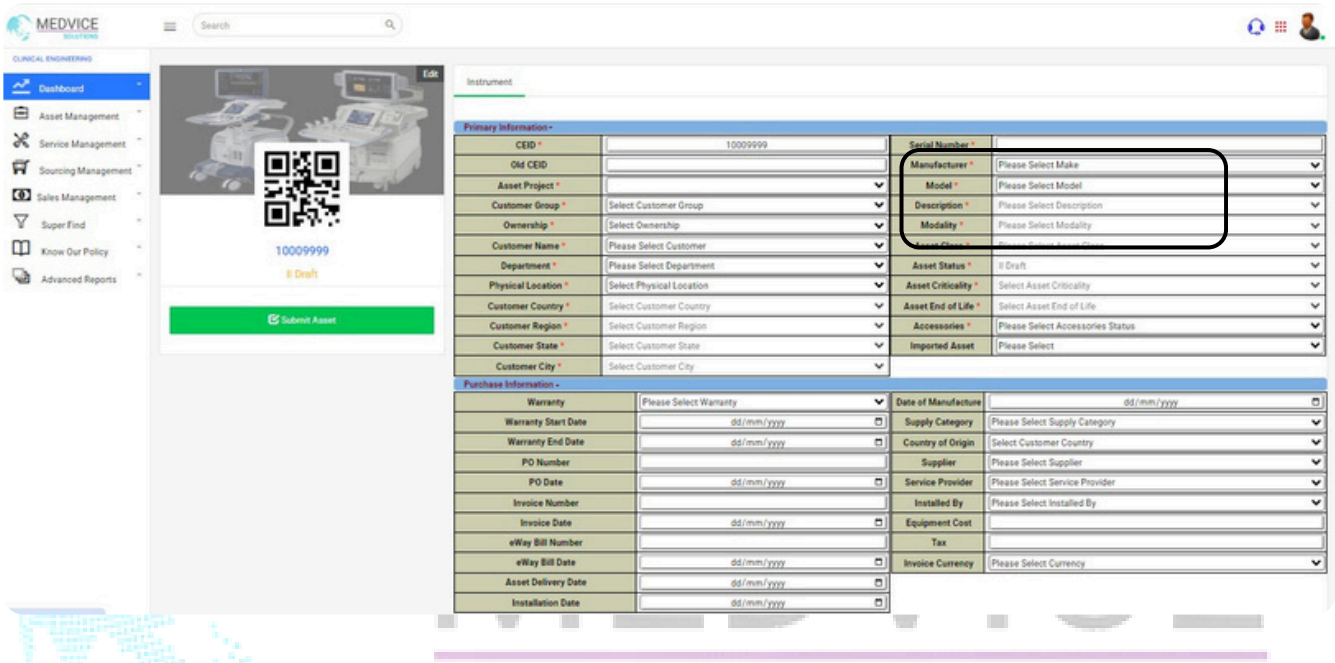

5. PM Schedule Month

- Select the relevant PM Schedule Month for the asset.

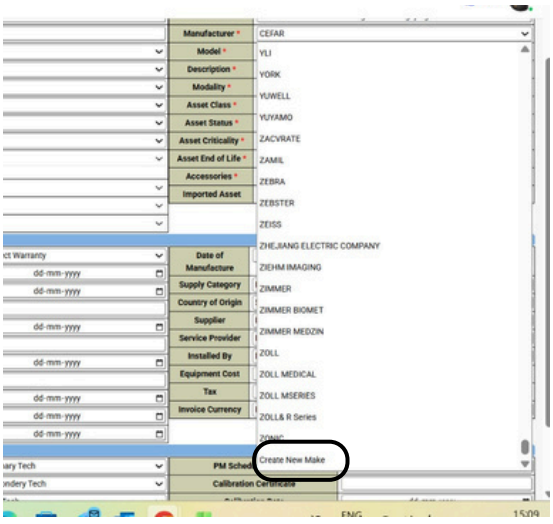

MEDVICE SOLUTIONS

Adding a New Manufacturer & Model

If the required Manufacturer & Model is not available in the list, select the option to create a new Manufacturer & Model.

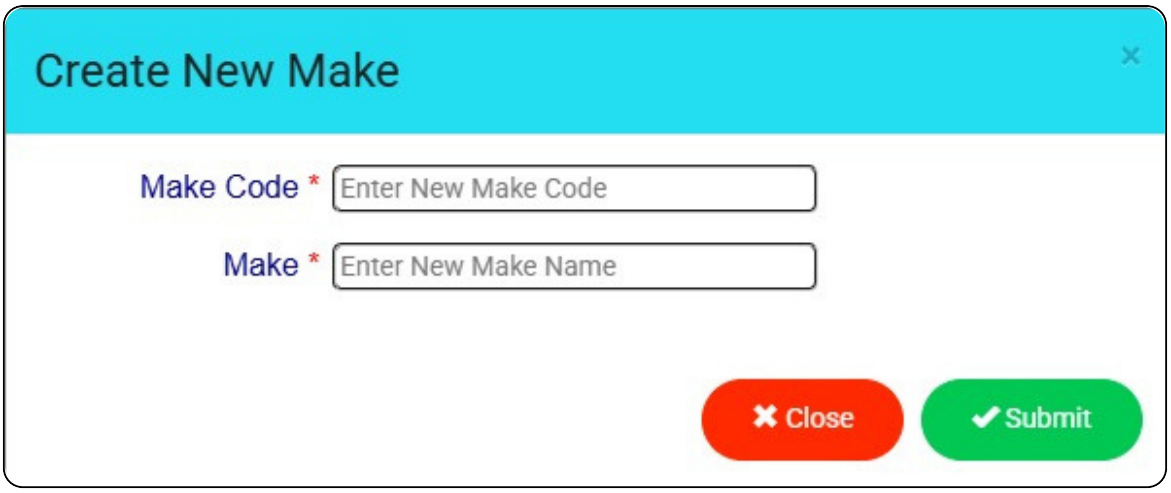

- Select the Manufacturer drop-down.
- If the required Manufacturer is not available in the list, select the last option, Create New Make.

- A pop-up window will appear. Enter all the required Manufacturer details.
- Click Submit to create the new Manufacturer.

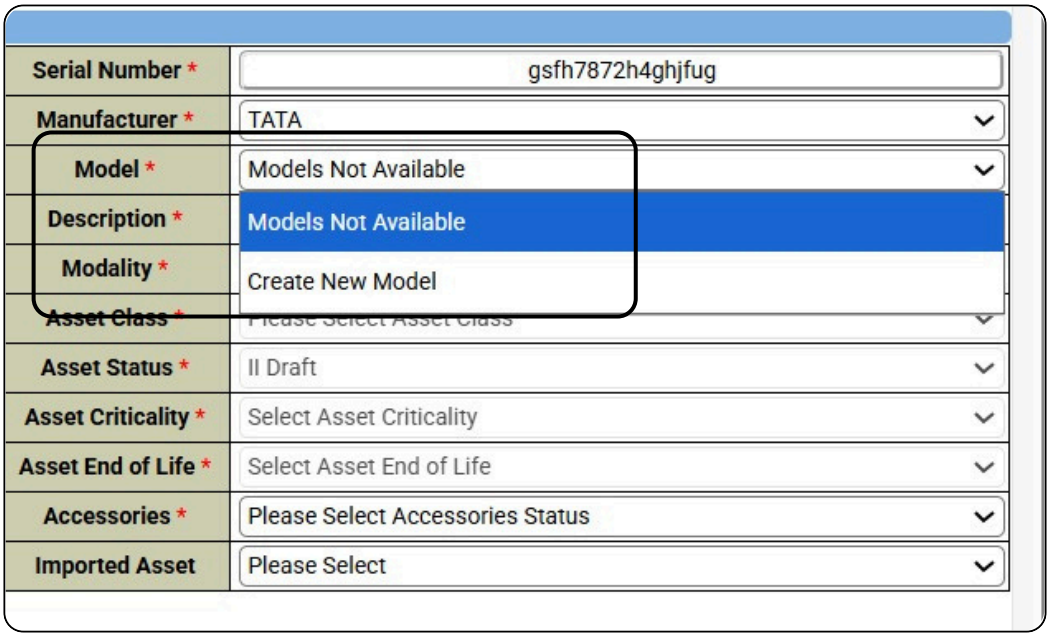

MEDVICE SOLUTIONS

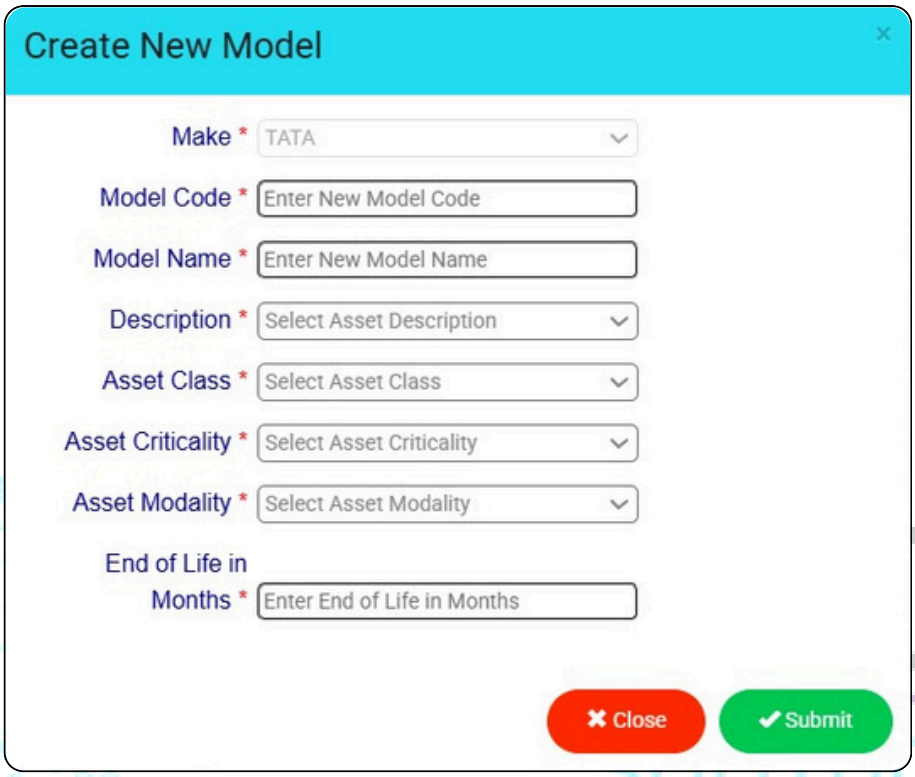

- Click Submit to create the new Manufacturer.
- Once created, the new Manufacturer will be available in the drop-down list for selection.

Create New Model

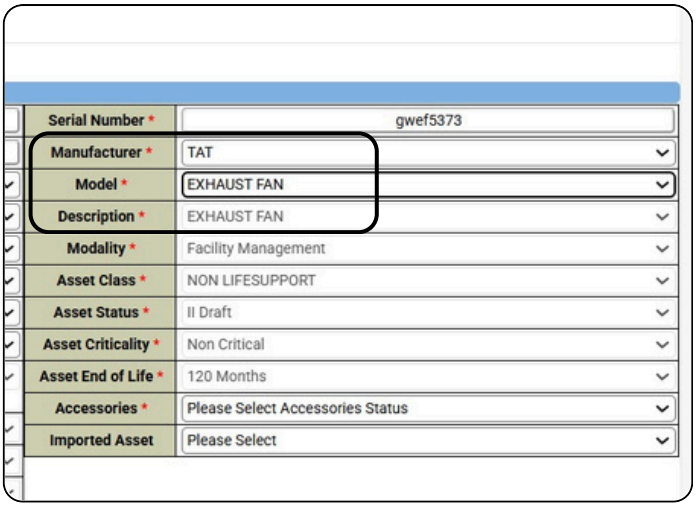

- When creating a new Manufacturer, a corresponding Model must also be added.
- Select the Model drop-down.
- Select the last option, Create New Model.

- A pop-up window will appear. Enter all the required Model details.
- Click Submit to create the new Model.

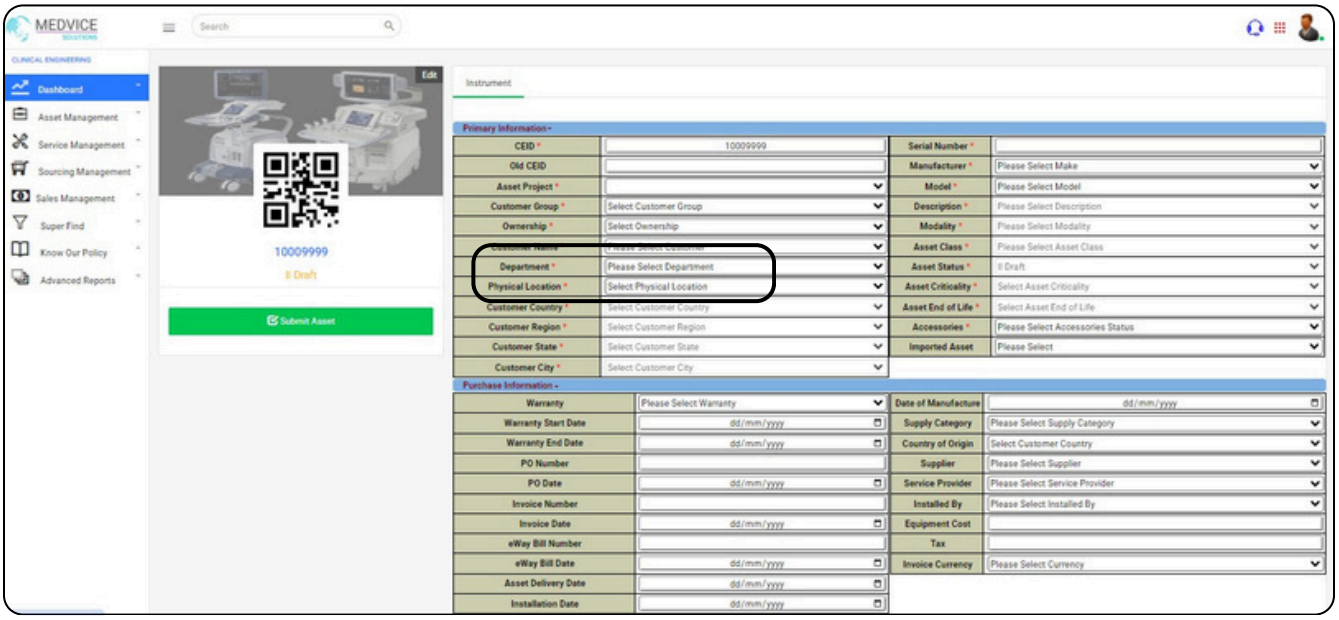

The newly created Manufacturer and Model will then be available for selection.

Since the Manufacturer "TAT" and Model "Exhaust Fan" have been created, they will now be available in their respective drop-down lists for selection.

Department & Physical Location

When creating a new Manufacturer Model for an asset, select the Department where the asset will be used and the Physical Location where the asset will be kept or installed.

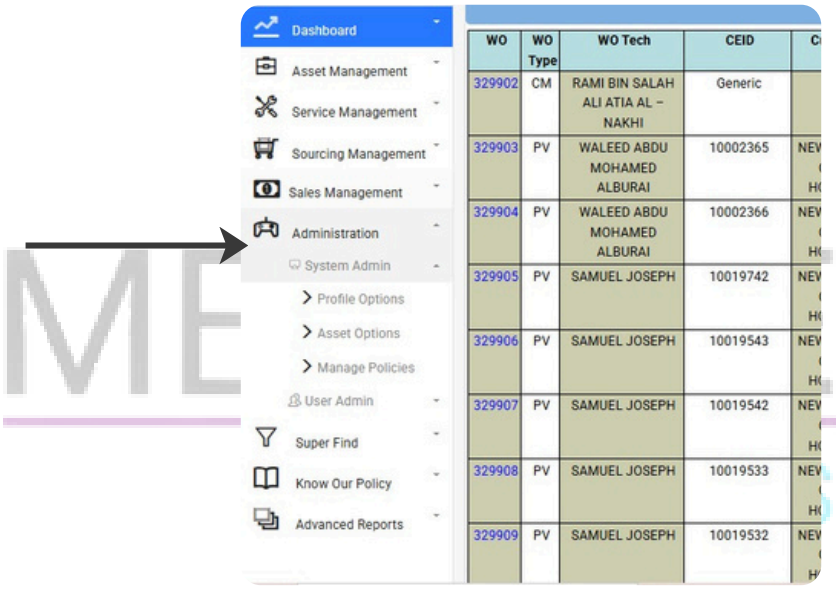

- Department: Select the department responsible for or using the asset.
- Physical Location: Select the specific location where the asset will be placed or used.

Dashboard & Administration

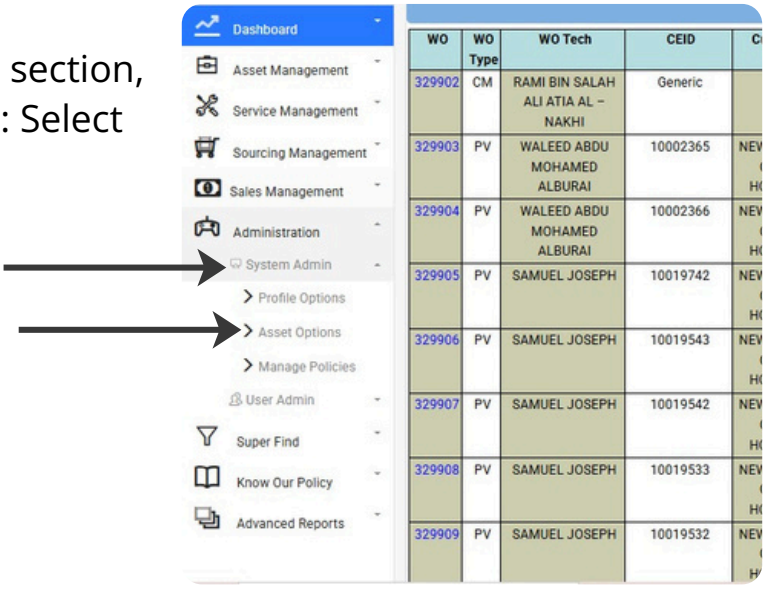

After logging into Medvice Insight, the system opens the WO Dashboard.
Note: The Administration tab can be accessed only by the Manager or Reference Manager.

Click on the "Administration" tab. Under the Administration section, two options are available:

1.System Admin
2.User Admin

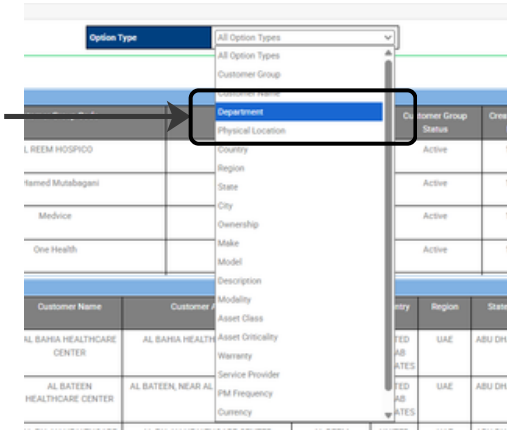

Under the System Admin section, two options are available: Select the Asset Options tab.

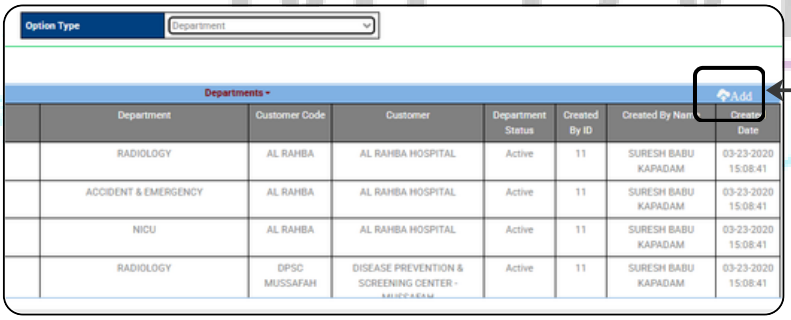

Department

- After navigating to the Asset Options page, select Department from the Option Type dropdown at the top of the page.

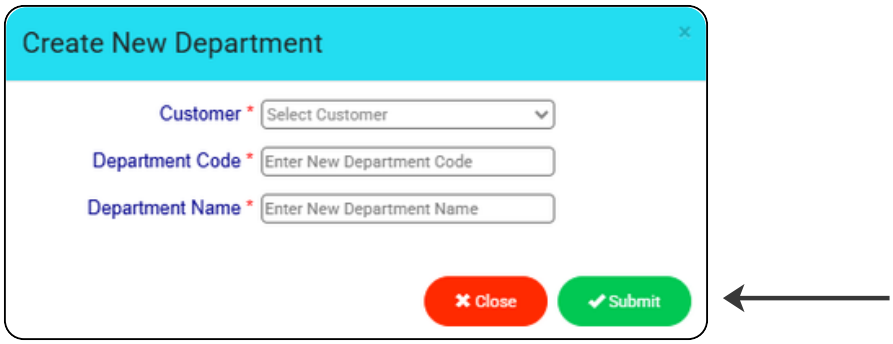

- The system displays the list of existing departments. Click the + Add button in the top-right corner.

In the Add Department pop-up window:

- Department Name: Enter the official name of the department.
- Department Code / ID: Enter the unique internal identifier (if applicable).
- Description / Notes: Provide any additional operational details.

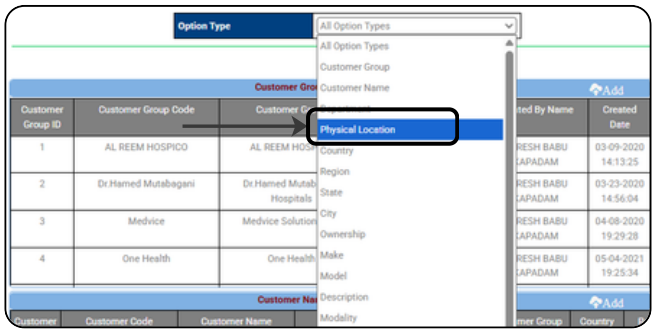

Click Submit to create the new department.

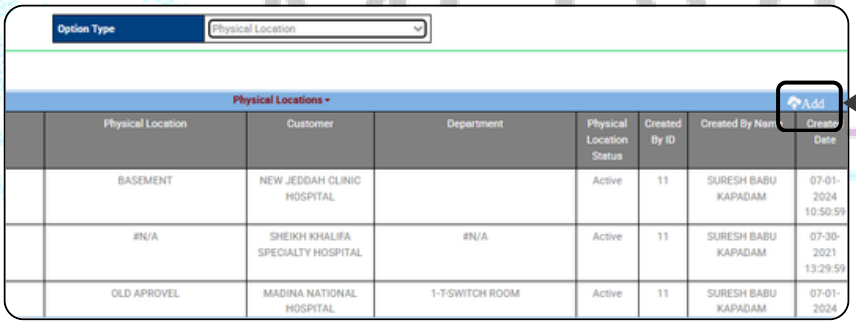

MEDVICE SOLUTIONS

Physical Location

- After navigating to the Asset Options page, select Physical Location from the Option Type dropdown at the top of the page.

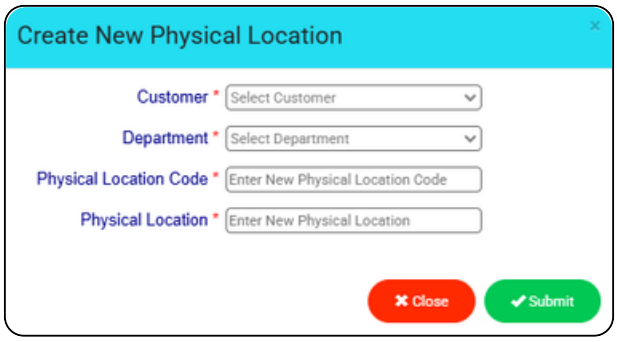

The system displays the list of configured physical locations. Click the + Add button in the top-right corner.

In the Add Physical Location pop-up window:

- Customer: Select the customer name from the dropdown list.
- Department: Select the relevant department from the dropdown list.
- Physical Location Code: Enter the unique code for the physical location.
- Physical Location: Enter the name or specific place of the physical location.

Click Submit to create the new Physical Location.

MEDVICE SOLUTIONS

Approving Assets Lists

After filling in all the required information, click Submit Asset, located on the left side of the page.

Once the asset is submitted, it must be verified and approved by the Manager before the asset becomes active.

After the asset is created, the Manager will verify the asset details. Once the Manager has reviewed and confirmed the information, go to the Assets Management section and select the Approve New Assets tab.

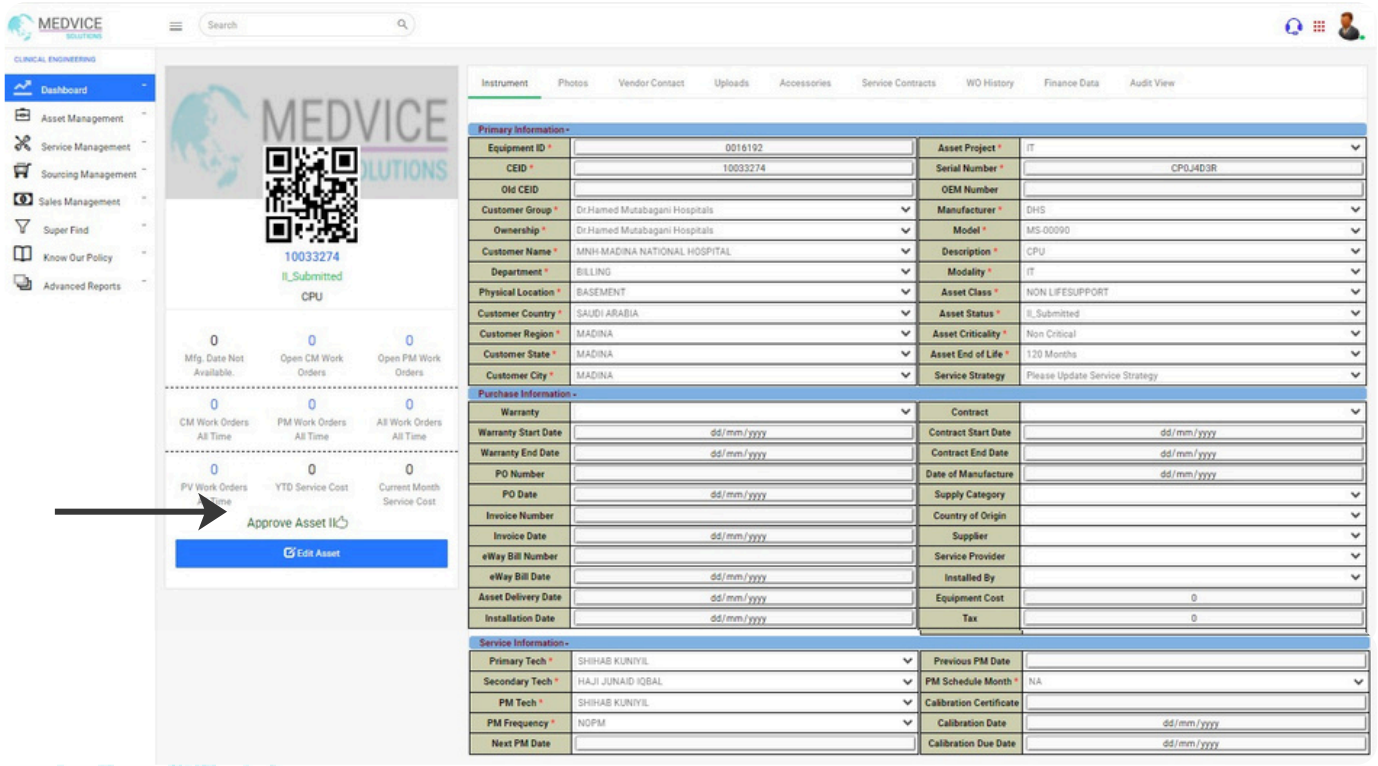

You will see a list of newly created assets. Click on the corresponding CEID Number, as shown in the image above. The corresponding asset page will be displayed.

To approve the asset, click the Approve Asset button at the top. This will open the Approve Asset pop-up window.

The Manager should review the asset and, if everything is correct, select Approve and click Submit.

Once the approval process is completed, the asset status will change to Active, as shown in the images below.

Approving Asset

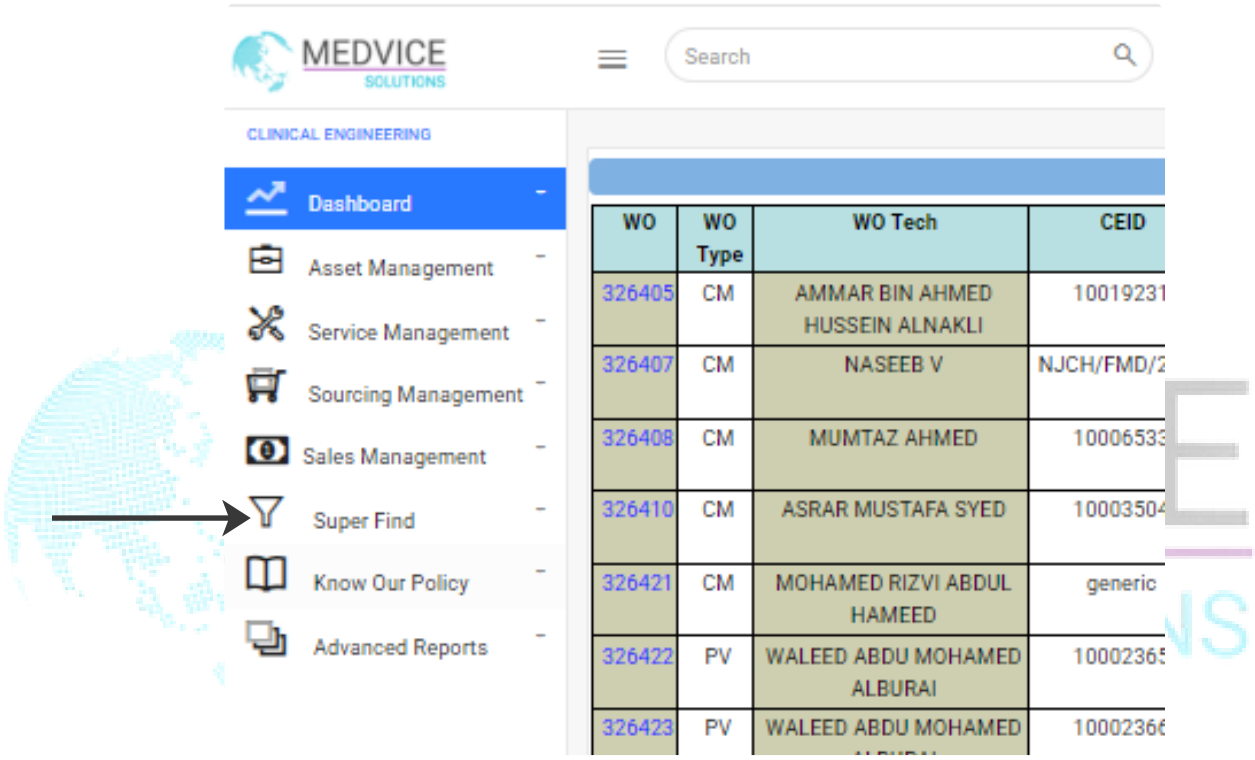

You have now successfully added the new asset and activated the equipment asset.

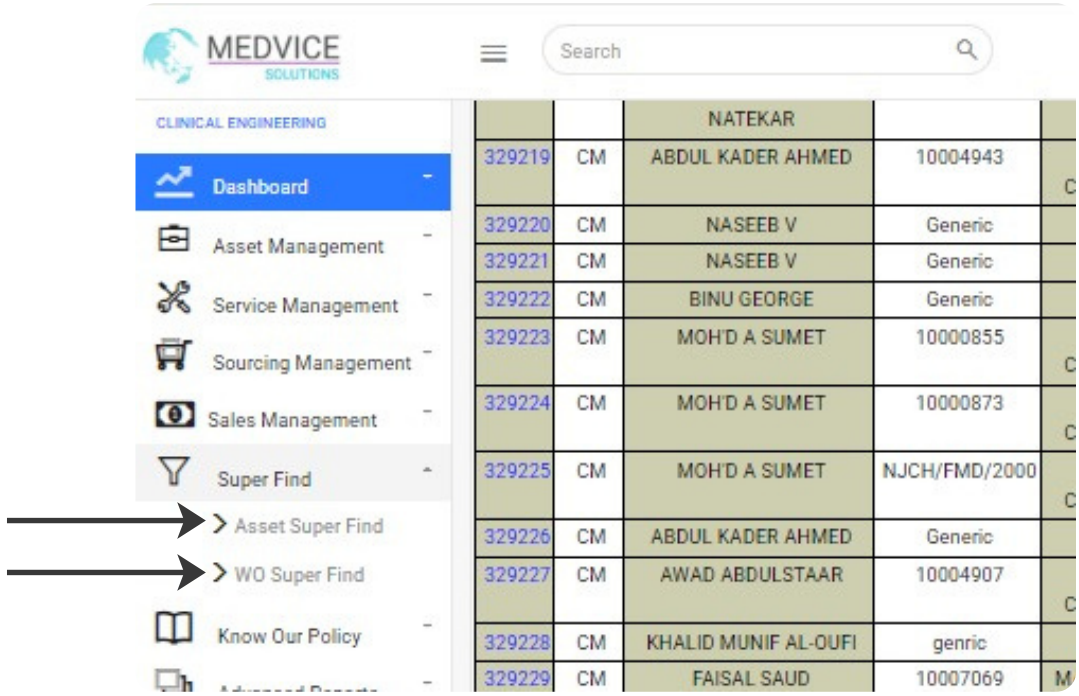

Super Find

Dashboard & Super Find

After login, the Medvice Dashboard will appear, as shown in the image below.
Click on the “Super Find” tab.

Under the Super Find section, two sub-tabs are available.

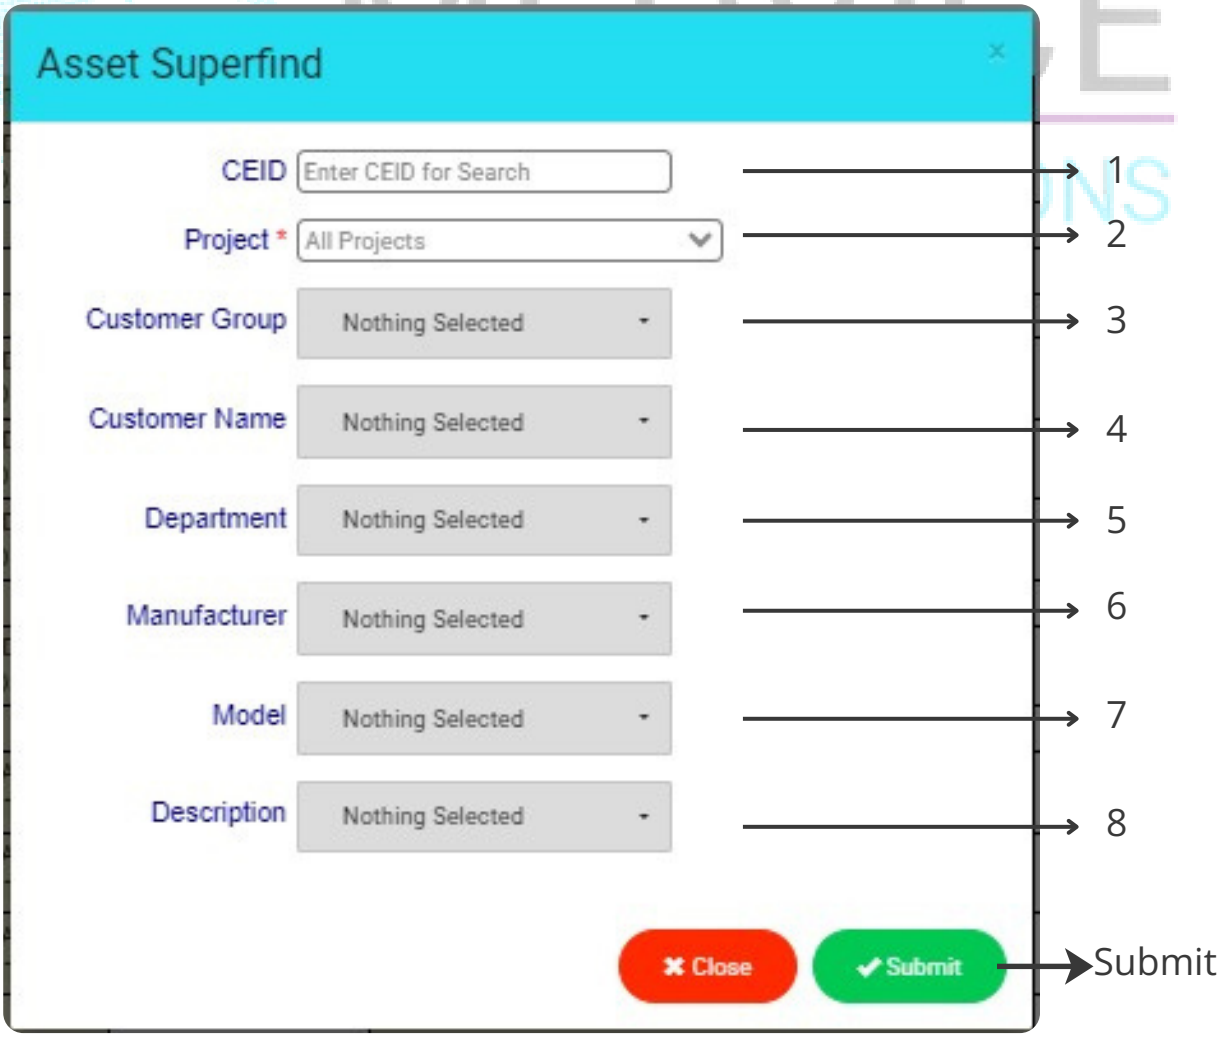

Asset Super Find

In the Super Find section, there are two types available:

1.Asset Super Find
2.WO (Work Order) Super Find

1. Asset Super Find
Under the Super Find section, select the Asset Super Find tab.
After selecting Asset Super Find, a pop-up window will appear. Enter the required information in the respective fields, as shown in the image below.

Assets Find Filters

In the Asset Super Find pop-up, you can search for assets using various filters, as described below:

CEID

- If you have the CEID Number of the asset, enter it in the CEID input field.
- The corresponding asset details will be displayed automatically.

Project

- To retrieve assets based on a specific Project, select the relevant project from the drop-down list.
- The assets associated with the selected project will be displayed.

Customer Group

- To retrieve assets by Customer Group, select the relevant customer group from the drop-down list.
- Note: A customer group may include multiple customers or hospitals.
- The assets belonging to the selected customer group will be displayed.

Customer Name

- To view assets by Customer Name, select the relevant customer (hospital) from the drop-down list.
- The assets associated with the selected customer will be displayed.

Department, Manufacturer, Model, or Description

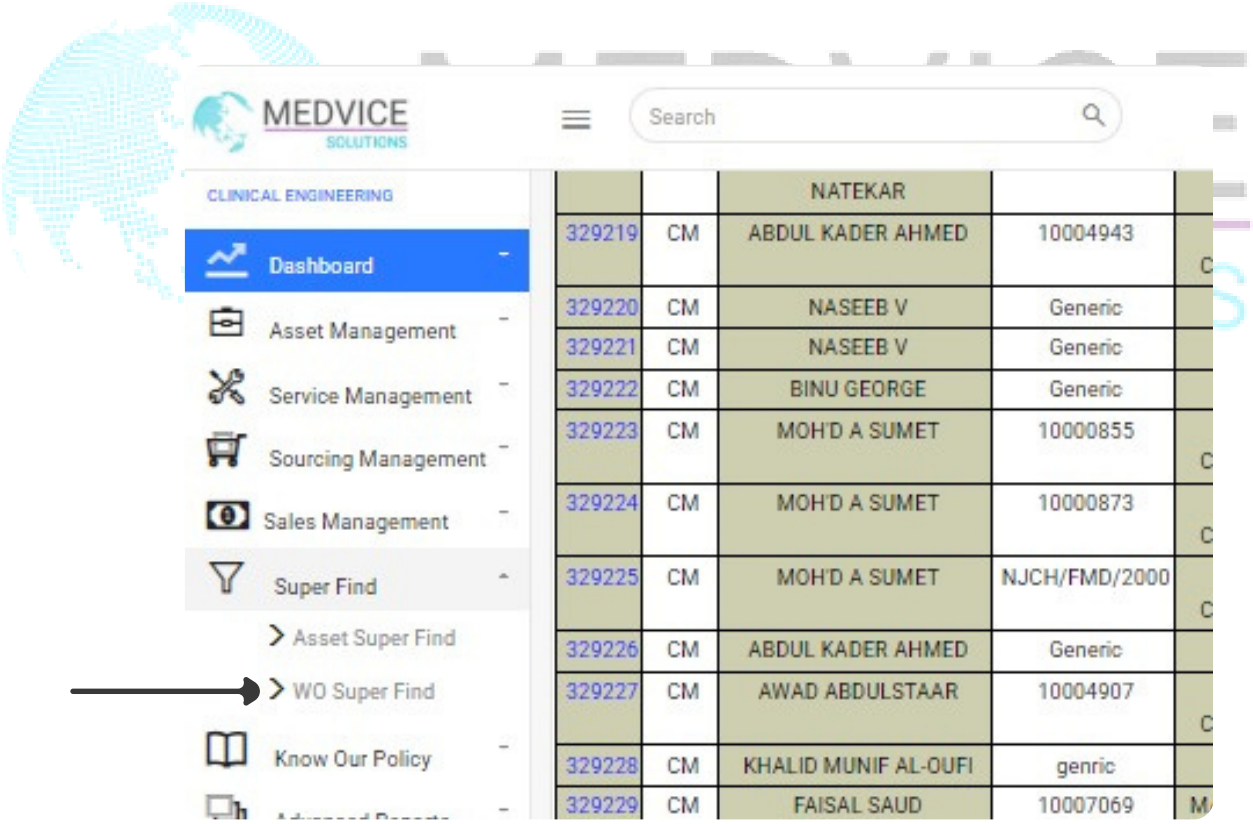

- To search for assets based on Department, Manufacturer, Model, or Description, select the relevant option from the available filters.
- The corresponding asset data will be displayed accordingly.

You have now successfully learned how to find assets using the Super Find feature under Assets Super Find.

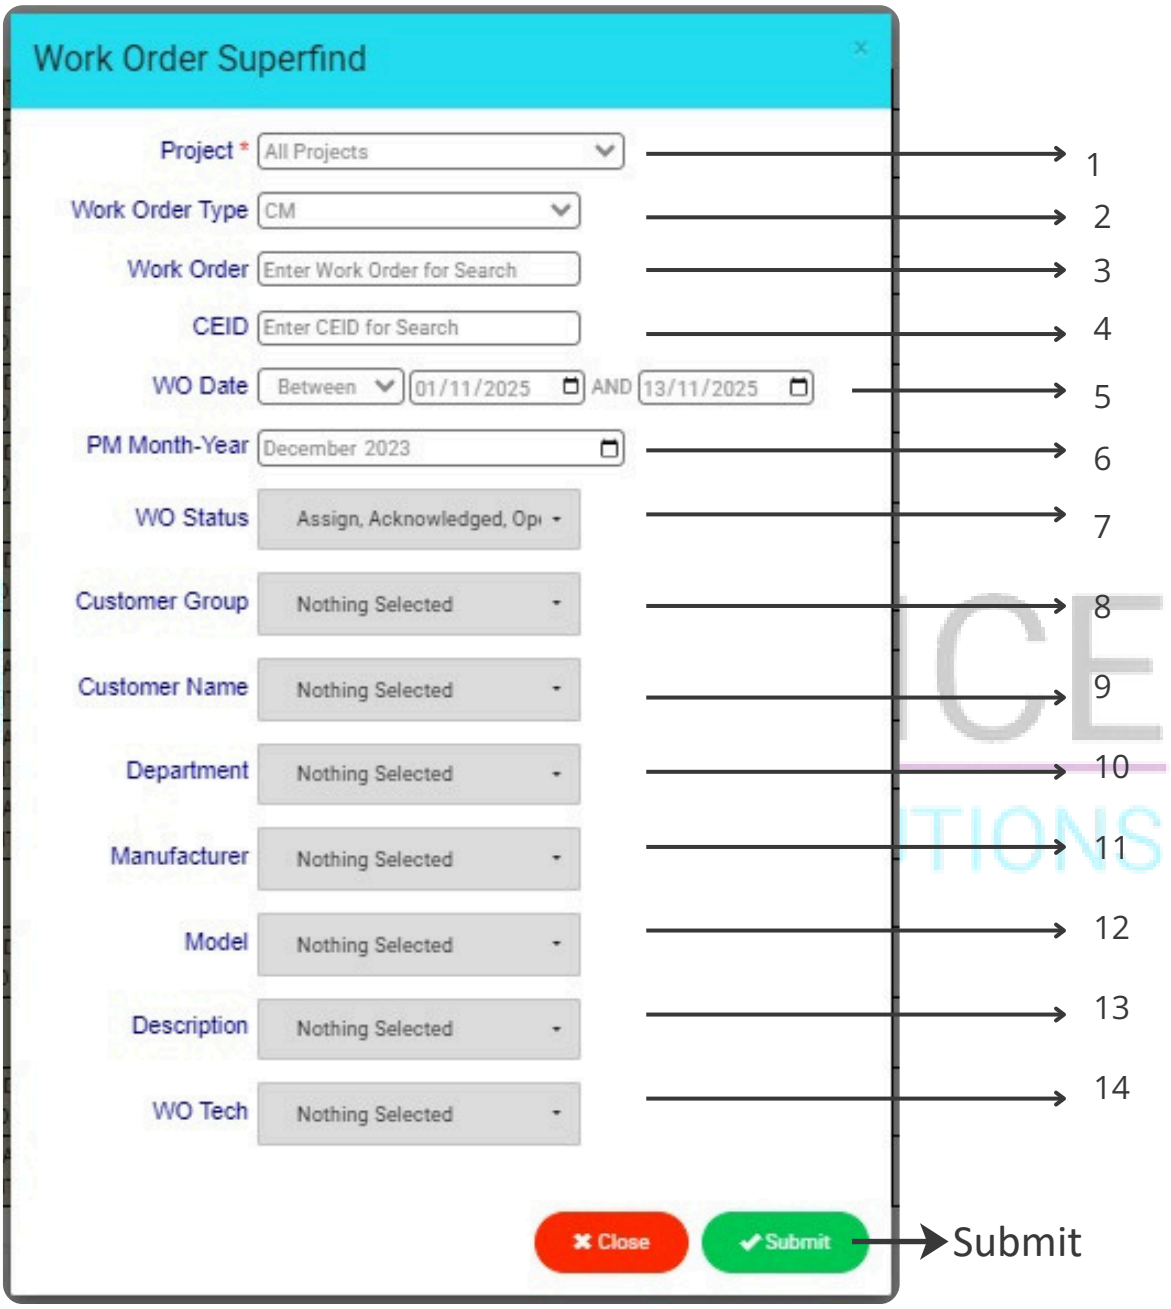

Dashboard & Super Find

1. Work Order(WO) Super Find

Under the Super Find section, select the Work Order Super Find tab. After selecting Work Order Super Find, a Work Order Super Find pop-up window will appear, prompting you to enter the required information, as shown in the image below.

WO Super Find

In the WO Super Find pop-up, you can search for work orders using various filters, as described below:

Projects:

- To retrieve work orders based on a specific Project, select the relevant project from the drop-down list.
- The work orders associated with the selected project will be displayed.

MEDVICE SOLUTIONS

Work Orders Filters

Work Order Type

- To retrieve work orders based on a specific Work Order Type, select the relevant option from the drop-down list, such as CM, PM, PV, Calibration, AI, Work Orders from the drop-down list.
- The work orders associated with the selected work order type will be displayed.

Work Order

- If you have the Work Order Number for a work order, enter it in the Work Order input field.
- The corresponding work order details will be displayed automatically.

CEID

- If you have the CEID Number for a work order, enter it in the CEID input field.
- The corresponding work order details will appear automatically.

Work Order Date

- Select the Work Order Date to view the corresponding work order details.

PM Month-Year

- To view PM Work Order details from a previous year or month, select the desired year and month.
- The relevant PM Work Order details will be displayed.

Work Order Status

- There are six Work Order Statuses available: Assigned, Acknowledged, Open, Reopen, Completed, and Closed.
- To view work orders based on a specific status, select the desired status from the drop-down list.
- The relevant work orders will then be displayed.

MEDVICE SOLUTIONS

Customer Group, Customer Name, Department, Manufacturer, Model, Description, and WO Tech.

- To search for work orders based on Customer Group, Customer Name, Department, Manufacturer, Model, Description, or WO Tech, select the relevant option from the available filters.
- The corresponding work order data will be displayed accordingly.
- After setting the required filters, click the Submit button.
- The work orders matching the selected filters will then be displayed.

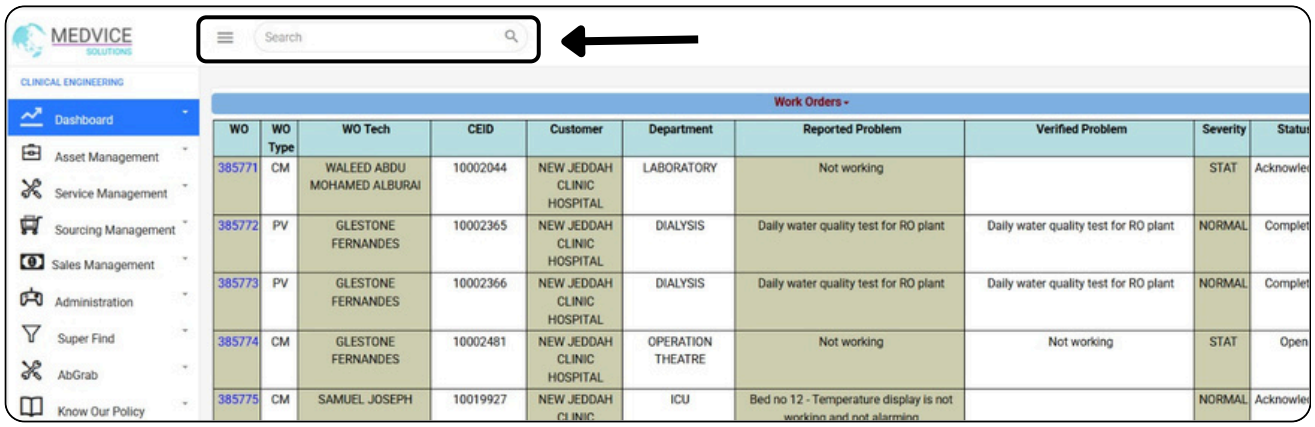

This completes the process of searching for work orders using the Super Find feature under WO Super Find.

SOLUTIONS

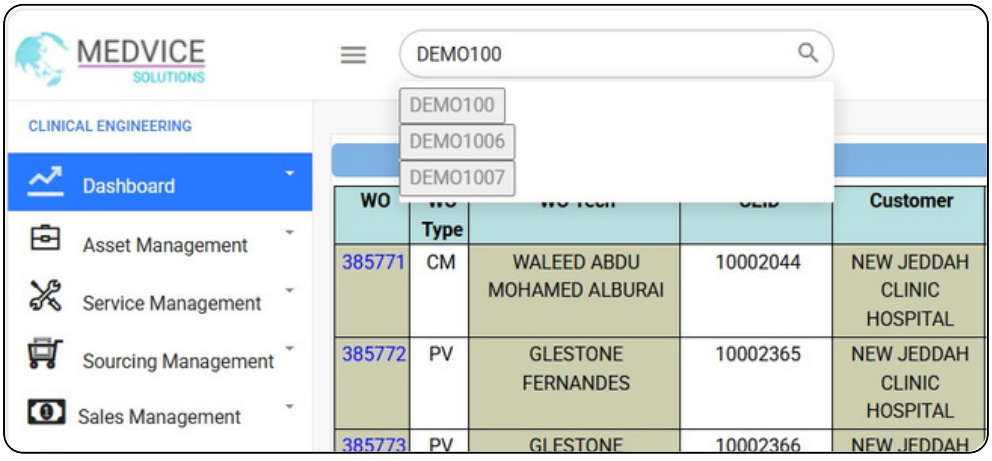

Universal Search

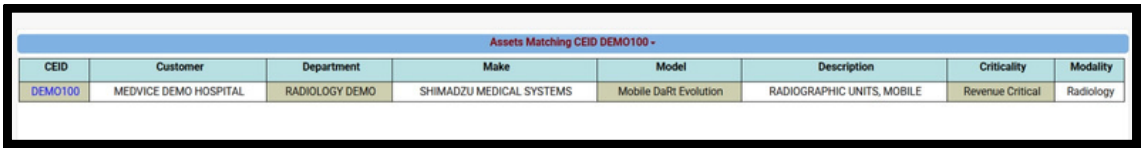

Universal Search

Navigate to the Universal Search option located on the main dashboard.

- Click into the search bar to begin entering your search criteria.
- The system allows you to search across Medvice Insights using specific identifiers. Type an exact Work Order number, Asset ID, or related keywords to instantly display the exact matching record.
- The search engine also supports conditional searches, automatically surfacing related results and contextual data based on your query.

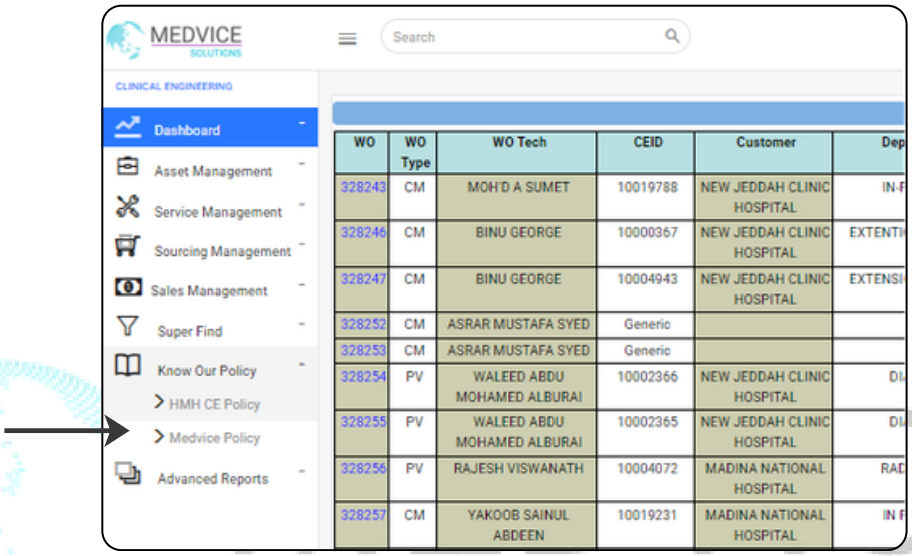

MEDVICE SOLUTIONS

Know Your Policy

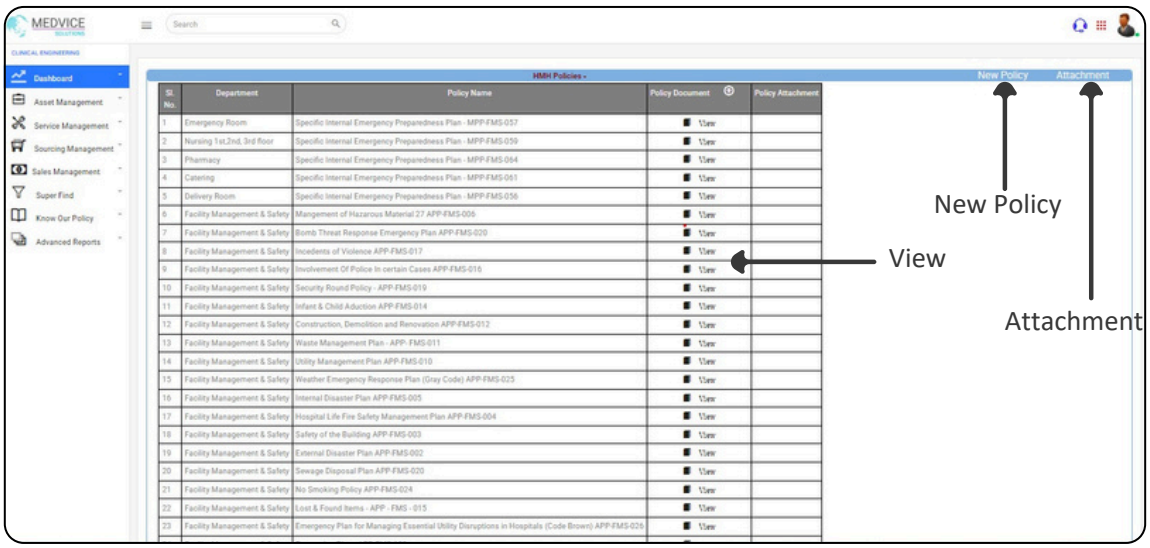

Login Page & Dashboard

Click on the “Know Our Policy” tab.
Under Know Our Policy, select the Medvice CE Policy tab.

After selecting the Medvice CE Policy tab, the Medvice CE Policy dashboard page will be displayed.

On this page, click the New Policy tab located at the top-right corner to add a New Policy.

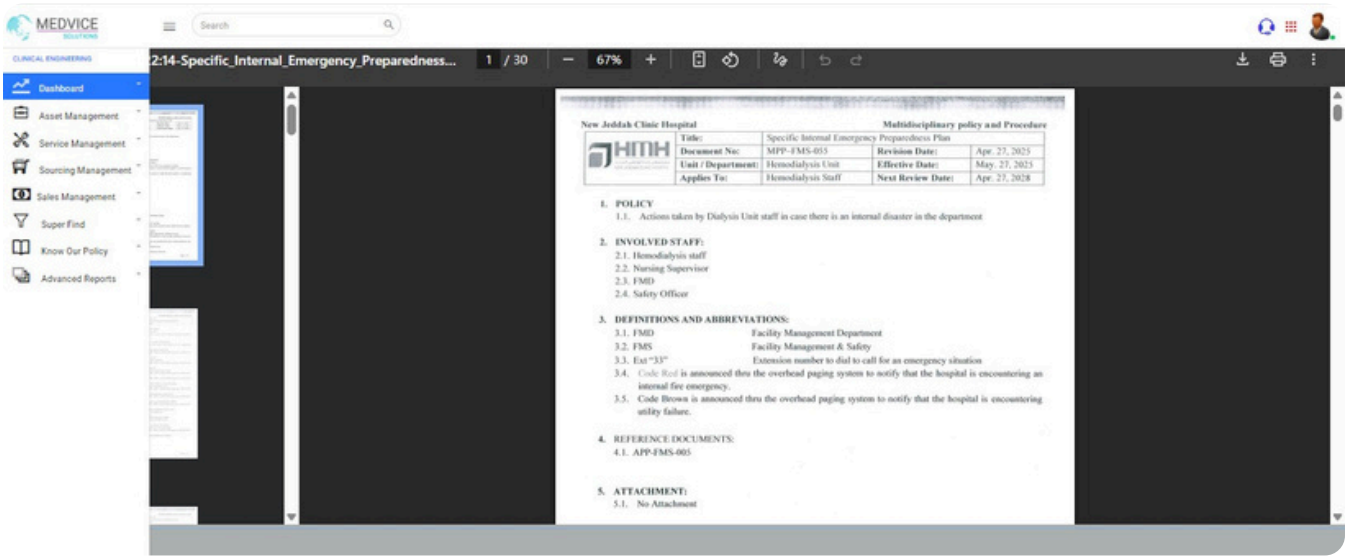

New Policies and Attachments

- After clicking New Policy, a pop-up window will appear. Enter all the required information.

- Click Submit to create the new policy with attachments.
- To view a policy and its attachments, click the View link under the Policy Document column on the right side of the record.
- Once clicked, the attached documents will open, as shown in the image below.

Update Existing Policies Attachments

- To edit an existing policy, update details, or add more attachments, click the Attachment tab located beside the New Policy tab.
- In the New Attachment Document pop-up window that appears, fill in the required information.

After filling in all the required information, click the Submit button.

You have now successfully added the attachments to the policy.
